iPhone 6 (S) Plus

iPhone 6 (S)

iPhone (SE)

Apple iPhone SE

- 4" Screen
- iOS 10
- 12 megapixel camera
- 16GB or 64GB

Apple's iPhone SE is the first 4" iPhone released since the iPhone 5 in 2012, however it packs a lot more power. In fact, the SE has features on par with the iPhone 6S such as the advanced A9 Chip, Apple's best 12 mega-pixel iSight camera and even 4K video recording – *at a much smaller price tag.*

Apple iPhone 7

- 4.7" Screen
- iOS 10
- 12 megapixel camera
- 32GB, 128GB or 256GB

The iPhone 7 is Apple's latest flagship device, alongside the Plus variation. The new Apple iPhones have been dramatically improved with the best performance and battery life ever in an iPhone. Not to mention water and dust resistance for the first time in Apple history!

Apple iPhone 7 Plus

- 5.5” Screen
- iOS 10
- 12 megapixel camera
- 32GB, 128GB or 256GB

The iPhone 7 Plus is a variant of Apple’s latest flagship device, the Apple iPhone 7, offering a far larger screen, and a combination of two cameras – the wide-angle camera seen in the iPhone 7, as well as its telephoto camera that shoots as one with the wide-angle camera, giving you higher quality zoom and an all-new depth of field effect.

Apple iPhone 6S Plus

- 5.5” Screen
- iOS 10
- 12 megapixel camera
- 32GB or 128GB

The iPhone 6S Plus is the larger variant of the 6S and offers another option for lovers of big displays with a 5.5” 3D touch screen. Beyond the larger display, the 6S Plus also offers the A9 Chip, Touch ID, a 12MP camera and iOS 10.

Apple iPhone 6S

- 4.7” Screen
- iOS 10
- 12 megapixel camera
- 32GB or 128GB

The iPhone 6S sports a 4.7” display and features 4K Video, 3D Touch, a 12 megapixel camera and Apple’s latest operating system, iOS 10.
