■ Tailormade solutions to help reduce your energy usage

“ We believe that everyone should be using less energy.

By identifying and implementing simple techniques, we can help you, to reduce your energy consumption. “

ABOUT CURA

Welcome to Cura Energy. We are an energy services provider that creates tailor-made, energy efficient solutions designed to reduce your energy usage.

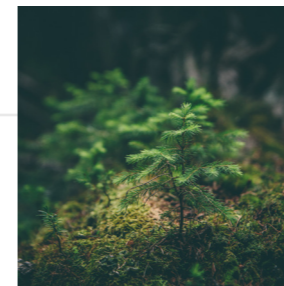

Established in 2011, we have steadily grown our business through a pioneering spirit, our great people and solid relationships with our clients, helping them to understand and control their energy costs.

Cura Energy can survey, recommend and install the latest metering systems whilst our experienced energy team ensure that the installation provides relevant and accurate data.

We are a leading provider of Building Energy Management Systems (BeMS) and an approved installer of Trend and Siemens systems amongst others. Aligned with the best energy reduction products

available, we can advise on how to further reduce your energy consumption and have a range of solutions and services to suit with products from lighting and HVAC to renewable technologies.

Our expertise ranges from multiple-site rollout programmes to smaller bespoke schemes and includes the commercial office, retail and financial sectors.

ESTABLISHED IN 2011
A MARKET LEADER IN ENERGY SAVINGS

PROVIDING VALUE DRIVEN IDEAS
AND INNOVATION

WE ARE WITH YOU ALL THE WAY,
FROM CONCEPT TO COMPLETION

OUR IDEA

At Cura Energy we know there's nothing more important than reducing energy usage for your business and saving money - no matter what your size or what sector you operate in.

How can we make that happen? With ongoing advancements in new technology, energy products and the various systems

available within the marketplace we make it our role to be armed with the latest up to date information and be at the forefront of instigating change.

That's why an important part of our service is to sit with our clients and listen to their issues, brainstorm strategies and provide you with a range of installation options.

Offering complete national coverage, our team of experts are based in Kent and have the capability to operate nationwide including across Europe.

The Cura Energy idea is built on innovative strategies, creative thinking, specialist's skills and decisive results.

PRODUCTS

"We will never just come in, install and then go - that's never been the Cura Energy way and never will be."

ENERGY MANAGEMENT & TARGETING

All energy management initiatives rely on accurate, up-to-date energy consumption information to ensure that decisions relating to your energy plan are based on fact. Energy metering is fundamental to this.

We provide experienced teams who are able to survey, recommend and install the latest metering systems whilst our experienced engineers ensure that the installation provides relevant and accurate data.

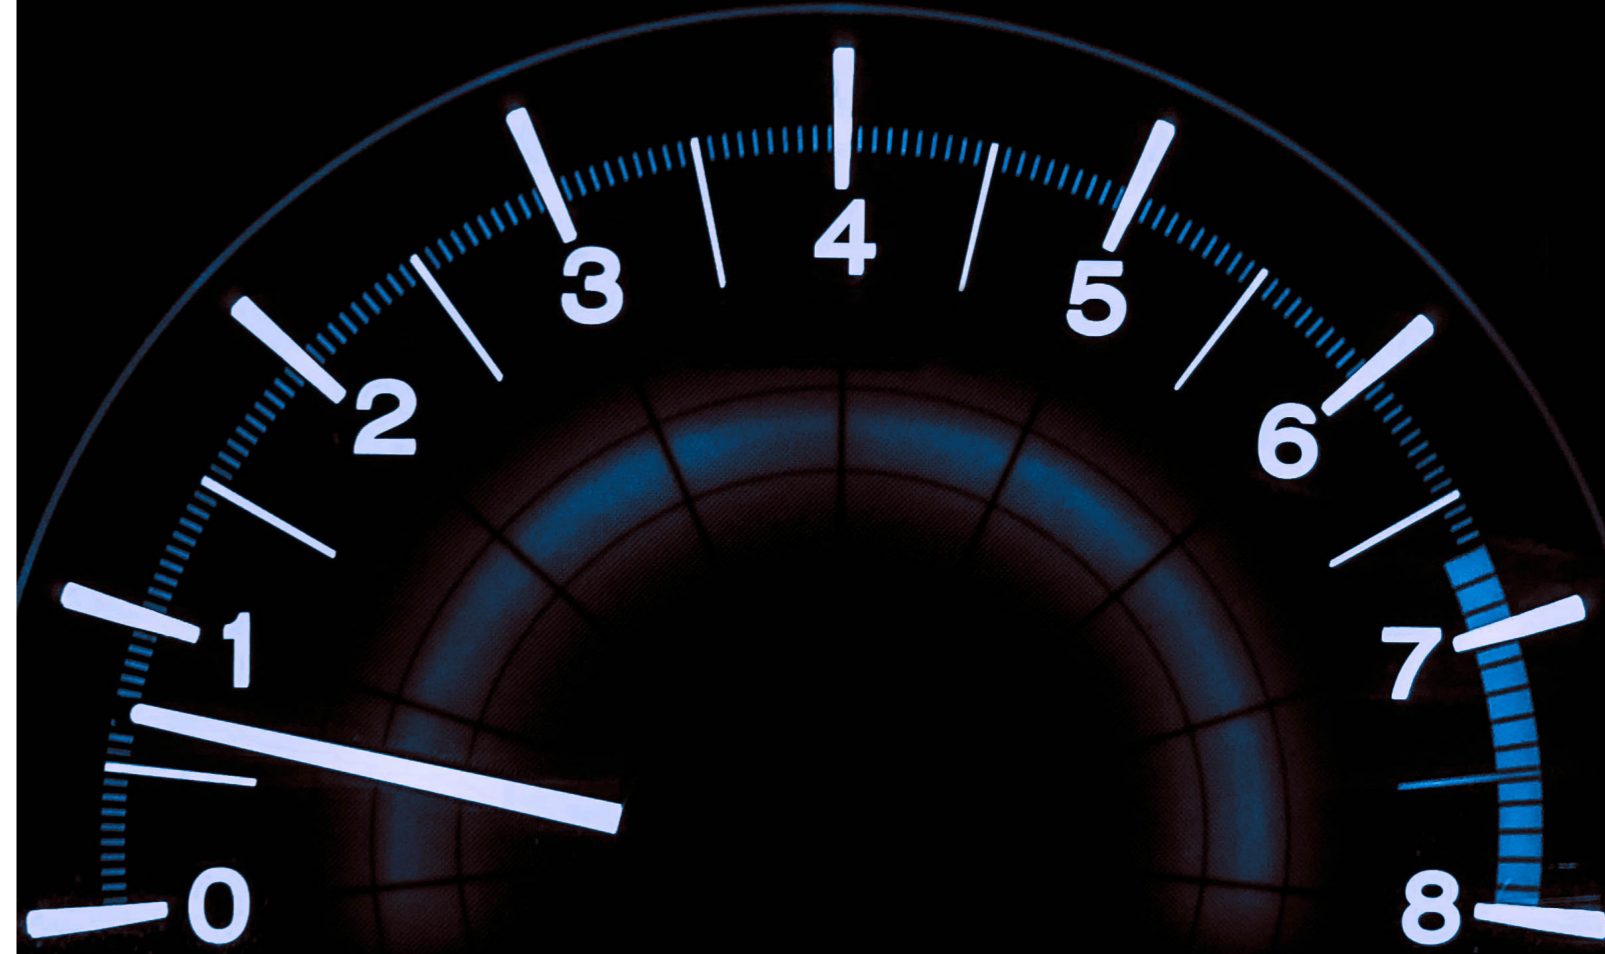

Using a wide range of metering systems, data is displayed directly to fixed screens, tablets, smartphones

or dashboards in a variety of formats to suit the common goal of achieving sustainable energy plans. This can be achieved with a fully managed monitoring system that really delivers.

Once your metering solution has been successfully installed and validated the Cura Stat Room can analyse the data to see where energy is being used and where it is being wasted.

The data gathered is a vital tool to enable measures to be taken that increase your energy efficiency, reduce your costs and improve performance.

Our expertise ranges from multiple-site rollout programmes to smaller bespoke schemes and includes the office, retail and financial sectors. This provides you with the confidence that we can deliver against your requirements.

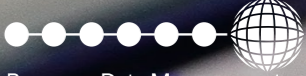

“In order to manage energy usage you need to be able to measure, analyse and control it.”

BUILDING ENERGY MANAGEMENT SYSTEMS

Cura Energy is a leading system integrator providing a wide range of BeMS packages. We are proud to be an approved supplier and installer of the following BeMS system houses, Siemens, Priva, RDM, Trend.

Whether your business is local, national or global, we can help keep your workspace energy efficient through effective design, manufacture, engineering and commissioning, irrespective of project size. This helps you to operate your building

with greater knowledge and understanding.

Our solutions are 100% energy focused and tailored to suit your needs, keeping systems easy to operate, without compromising conditions or the operational performance.

Of course, not all BeMS systems need to be created from scratch. We can improve and refurbish existing ones, integrating them seamlessly and our skilled teams can create a range of energy saving software for new and existing systems.

Our capabilities include dilapidation reports, design, system selection, control panel manufacturing, installation, reactive and planned preventative maintenance.

ENERGY REDUCTION PRODUCTS

We know energy reduction and compliance is a constant challenge as businesses face tougher penalties for not meeting regulatory commitments.

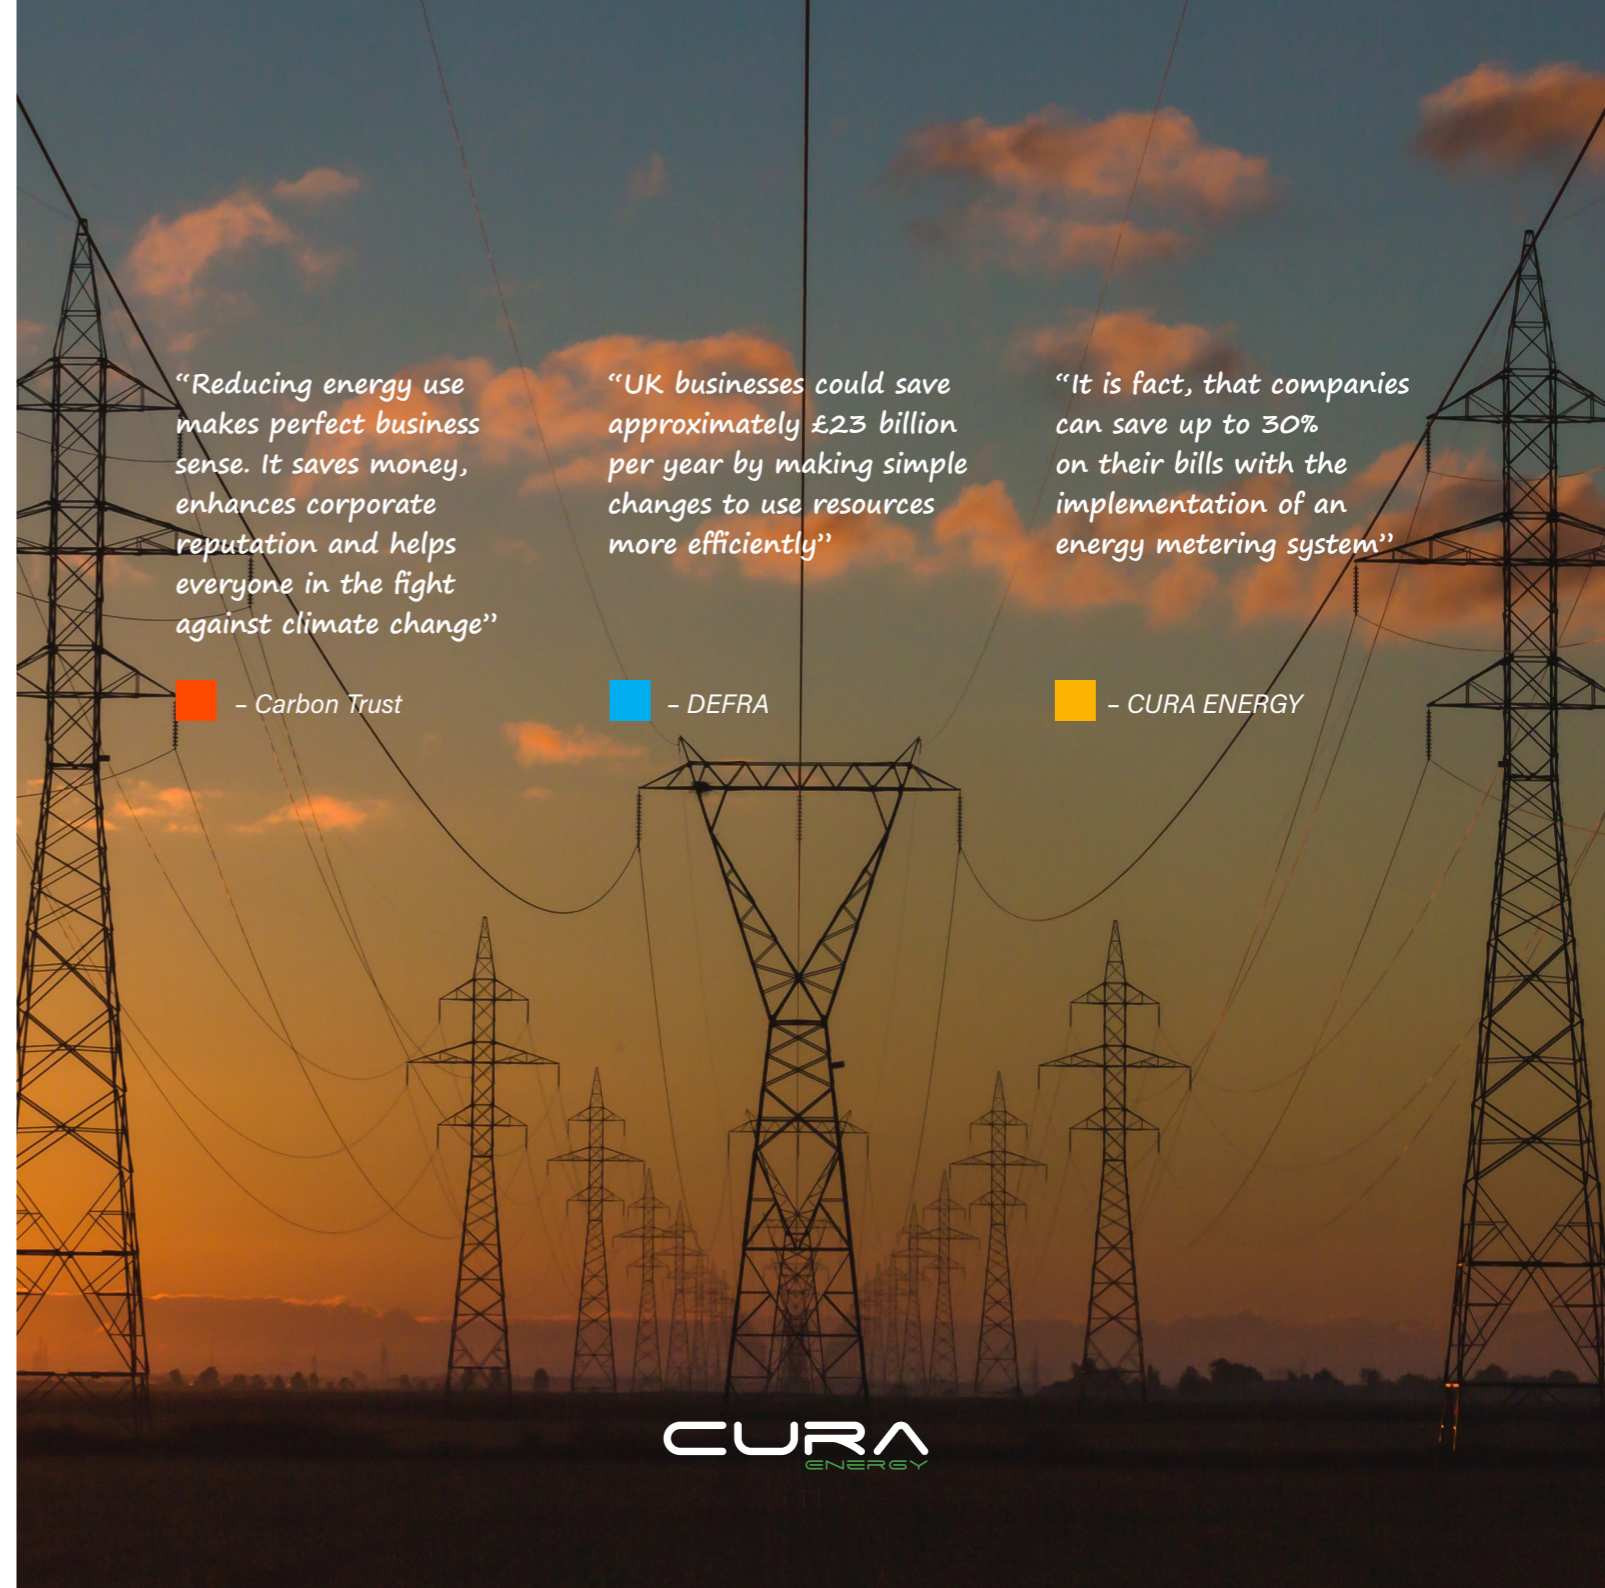

Aligning ourselves with the best energy reduction products available, we can review your installed metering and management systems and advise on what additional actions can further reduce energy consumption.

We have a range of solutions and services to suit with products from lighting and HVAC to renewable technologies.

One of our latest products, developed by Cura Energy is Live eye™ which enables Store Managers, Energy managers and stakeholders to review gas, electricity and water usage live - in real time.

Live eye™ can relay energy readings to you whilst you are on the go to web enabled devices such as smartphones or tablets wherever you may be in the workspace

Contact us to learn more about how our services, technology, products and initiatives can help reduce your projects energy consumption.

“Reducing energy use makes perfect business sense. It saves money, enhances corporate reputation and helps everyone in the fight against climate change”

■ - Carbon Trust

“UK businesses could save approximately £23 billion per year by making simple changes to use resources more efficiently”

■ - DEFRA

“It is fact, that companies can save up to 30% on their bills with the implementation of an energy metering system”

“Our expert team is a mix of fresh thinking talented people who are with you all the way, offering guidance and advice, from concept to completion.”

THE CURA 360 TEAM

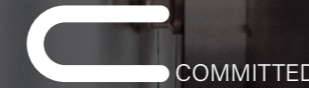

Providing the best solution is all about us understanding your business and its needs. Only then can we provide the best creative and value-driven ideas.

Cura Energy is made up of a team of people with varied skills, which enables us to be involved right from the concept stage, either working within the parameters of your plan or creating one that is tailored to your exact requirements.

We align ourselves with some of the most innovative and inspiring businesses within the energy industry. This means we have knowledge of the very latest products available and can tailor processes and installation programmes to help deliver on agreed targets.

We are not aligned to one manufacturer or service provider, so we are able to act independently and select and install a system that is suited to your needs.

“Our aftercare services ensure that new or existing systems operate as intended and continue to deliver savings”

LOOKING AFTER OUR COMMISSIONS

Energy savings can quickly be lost through lack of maintenance. Our structured aftercare service ensures that new or existing systems operate as intended and continue to deliver savings. Communication is key to this, especially when multiple sites and installations are involved.

At Cura Energy, we use the latest web-enabled technology to monitor what your systems are doing. This provides valuable information to help maintain your savings with any issues quickly resolved either remotely or on-site by our engineers or by your own in-house team.

We have local knowledge with national reach and can react to issues quickly.

Cura Energy offer different service level packages for the on-going maintenance of your metering, building management systems and energy reduction products.

SO WHY CHOOSE US?

We commit to provide you with innovative strategies, specialist skills and a decisive result.

We have a proven track record of delivering consistent, high quality services to the UK's biggest retailers.

Our people ensure your needs are fully understood and targets are achieved to deliver the right result, every time.

It's easy to take the first step to a more energy efficient future and the savings it can bring.
If you would like to discuss your requirements, simply call or email us.
