CONSULTANCY SERVICES

We believe that technology should always be the solution, never the problem. It should work for your business and support you in working smarter, not harder. To help achieve this, we provide accredited expertise to augment your team.

Understanding, designing and deploying the best possible solution for your business needs requires specialist knowledge, rich experience and an awareness of what's currently available in the marketplace.

Our Consultancy Services provide experienced and accredited consultants who will work with you to combine your business knowledge and needs with their expertise to design and deploy the most appropriate solution for your organisation.

Our partnerships with leading IT vendors give us depth of knowledge while retaining the independence to give you unbiased recommendations.

Customers rely on our Consultancy Services to:

- Deliver virtualised solutions for the data centre and desktop
- Design secure and resilient networks
- Migrate to cloud services
- Recommend an IT strategy that supports their business goals

KEY FEATURES OF CONSULTANCY SERVICES INCLUDE:

- Over 25 years' experience working with customers in sensitive and demanding sectors like healthcare, legal and financial services
- Independent industry expertise from accredited consultants
- Close partnerships with leading vendors
- Part of a wider end-to-end capability, including engineering and project management
- Working in partnership with you to fully understand and address your IT needs

BENEFITS:

- Augment your in-house team with extra resources for special projects
- Innovate safely with new technology
- Deliver one-off activities with consultants who have done it before
- Meet deadlines within budget
- Secure valuable data with storage, backup and disaster recovery solutions tailored to your business needs
- Strengthen your business with Managed Services designed around your IT systems
