Glazing Options

STAINED UNITS

All stained units are individually hand-made. If you do not see the design you would like in this brochure we would be happy to discuss your requirements.

SANDBLAST/ETCHED GLASS

This handcrafted glass is designed to give a traditional appearance. Though generally obscure, it does leave various areas clear.

BEVELLED GLASS

4mm shaped and polished glass facets, handcrafted and bonded to the glass with an optically clear resin then overlaid with lead.

RESIN BEVEL

Resin bevels should not be confused with traditional bevels. Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable.

IMPORTANT NOTICE

PCV-u Infill Door Panels as illustrated in this brochure may not appear exactly the same in every case when fitted. This brochure has been compiled using an average opening width for demonstration only.

The area of panel, which is visible around the raised and fielded sections, is determined by the actual brickwork opening on your particular property.

Wider openings will produce more of a border than a narrow aperture – likewise a narrow opening will have less visible border.

Variations in colour and patterns do occur to those illustrated due to manufacturing and printing limitations. The company reserves the right to change the product range without prior notice

Please return this brochure to showroom when finished in the interests of saving a tree. Alternatively, please pass to a friend who may find this leaflet interesting. Thanks!
