A SUPERIOR RANGE OF AWNINGS PERFECT FOR YOUR HOME

Make the most of your outside space with one of our striking awnings. A valuable addition to your home, whatever the weather. They keep you cool in the summer, protecting you from harmful UV rays. But they can also be a place for you to shelter from showers.

We have selected the very best awnings on the market for our customers. Their superior specification means they are truly built to last. With cutting edge design features and the very latest technology, they are designed specifically for the UK market, taking into account our climate and building styles.

WHY CHOOSE OUR AWNINGS?

Superior quality: All our awnings use a carefully selected mix of extruded aluminium and stainless steel components to hold everything together and ensure the fabric stays crisp and taut. They are strong and resilient, built to withstand everything the British weather can throw at them. With colour coordinated screws and concealed fixing brackets, the attention to detail is second-to-none.

High tech materials: An invisible protective barrier is impregnated around each individual fibre to provide protection from the elements. This barrier prevents dirt and water clinging to the surface and stops the growth of microorganisms so your awning remains in a clean, pristine condition.

Great selection of fabric: We use the finest solution-dyed colourfast fabrics. They are woven using the strongest warp and weft construction and air jet looms to guarantee a hi-tensile weave. There is a wide array of pastel, bold and neutral colours to choose from.

Low maintenance: Our awnings are fully retractable. You can enjoy sun when you want it, and shade or shelter when you need it. The casing performs another important function. It protects the operating mechanism, and the fabric when not in use, thereby minimising maintenance.

Protection you can trust: Our fabrics are rigorously tested and certified under the UV standard 801, filtering a minimum of 95% of the sun's damaging UV rays. This offers a UV protection factor up to 80+, which is more than four times greater than the Cancer Research UK Sunsmart campaign recommendation. This makes them particularly good for protecting children from the damaging effects of the sun. All our awnings meet stringent European quality and safety standards.

Our experienced team will measure your space for your new awning and will fit it for you to ensure the very best finish.

CUBA AWNING

The Cuba awning is our top of the range awning. It offers a unique design and slim measurements that make it an unbeatable choice.

Available in a wide array of premium fabrics, each with our invisible clean-effect coating, the awning retracts into a very neat hideaway casing when not in use. The rounded edges to the casing makes for a classic, elegant look, protecting the fabric and mechanism from the elements when retracted.

The Cuba awning uses multiple brackets and fixing points for sound installation to any structure. With a large span of up to 7m as a single unit, its powerful

twin-spring loaded tensioned folding arms ensure optimum fabric tension in every position, even at this size.

The built in tubular motor means your awning is operated from a remote control or wire-free wall switch. Light and wind sensors allow for automatic functioning of the awning, responding to set conditions to protect you and your awning.

With optional dimmable LED lighting mounted under the casing, or infra-red ultra-low glare heaters available, you can enjoy your Cuba awning all year round.

SPECIFICATION

Awning Span	Up to 7m in a single unit; 14m as a coupled unit
Projection	Up to 3.75m
Wind Speeds	Able to withstand wind speeds up to Beaufort 5
Operation	Motorised, controlled via remote control or wall switch. Sensor operation available. Manual operation available for smaller awnings.
Optional Extras	Dimmable LED lighting; infra-red ultra-low glare heaters
Guarantee	5 year parts-only guarantee, including hardware, fabric (excluding valance), motorisation and control system

TORTOLA AWNING

The Tortola awning is our bestseller, offering great looks along with exceptional value for money.

The streamline cylindrical shape of the casing makes it ideal for use where mounting space is limited. Fitted via heavy duty extruded aluminium blocks at each end, it can be fixed to the façade, or top fixed to an overhang, such as a soffit.

The twin-spring tensioned folding arms ensure the fabric is kept taut in every position. The fully adjustable pitch can be angled from 0 to 45 degrees, ensuring optimum shade. The cassette casing neatly hides the awning when retracted, protecting the mechanism and fabric from the elements.

Manual operation through a detachable crank handle comes as standard. Motorised operation, via remote control or wire-free wall switch, is also available.

There is a large selection of plain, block and striped fabrics available, all woven using our quality solution-dyed acrylic yarns complete with our easy clean coating.

SPECIFICATION

Awning Span	Up to 5m
Projection	Between 1.5m and 3m
Operation	Manual operation through crank handle as standard
Optional Extras	Motorised operation via remote control or wire-free wall switch
Guarantee	5 year parts-only guarantee, including hardware, fabric (excluding valance), motorisation and control system

JAMAICAN WINDOW CANOPY

Our traditional Jamaican window canopy effectively keeps your room cool in summer, providing much-needed shade.

Built from a robust, lightweight corrosion resistant aluminium framework, it is suitable for both residential and commercial uses. Operation is simple, via a one pull cord and pulley system. Alternatively, a remote control can be fitted for effortless control.

Our Jamaican canopies come in the same fantastic range of solution-dyed, easy-clean acrylic fabrics as our Tortola awning. The valance can be finished with a classic loose wave edge, or you could opt for a straight edge for a more contemporary look.

SPECIFICATION

Awning Span	Up to 6m
Projection	Up to 1.3m
Operation	One pull cord and pulley system
Optional Extras	Remote control operation
Guarantee	1 year parts-only guarantee
