V-R100

A retail business support terminal
built on the Android™ platform

ALL IN ONE

New generation business terminal with various functions

Sales management

Reservation management

Customer management

V-R100 has all the necessary functions in one box.
Equipped with easy to operate 10.4 inch LCD touch panel, pop-up customer display and receipt printer. It can be used out of the box without difficult settings.
V-R100 can connect to the internet which makes it free from using a separate PC.

Easy operation sales management system

Casio has a long history of supplying cash register products. V-R100 can select from two types of sales management application. One is the traditional type for those who are familiar with the cash register operation. The other is a new operation type for inexperienced users. Whichever application is chosen, sales data and stock data can be easily managed and reported.

▲New simple type application

▲Standard type application

Very economical and eco-friendly low power consumption

20W during operation

4W stand-by

V-R100 does not use a motor driven disk drive and fans so the power consumption is much less than general PC based terminal (20W during operation / 4W when stand-by).

Also the maintenance cost can be reduced because V-R100 does not use fragile parts such as fan and disk drive.

Country :
UK

Type of industry:
Charity shop

Customer voice
We are all impressed with V-R100 which took only one hour to learn how to operate.

Country :
UK

Type of industry:
Fashion retail store
