

Case Study

Furness College, Barrow-in-Furness

Complete Demolition Ltd were appointed as the demolition contractor for the asbestos removal, full soft-strip and demolition works at Furness College, Barrow-in-Furness on behalf of Eric Wright Construction Ltd.

The project called for the demolition of a number of buildings which included the Construction & Engineering Workshops, Existing Nursery and associated teaching/classroom facilities. This project was carried out in a pre-planned and agreed sequence to ensure that this live college had no disruption whilst works were carried out.

The demolition works were undertaken by the use of traditional demolition excavators equipped with specialist attachments. The foundations were also removed and the clean hard core was crushed onsite to be incorporated into the follow-on development works. Prior to the demolition works the asbestos was removed under controlled conditions before a full soft-strip was undertaken.
