

Tidy away space-wasting pipes, ducts and cables beneath our market-leading, raised access flooring systems. Raised access flooring will improve the productivity and marketability of any office or retail space, while split-level, raised access flooring can be used to creatively demarcate separate areas to further enhance the customer experience.

Our highly-trained installation teams can supply and install an extensive range of raised access flooring systems, along with state-of-the-art factory applied finishes, bracing and insulation products to match your specific site and design requirements.

Combining strength and functionality

- Full range of JVP and Permaflor raised-access flooring products.
- Standard and bespoke solutions, including wood, porcelain and vinyl finishes.
- Different pedestal permutations for void heights of between 70 mm – 1800 mm.
- Void insulation products including Foamglas and Lamathern.
- Bespoke communications panels and grilles.

For New-Builds And Renovations

IFT has experience installing raised access flooring systems to clients in a wide variety of sectors, for new-build and property renovation. As an integrated provider for a comprehensive range of flooring systems, we can also deliver hybrid projects that combine raised-access flooring for offices with industrial food grade flooring and hygienic wall cladding for associated production areas.

RAISED ACCESS FLOORING
For Comfort, Convenience And Versatility

Additional Flooring Services

As part of our value-added service, IFT can supply and install a comprehensive range of flooring systems to meet the needs of our broad client base. These include:

- Epoxy Resin, Polyurethane and MMA Flooring
- Floor Screeding and Levelling
- Food Safe Flooring
- Hygienic Wall Cladding
- Car Park Decking

Helping you make the right choice

IFT managers are extremely knowledgeable and can provide expert guidance on the appropriate flooring system to match the operational requirements of your property, whether it be for a small office suite within a factory complex or for a commercial development of up to 20,000 m². We can also install insulated and temperature-controlled raised access flooring for ICT and Server Rooms.

Our installers are all highly trained and accredited in the installation and safe application of all flooring systems. We operate rigorous Health & Safety, Quality and Environmental Management Systems and provide clear and detailed Risk Assessments, Method Statements and COSHH Assessments (RAMS) for each project we undertake.
