# Install BtL Mobile Interceptor - iPhone

Instructions

1. Go to the application store on your iPhone. Search for the application 'Adore Calling Card Dialer'. The application is by developer Adore Infotech. Pvt Ltd. – please click download and allow the application to download.

2. Once application has downloaded go to 'Cards' on the bottom of the application screen.
   - Initial dial number (will be given to you)
   - Pause length before redial – usually 1-2 seconds
   - You may name the card anything you wish
   In addition, any existing entries can be deleted but a new one needs to be made with the above settings.

3. Once these have been added, you can save the Card.

4. Please return to the 'Cards' selection at the bottom and ensure the correct card is selected.

5. When you would like to dial an existing contact you can select 'Phone Book' or 'Contacts' at the bottom, click 'Allow' for access to the contacts on the phone and select a contact. If you click the name and then call within the application, the call will go through BtL's platform at an extremely reduced rate. You can also use the 'Keypad' along the bottom to dial a number that is not in your existing contacts. The dialling will only work when using the application, please ensure you do not dial international numbers outside of this.
