PRACTICAL MANAGEMENT OF IMPURITIES

And Development of Effective and Comprehensive Control Strategies

Lisbon, Portugal
Tivoli Oriente
Lisboa

26-27 SEPT 2019

A 2 day course
presented by
Dr Andrew Teasdale

"This really was one of the best courses I have ever been on. Thanks a lot to Scientific Update for organising and to Dr Teasdale for this outstanding lectures!"

PRACTICAL MANAGEMENT OF IMPURITIES

And Development of Effective and Comprehensive Control Strategies

Multiple attendees discounts **UP TO 15% available**

26-27 Sept 2019 Lisbon, Portugal, Tivoli Oriente Lisboa

INTRODUCTION

Effective Management of Impurities within Pharmaceuticals is an integral part of the overall development process and a central core of the control strategy.

This course aims to provide an in depth examination of the key principles associated with the management of all key impurity classes and within each provide an overview of the current state of the art. It will look to examine how to apply a risk based approach to impurity identification, assessment and management and how to relate this to manufacturing processes and ultimately the overall control strategy. To ensure that not only are impurities controlled in line with regulatory requirements but also that the associated control strategy allows rather than hinders effective process optimisation.

WHAT WILL ATTENDEES GAIN?

What are the key impurity classes and how they relate to the overall manufacturing process.

A clear understanding of the pivotal role played by chemists and analysts in the impurity management process.

How to effectively relate product quality to impurity qualification ensuring that qualification studies properly align to process capability.

How to align impurity management to the over process control strategy – to optimise effective control

How to use effective impurity management to drive key process and regulatory decisions e.g. starting material definition and defence.

COURSE OUTLINE

1. General Impurity management and control

- This will examine the process of establishing appropriate limits outlining and explaining the process of Impurity qualification and what it actually means in practice.
- Utilisation of durationally adjusted qualification thresholds.
- How to relate this to overall impurity management including CQAs; when / where and how to control in the process.
- How to relate management of impurities to effective selection of starting materials and how this addresses key regulatory concerns aligned to Q11.
- Long term of control and the definition of Established Conditions.
- Control strategy exercise including definition of starting materials.

2. ICH M7

- Examination of Valsartan contamination issue – route cause evaluation and consideration of implications.
- The importance of control vs avoidance.
- Interpretation of ICH M7 and practical implementation strategies.
- How to conduct and MI risk assessment and the pivotal role played by the chemist.
- How to maximise the use of first principles to assess risk and to minimise analytical development.
- MI risk assessment exercise.

3. ICH Q3D

- Key principles and concepts and key role of GMP.
- Current areas of challenge and strategies to address.
- Impact on API and how to establish an effective risk assessment without exhaustive testing.
- Overview of overall scope of ICH Q3D – drug product considerations.
- EI risk assessment exercise.

4. Extractables and Leachables

- What are they and why the concern – illustrated by actual examples.
- Navigating the complex framework of guidance and regulation including the potential impact of new USP general chapters.

5. Other Areas

- Solvents – including approaches to use of non-ICH solvents.
- Shared Facilities – Impact of Guidelines and how to handle / apply to API / Intermediates.

6. New Modalities

- How to extend principles to new modalities e.g. Antibody drug conjugates / Oligonucleotides.
- Effective grouping of impurities.
- How to differentiate between process and product related impurities.
- How to define criticality based on purge potential.
- Potential risk assessment platform approaches.

"I enjoyed the course very much! Andy's experience in the field and insight is the most valuable feedback you can get."

Cayman Pharma

SCIENTIFIC UPDATE

We've got chemistry

Start 9.00am - Thursday 26 September

Finish 4.30pm - Friday 27 September

Course dinner 7.00pm - Thursday 26 September

Course Fee: €1,799

Which includes comprehensive course manual, refreshments throughout the day, lunch and one course dinner.

Course fee: €1,799

COURSE TUTOR

Dr Andrew Teasdale

Andrew Teasdale PhD has over 20 years' experience in the pharmaceutical industry as an analytical chemist and within quality assurance and regulatory roles. His current role is that of chair of AstraZeneca's Impurity Advisory Board. He is a leading expert in key impurity areas, including mutagenic impurities (MIs), Elemental Impurities (EIs), Impurity qualification and Extractables and Leachables (E&Ls). As well as his role in AZ he has led many cross industry groups relating to the areas described; these include both safety and quality groups within Pharmaceutical Research and Manufacturers of America (PhRMA), European Federation of Pharmaceutical Industries and Associations (EFPIA), Extractables and Leachables Safety Information Exchange (ELSIE) and Product Quality Research Institute (PQRI). The latter focused on the critical area of sulfonate ester formation and control. He is also the editor/ author of the first book on the subject of Genotoxic Impurities: Genotoxic Impurities – Strategies for Identification and Control (Wiley). He is also the inventor of the purge factor concept now routinely used in the evaluation of the potential carryover of mutagenic impurities.

In his latest project Dr Teasdale was the lead editor / author for the first definitive book focused on practical implementation of ICH Quality Guidelines – published September 2017 – Wiley and Sons.

IN-HOUSE COURSE

For 8+ people contact us to discuss holding this event In-House - **sciup@scientificupdate.com**

VENUE

Tivoli Oriente Lisboa
Av. D. João II, n.º 27 Parque das Nações 1990-083 Lisboa Portugal

https://www.tivolihotels.com/en/tivoli-oriente

The modern Tivoli Oriente Lisboa Hotel is located next to the Tagus River, in the new area of the city of Lisbon, Parque das Nações. It is approximately 3 Km from Lisbon Airport. Public transport is available a short walk from the hotel: The Gare do Oriente transport hub has trains, the Metro, buses and taxis all available. Around the hotel you'll find a range of entertainment options including shopping centres, bars, restaurants and Lisbon Casino. We have organised a fixed accommodation rate of €130.00 per night. Information on how to book will be provided upon registration.

REGISTRATION

You can either use our fast online booking system or mail or fax the attached registration form to:
Scientific Update
Maycroft Place, Stone Cross, Mayfield, East Sussex, TN20 6EW, UK
Fax Number +44 1435 872734

How to Pay
When you register online, you can have the option to pay via credit card (Mastercard or Visa). A receipted invoice will be automatically generated once paid and sent via email. Should your company wish to pay by cheque or bank transfer bank details will be supplied with an invoice.

Bank Transfer or Cheque
Should your company wish to pay by cheque or bank transfer, on booking you can choose between paying in either €, $ or £. All bank details will be supplied with an invoice.

Group Discounts
Group discounts are available on two or more attendees - see registration form. This offer only applies if bookings are made simultaneously and from the same billing address.

Confirmation of your registration
These will be sent via email.

Late Applications
For late applications, please register online or fax the completed registration form, including credit card payment information.

Cancellations/Refunds
Should you be unable to attend and cancel in writing no later than 1 month before the start of the course, Scientific Update will refund your registration less £300 (or equivalent in €/$) processing fee. Unfortunately refunds are not possible after that date. Substitutions can be made at any time.

PRACTICAL MANAGEMENT OF IMPURITIES

26-27 Sept 2019 Lisbon, Portugal

FAST ONLINE REGISTRATION
Look for the **BOOK NOW** button on the event of your choice
www.scientificupdate.com

No. of attendees _____ **@ €1,799**

Special Offer!
Register 2 delegates and receive 5% on 2nd booking
Register 3 delegates and receive 10% on 3rd booking
Register 4 or more delegates and receive a 15% discount

Payment Methods

Payment will be made by:
☐ Cheque ☐ Bank Transfer ☐ Credit Card

In Currency:
☐ Euros ☐ GBP* ☐ or Dollars*

We accept the following credit cards:
Amex* Mastercard Visa

To pay by credit card a secure link will be provided once you receive your booking confirmation email, this will then take you to a secure payment gateway.
*payments via Amex can only be made in US dollars

*** Currency Payments**
If you select to pay in Dollars, or GBP the amount charged will be based on the exchange rate at the time of preparing the invoice.

Discounts
Complete the details for either two or three delegates and your discount will automatically be applied. This offer only applies where all delegates are booked simultaneously and at the same billing address.

Cancellations
Should you be unable to attend and cancel in writing no later than 1 month before the start of the course, Scientific Update will refund your registration fee less £300 (or equivalent in €/$) processing fee. Unfortunately refunds are not possible within 1 month of the course date. Substitutions can be made at any time.

Data Protection
Scientific Update Ltd is registered under the Data Protection Act 1998. We will store your information securely and only share your contact details with other attendees at this event. If you are happy for your details to be passed to any third parties please tick here: ☐

For full terms of business and payment details please see our website

Please complete this form and fax to +44 (0)1435 872734
