About Environmental Rental Services

ERS entered into the rental of industrial cleaning equipment in response to our customer's increasing equipments of short term equipment needs during periods of high demand. ERS pioneered this rental concept to companies trying to grow their businesses by providing a means to test markets prior to making a capitol investment for equipment. Customers we support services to a variety of industries and municipalities.

Meeting Your Needs

We want to be your industrial cleaning equipment provider. We take pride in our equipment and our knowledgeable staff. ERS honors its commitment to providing dependable equipment where you need it, when you need it.

- petro-chemical refineries
- paper mills
- manufacturing
- power generation
- abatement and remediation
- shipyards and airports
- demolition
- emergency response
- hydro-excavation
- drilling
- disposal

A Higher Standard

ERS maintains an extensive fleet of top-brand industrial cleaning equipment including Air Machines, Liquid Rings, Sewer Cleaners, Hydro Excavators, DOT Liquid Vacuum Trucks and trailers, and Roll-Off trucks and trailers. We have now added 130 barrel DOT / ASME certified self contained vacuum tankers that will rent with or without tractors.

We strive to exceed our customers' expectations because they are our number one priority, and we know that we cannot be successful unless they are. We also understand that our equipment's on-site performance and dependability are what allow our customers' businesses to be profitable. In response to this, the concentration of our efforts is on supporting our customers' needs.

Our highly qualified staff is capable of maintaining our equipment at or above factory operational specifications and DOT requirements. Through ongoing training programs we ensure that our technicians are capable of assisting our customers with any maintenance, repair or operational issues.

Solutions

- You need equipment during peak periods.
- Your regular fleet undergoes maintenance or repairs.
- A customer has a project that requires specialized equipment
- You want to build your customer base prior to investing the capital.
- You're considering a job which requires more equipment than you presently own.
- PM's and repairs for your equipment at our facility on your job.
