MURATA MACHINERY USA, INC.

Turning Centers for Military Applications

Few industries demand the exacting precision and rugged durability as modern military applications and Muratec's turning machines deliver. Our Charlotte, NC facility manufactures production-proven turning machines equipped with extremely reliable machine tools that produce the precise tolerances required in 24/7 military environments. Our advanced, flexible automation gives you the ability to change over to a variety of capabilities and can be used in manual mode to turn one- or two-piece jobs.

MW Series MW200, MW400

Muratec's MW Series of twin-spindle CNC lathes is engineered to provide our customers in the military sector with the latest high-quality, next-generation technology in twin-spindle turning machines for high accuracy, high productivity and customized cell automation requirements.

Reliability by Design

Accuracy and Custom Automation for Military Applications

Murata Machinery USA customizes each machine with post-process gages, infeed and outfeed systems, shuttle, transfers and orientation stations that are ideal for the precision turning demanded by the military industry.

Murata's Gaging and Automation Systems Group will vertically integrate your new or used systems with gages engineered, constructed and tested locally at Murata's Charlotte, NC, facility, with software developed by Murata. This turnkey integration ensures accuracy of close tolerances with no loss in production and full feedback for offline collection while maximizing your savings. Gages are also available in your choice of gantry-mounted, floor-mounted, or dual-station floor-mounted post-process configurations, all offering combination feature measurements, offset feedback, optional data collection, and gantry loading and unloading capabilities.

Located in Charlotte, NC, Murata Machinery USA, Inc. is a subsidiary of Murata Machinery Ltd. of Kyoto, Japan. With *Reliability By Design* built into every machine, Murata produces durable turning machines engineered and constructed using the legendary Warner Swasey platform.
