“DR-SONIC Inline”

A Low Headroom Separator for higher capacity & better Efficiency...

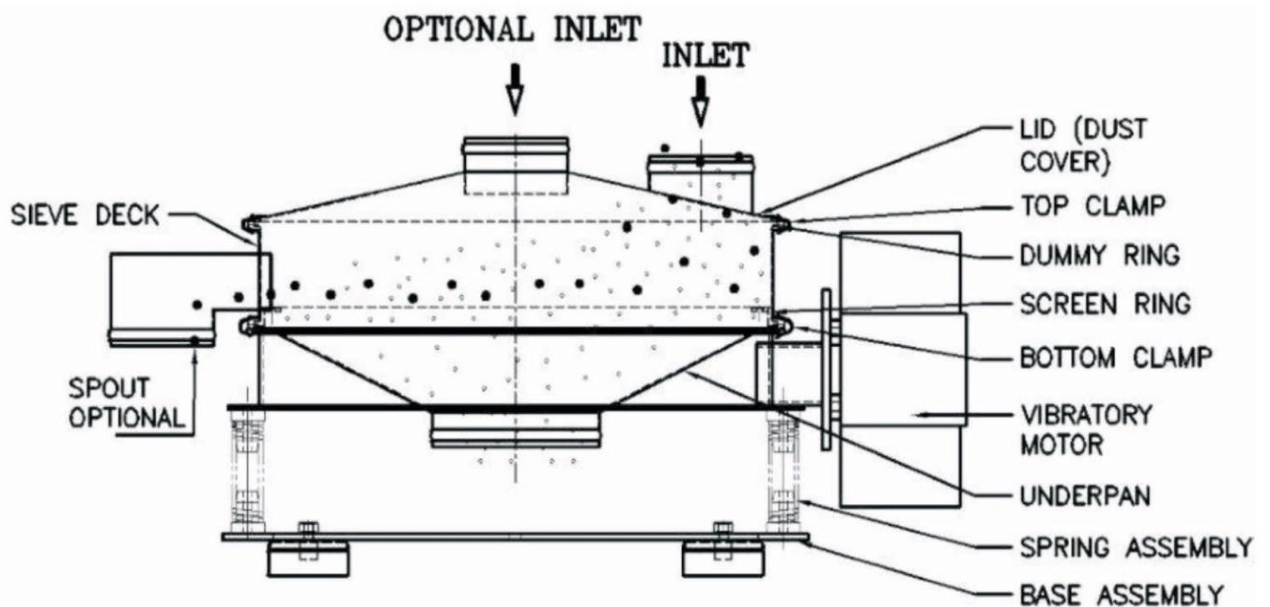

Three standard sizes

IS 18" (450mm)	IS 24" (600mm)	IS 30" (800mm)
IS 40" (1000mm)	IS 48" (1200mm)	IS 60" (1500mm)

Advantages	User friendly
Low headroom design that easily fits into existing product lines	Very easy to operate
Low manpower & maintenance costs	Inlets and outlets can be customized meet existing plant requirements
Feeding inlet and material discharge outlet in same centerline helps in reduction of process time by reducing the movement of material	Available with clean in place systems
Very high screening efficiency	Quick mesh change system

Schematic diagram for DR-Sonic Inline

The DR-Sonic Inline is a unique high efficiency & low headroom separator. This is made possible by developing a unique design that generates three dimensional motion and allows maximum throughput of material.
