Extracting Data for your Multi-Academy Trust

Data Call provides you with the data your Trust needs, to monitor pupil performance across all Academies

Are you part of a Multi-Academy Trust?

Do you need data from mulitple schools' MISs, but don't have the time or resource to do so?

Are you relying on .csv uploads or spreadsheets?

Data Call provides you with your schools' data (**Attendance, Assessments, Behaviour, Medical information, SEN, Pupil Premium, Timetables, Events**) for you to gain a Trust-level view of pupil performance. It does this by using a series of dashboards which monitor the whole Trust/Cluster as well as individual schools and Academies.

The data is transferred, and the dashboards are populated automatically from the schools' MIS's without any need for manual input.
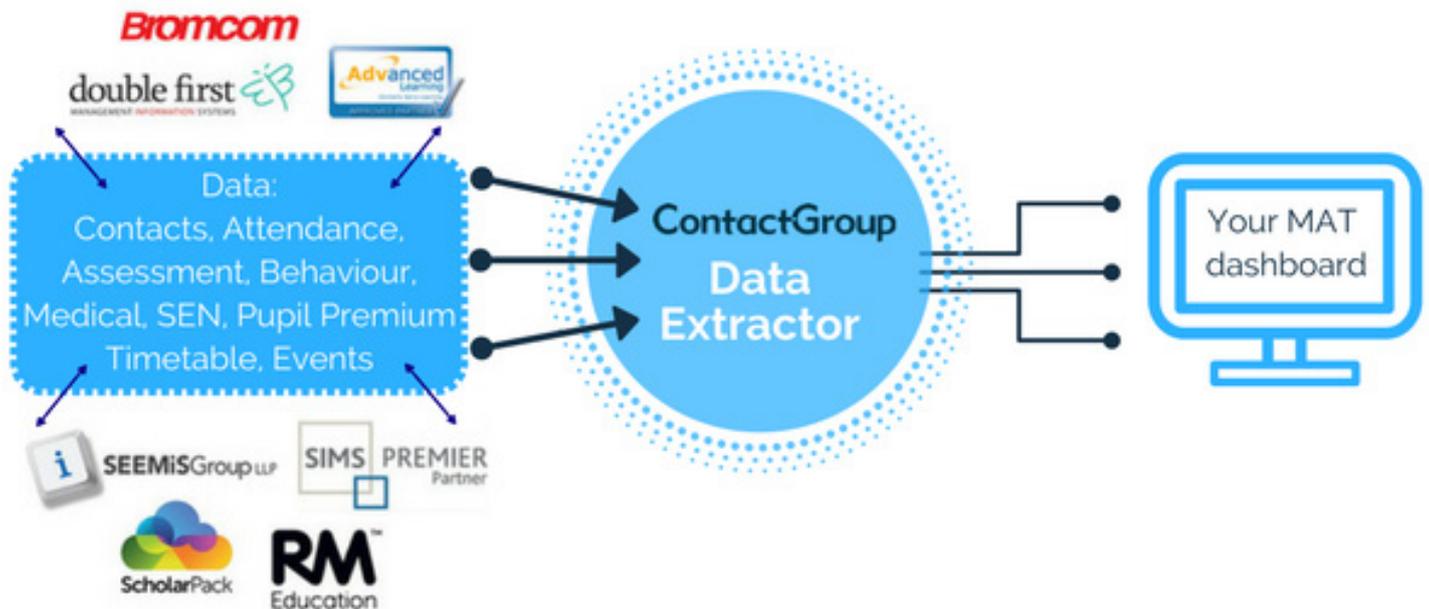

Why choose Contact Group?

We have 17 years' experience of working with Schools' MIS's so we know what we're talking about. Data Call is a streamlined process in which you give us your data requirements, and once a specification is agreed, we will provide an initial sample 'output' for you to approve, then the full data extraction is delivered, at a frequency and in a format that suits you.

To find out more about this product: call 03333 13 14 15   email info@the-contactgroup.com

How Data Call works:

What you can expect from Data Call:

Safety and Security
All extractions from Data Call are encrypted on whichever server Data Call is installed, and are transferred via an SSL secure connection. You can rest assured your data is secure.

Automatic Data Collection
Once your data specification is established, you can sit back and let Data Call do all the work. No manual intervention is required. Your data will be delivered to you, in a format you require, as and when you require it.

Flexibility
Data Call collects and delivers data at intervals pre-determined by you. Whether this is in real time, daily, weekly, fortnightly, monthly or termly; you can have the data either as a full data set, or simply presented as changes from the previous delivery. (If your extraction needs change over time, we can adjust this within your subscription)

Integration with major MIS's
We integrate with the majority of schools MIS's. (See diagram above). Let us know if there is a specific MIS you need data from, and we will look into the possibility of integrating with it.
