

## ENVIRONMENTAL POLICY

C-Cure Solutions Limited has developed a range of charcoal based products and associated services to provide remediation of contaminated soils, waters and wastes in order to remove or mitigate associated environmental liabilities. Our mission is to promote sustainable solutions and workplace practices and minimise the impacts of our business on the environment. Whilst our products and services provide an overall environmental benefit we recognise that there may also be potentially adverse environmental impacts associated with our activities.

Through our environmental culture we will minimise the adverse environmental impacts and enhance the environmental benefits of our operations.

Therefore, C-Cure Solutions Limited will:-

- Identify and comply with all environmental legislation and other requirements applicable to our activities;
- Understand the environmental issues of each of our spheres of operation and then monitor, review and improve our environmental performance via:

Monitoring and developing the latest best available techniques

Minimise generation of waste and maximise re-use and recycling

- Work in partnership with our customers and our supply chain to promote best environmental practice:
- Communicate this policy to employees, external parties and the general public:
- Annually review our environmental management systems to allow continual improvements in environmental performance.
- The Directors of the business will be responsible for implementation of the policy and creating the appropriate culture that actively encourages environmental best practice.
