

# SHAFT INSPECTION

*Capture Digital Reality in Minutes*

## Features & Benefits

- Safely inspect shafts
- Easy to set up and deploy
- Same-day actionable information\*
- Measurement and images available
- 3D data compatible with mine planning, CAD and 3D point cloud software

## Applications

The MVS shaft inspection system will allow you to quickly:

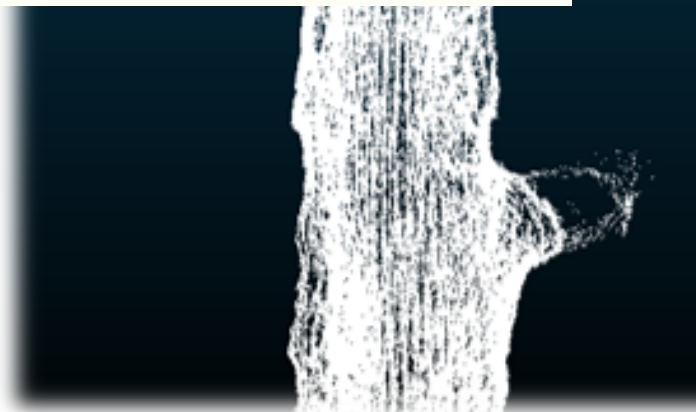

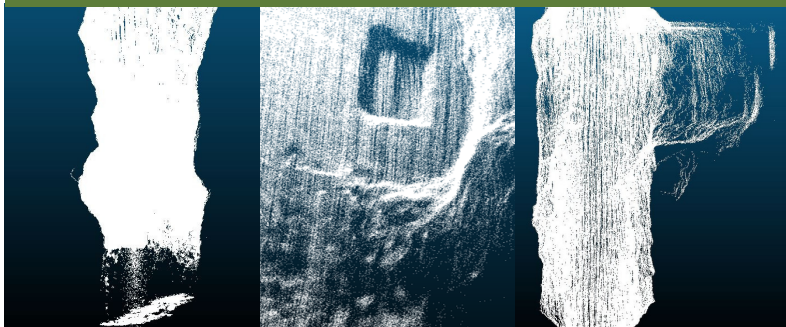

**Locate structural issues | Measure change | Monitor debris buildup |  
Assess and diagnose ventilation problems**

Transform your productivity, eliminate lost time injuries, and enhance mine scheduling through fast mapping updates and globally accurate 3D scans.
