

CryptoGuard

– Protect your content –

10 YEARS OF EXCELLENCE
IN CONTENT PROTECTION

10 years of Excellence!

CryptoGuard is a leading Swedish provider of CAS and DRM. In addition CryptoGuard has a complete and highly affordable end-to-end OTT solution. In 2017, the company is celebrating its 10th year of securing content for providers and operators worldwide.

The successful journey began in 2007 when CryptoGuard was founded in Luleå in Sweden and launched its Conditional Access System (CAS) tailored for the Swedish Cable-TV market. Due to the analogue switch-off, regulations required cable operators to encrypt their content and numerous small operators faced serious concerns as the existing CAS alternatives were very expensive.

CryptoGuard CAS proved to have the right pricing, high security level and scalability for any size of network which resulted in 70% of Swedish cable operators using CryptoGuard CAS in 2010. The successful introduction in Sweden led to CryptoGuard's expansion into the international market and continued product development to meet the demands from major operators and broadcasters worldwide.

In recent years CryptoGuard experienced a substantial growth and today CryptoGuard CAS has been deployed in more than 40 countries, with a number of national broadcasters. CryptoGuard is well positioned with sales offices on four continents and with an extensive partner ecosystem.

"I am very proud of CryptoGuard's success journey! During 2017 we have strengthened our global presence even further. CryptoGuard will continue development of our Smart, Secure and Affordable product portfolio for next-generation TV services and strengthen our position as the most affordable CAS."

Kjell Carlswärd,
CEO CryptoGuard

2018

Words from our Customers

Ready TV, Jamaica

We chose to go with CryptoGuard due to the company's unparalleled performance and scalability (supporting both cardless and card-based solutions simultaneously). As a television service provider, you have to be certain that only your paying customers are able to view your TV-channels and content.

CryptoGuard uses a high-grade encryption scheme that can be used for satellite TV, cable TV, terrestrial TV and IPTV. The CryptoGuard services can easily evolve to support Multi-DRM solutions for protecting content on mobile devices, tablets, PC/MAC and Smart TVs in the CryptoLITE end-to-end OTT Solution.

Chris Dehring
CEO of ReadyTV

Sappa, Sweden

The deciding factor for choosing CryptoGuard was the low entry costs and ready to use SMS. CryptoGuard is a stable, future-proof and well functioning system, but still flexible enough to give us many opportunities for customization.

The company consists of competent staff with high sense of service that are always quick to give feedback and to solve any problems that might occur.

Hasse Svensson
CEO Sappa

Satcon, Congo Gabon Liberia

We have chosen CryptoGuard CAS in comparison with the majority of other competitors. The cooperation with CryptoGuard is amazing. CryptoGuard is a flexible, cost-effective and reliable CAS alternative in the market.

Bassam Fahs
IT and Technical Manager Satcon

Kopernikus, Serbia

Kopernikus chose CryptoGuard's CAS system because of the good conditions, high quality, flexibility, user friendly customer interface regarding work on the system and complete integration of all needed functionalities.

Stevan Mićašević
CTO in Kopernikus

Digiana, India

CryptoGuard CAS is one of the most reliable and stable CA Systems. Also providing high quality product and user friendly interface. This is why CryptoGuard has been our first choice for secured CA System.

Sukhdev Singh
Managing Director Digiana

Radijus Vektor, Serbia

Radijus Vektor has chosen CryptoGuard CA system because of cost-effective business model which is based on affordable TCO. We can use CryptoGuard CAS for any PayTV service, e.g. DVB-C and IPTV - single encryption server for many kind of encrypted services. Wide range of STB and CAM module Partners give us flexibility to choose the best CPE for us. Final reason is good and fast support.

Miroslav Stantic
Executive Director for Network

Sristi, India

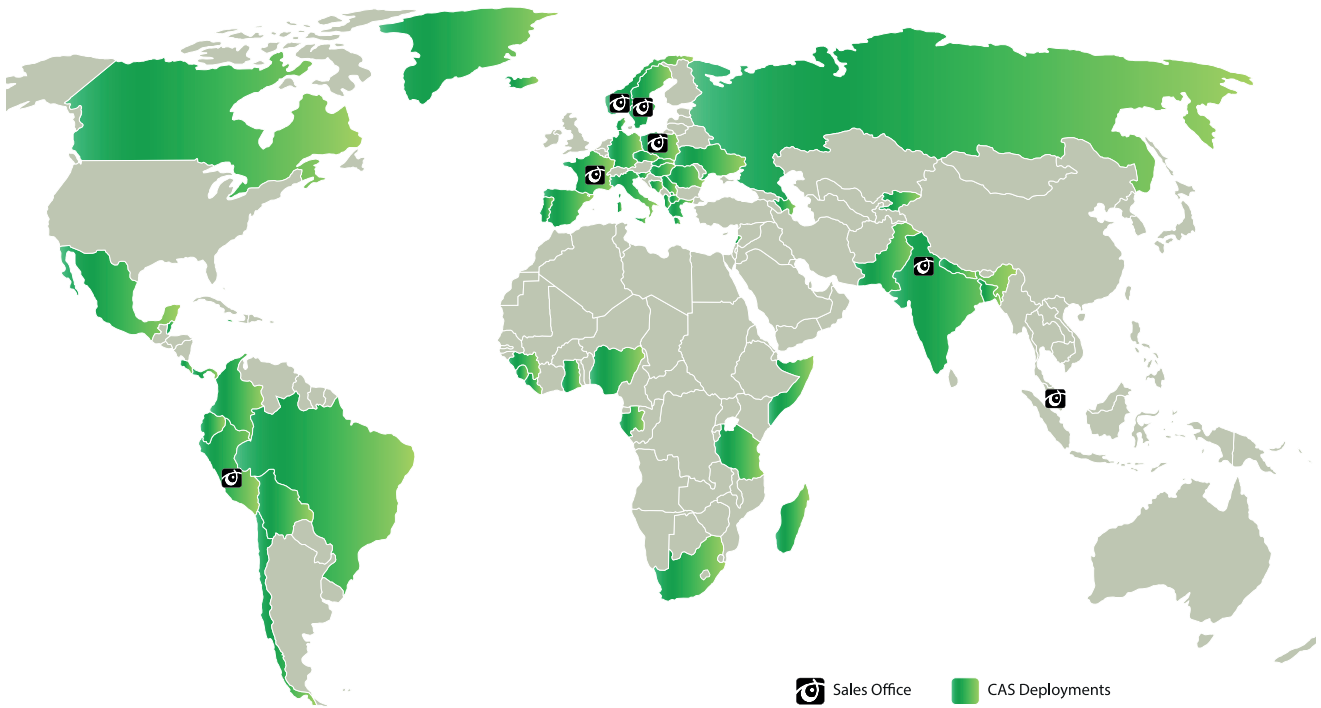

We have chosen CryptoGuard because of the high quality secured system and scalability. CryptoGuard is providing Sristi local partners with a strong business model to grow with and support for new advanced technology.

Shantanu
Director Sristi

Mauli Nadeem Cable, India

CryptoGuard was our first clear choice because of the good support, scalability and rich features. We are happy with the CryptoGuard CA system.

Suresh Mauli
Managing Director Mauli Nadeem Cable
