

The Ark have large physical and digital library facilities in Central and West London and are able to provide a range of storage solutions and services.

Physical Storage:

- Fully temperature controlled building with fire detection system.
- 24 hour monitoring with CCTV.
- Full bar-coding and database management system using CPPS (The Ark's in house bespoke system). Ability to view, search and track media.
- Online or managed requests.
- Ability to access tapes same day (Monday to Friday).

Digital Storage:

- arKive is a state of the art video and data storage platform utilising the latest technology for archiving storage and programme delivery combined with fast retrieval.
- arKive stores files to our object storage system where they will be held on spinning disc for you to access at your convenience.
- We can ingest any format of tape or file to create your own library.
- Access to a personalised user friendly portal for you and your clients. Ability to manage users to control access. Ideal for global storage and deployment.
- Fully equipped machine room with highly experienced operators. We can organise the capture and transcoding to your preferred mezzanine format then upload, store or transfer to tape.
- Online or managed requests.

Additional Options:

- Ability to archive your material to LTO once deemed no longer required for short term access. Any material archived to LTO will retain a viewing file for you to access.
- Option to have low resolution proxy viewing files created and ability to send them to other parties.
- Design and re-skin the access portal with your company branding.

Whether you are a distributor or Production Company, arKive can be tailored to meet your requirements both now and into the future.
