

Lone Worker Protection

Keep your finger on the pulse of staff welfare

Orbis provide a dynamic way for you to manage the safety of your lone worker staff

By registering your employee's mobile devices on the Orbis dynamic mapping portal you gain 24-hour access to proactive welfare options that include last known locations, continuous position updates and user notification alerts.

Fully integrated with the Orbis code5® lone worker solution, the portal gives you virtually the same mapping view, functionality and management reporting tools that are used by our dedicated response operators.

KEY FEATURES

- Simple user registration
- Fast start administrator training
- Current and historical locations viewable real-time
- Google maps including street view
- GPS / WIFI / NFC and LBS device location display
- Automatic notifications when a device passes in/out of an area (Geofences)
- Manage all device specific settings
- Panic Alerts clearly defined with comprehensive data shown
- Status report retrieval
- Reports generated by user, date range and event type

BENEFITS

- Position Checker - get visibility of your employees journeys and current locations to enhance safety, efficient working and productivity
- Transparency - full audit and visibility of your staff activity, 24/7 real-time information. Web based user admin and reporting tools give you faster, greater control
- Quick view of Panic Alerts highlight challenging working conditions and training needs for your staff
- Multi device type platform allowing customers with different service types one central point of access
