Beckfoot
Enjoy • Learn • Succeed

Established in 1973, ASG are one of the longest established companies within this specialised industry, providing Performing Arts facilities for Education, Leisure, Theatre and Television, amongst many other sectors. We have built a reputation for high standards, quality and attention to detail, with a level of expertise and customer satisfaction that some companies can only aspire to.

ASG have the technical knowledge to undertake a variety of projects, whether unusual or conventional. From the simplest repair to a composite installation, we can take your project from the original concept through detailed design and CAD drawings, to site completion and ongoing routine maintenance, thereby providing a complete 'turnkey' composite package - the simplest solution for any client.

ASG welcome any opportunity to offer our experience and provide proposals and quotations, without obligation or charge, supported by technical data and our extensive image library of completed projects. We can also offer our consultancy services when required.

Contact us on **01942 718347** to discuss your project or arrange a visit, or see our website at www.asgstage.co.uk for further Company information.

From schools and village halls to theatres and shopping centres, we design, manufacture and install individual composite performing arts schemes. It can never be too early to begin planning, as client expectations, DDA requirements and legacy equipment often need to be considered, co-ordination with HVAC, ceilings and other trades is imperative, electric supplies will be required, and maybe even extra steelwork!

Our experienced management team specialise in managing projects of any size. Our knowledge and reputation can be demonstrated by the contractual projects and repeat customers we have been involved with, including some of the most prominent architects, M&E consultants, fitting-out companies and construction contractors throughout the UK and Ireland.

ASG employ in-house designers, project managers and engineering personnel, who are fully trained and continually assessed. We also have the facilities of freelance professionals such as structural engineers and acoustic consultants. Consultancy may better suit the needs of your project, whereby we can offer our normal services, but with the added benefit of providing specifications or drawings for client approval or tendering.

The Fuse, Partington

The King's School, Chester

Cardinal Newman College, Preston

The Grange School, Northwich

Ashton on Mersey School, Sale

Performing arts facilities are found in most educational venues including high schools, colleges, universities and academies, also often in various primary schools. Areas include multi-purpose rooms or a dedicated theatre space and/or drama or dance studios.

Often categorised as Theatre or Audio Visual facilities within education, we can provide a full range of services for composite installations, also proposals and consultancy, with tracks, curtains, raise and lower gear, lighting rigs, sound systems, projection, seating, mirrors, staging and even access equipment. We can also refurbish and re-use legacy equipment where appropriate.

Whether a dedicated leisure centre, a typical school sports hall or a community centre, these spaces are often equipped with performance facilities.

A leisure centre may be used for sports events during the day, but can also have a second income from theatrical events at night, as an entire performance space can be made to retract or raise for storage. Tracks can be used for division nets, curtains or reflectors can improve poor acoustics in a large hall, or a conventional dance studio can be equipped with tracks, curtains, lighting, sound and mirrors. The photos below show sports hall venues that can be quickly converted for performances.

Lakes Leisure Centre, Kendal

Lakes Leisure Centre, Kendal

Winsford Lifestyle Centre, Cheshire

Knowsley Leisure Centre, Liverpool

University of Limerick

Liverpool Institute for Performing Arts

Royal Concert Hall, Glasgow

King's Theatre, Edinburgh

Royal International Pavilion, Llangollen

Southport Theatre

For professional or amateur theatres, concert halls and arts centres, we can offer extensive composite installations, through to repairs and maintenance, or consultancy when required. Even town halls, civic centres and village halls often require theatrical facilities.

Every type of performance facility can be found in these types of venues, including heavy engineering such as powered flying, counterweights and safety curtains, audio visual systems with lighting, sound, video and projection systems, as well as tracks, curtains, staging and seating.

UTV News Studio, Belfast

Harris Academy, Croydon

Olympic Studio, IBC London 2012 Olympics

Harry Potter Studio Tours, Great Hall, Leavesden

We have equipped many large and small television and film studios, including professional international or regional broadcasters, media centres or schools, where equipment would often include fixed or movable lighting rigs, hoists, luminaires, pantographs, cyclorama tracks and cloths.

As well as studios for the BBC, ITV and Sky, we have also equipped 42 studios for the worlds' media (International Broadcasting Centre) at the London 2012 Olympics. Also 5000m² of support grids at Warner Bros Harry Potter Studio Tours in Leavesden.

Equipment traditionally used for performing arts can be found in a diverse range of other sectors, such as places of worship, theme parks, conference centres, village halls, lecture theatres, warehouses, shopping centres, museums, hospitals, community centres and hotels.

Even aircraft hangars can benefit from intelligent lighting to help sell the latest stealth fighter, or electric division curtains when painting a couple of 747 jumbo jets, as we recently installed at Manchester International Airport. For other unusual and interesting projects, see our website www.asgstage.co.uk for further details.
