

PowertxtBuo

remote power control

Main Features

- Remotely control power to two devices independently
- Instant SMS alert (*text message*) when mains power is lost/restored (or email alert through *EstateView*)
- Turn power on/off as required remotely by SMS
- Reboot one or both devices remotely with one SMS
- Control via mobile phone with simple SMS commands or control an unlimited number of Powertxt Duo's through our dedicated management software
- Easy quick set up by SMS (<5 min)
- True out of band (No IP Address/Network permission req)
- Security – Password protected // Only responds to authorised users // ONLY has access to mains power not your connected equipment
- One main user and up to 4 additional users
- Worldwide Use (900/1800MHz or 850/1900Mhz)

Powertxt Duo® Overview

Powertxt Duo® is a brand new product for 2015 developed by Tekview. Powertxt Duo allows remote power control of two independent devices over the GSM network (global system for mobile communication) reducing downtime of your equipment to a minimum. Powertxt Duo is one of the simplest remote power devices to deploy on the market, it requires no installation, it doesn't need any device configuration just simply connect the cables, send a text from your mobile phone to Powertxt Duo and you are in full control... it's that simple (*or use our dedicated management software 'EstateView'—see below*).

Powertxt Duo is one of the most secure remote power access solutions on the market as it doesn't require an IP address or network connection so unlike traditional IP power solutions it can be easily deployed reducing potential weak spots on your network. Powertxt Duo also has various levels of inbuilt security making it a true out of band solution, a) you create a secure password when initializing the device & that password is required within **every** command b) only authorised users can control Powertxt Duo (all other messages are ignored) and c) it can ONLY control the mains power, it has no connection to your devices themselves.

EstateView Software

For control of an unlimited number of units we have developed a dedicated management software solution called EstateView. EstateView controls all your devices from one central place, you can set up/initialise one or many devices at a time, group your devices, all the control commands are embedded within the software so you can reboot devices with the click of a mouse, as well as the standard SMS alerts EstateView can send email alerts for power outages, you can customise fields easily to allow for all important information to be held in one central place to save switching between systems and it keeps all power loss and rebooting records for each device in one central place. For more details on how EstateView can help control your Powertxt Duo® devices please contact an authorised Powertxt Duo® reseller.

Technical Data

- 2 x IEC13/14 & 1 x UK/US/AUS/EU Power Cables inc
- LED display
- Password protected
- One main user and up to 4 additional users
- Input Voltage: 100V – 230V AC 50/60Hz
- Maximum Input Current: 10A
- Maximum Total Current Draw: 10A (5A Max per device)
- Nominal Output Voltage: 120V – 230V AC
- Input Connection: C14
- Output Connection: 2 x C13
- CE / FCC / RoHS Compliant
- Automatic time and date synchronisation
- Operating Temp: 0°C to +40°C
- Operating Humidity: 0-80%
- Worldwide Use (900/1800MHz and/or 850/1900Mhz)
- Product Dimensions: 26cm x 13.5cm x 4cm
- Rackmount Height: 1U
