PROVEN DURABILITY AND LONG LIFE

Our technical furniture is manufactured in Great Britain largely from tough 1.5mm thick cold rolled steel with typical bench weight loadings of 200 kgs. Cabinets, shelving and toolboards are manufactured mainly from zintec steel and we finish everything with a tough powder coating in your own choice of colour. We fit high quality locks, slides and hinges. We offer a wide variety of worktops including laminate, stainless steel, aluminium and timber. For specialist applications we can supply ESD, chemical and oil resistant surfaces. PAF have built high quality technical furniture for blue chip companies since 1972. For details about our other products visit www.pafsystems.com

COMMITMENT

PAF Systems give the same high level of service and attention whether you are a multinational with big plans or a private enthusiast wanting the best workshop in the neighbourhood. All the people at PAF aim to exceed your expectations and we are determined to operate a valuable and well respected business based on innovation, honesty and integrity. We have learnt a thing or two about technical furniture over the past forty years, we love a challenge and welcome your enquiries for standard and custom built applications.
