

Broadband Visual Communications Virtual Video Meeting Room

Virtual Video Meeting Room

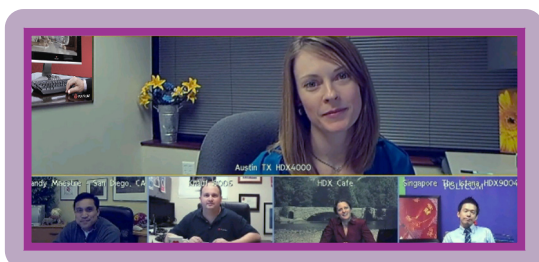

Our Cloud-based Virtual Meeting Room is ideal for Video Conferencing and Telepresence users who need to arrange meetings for three or more, without the additional expensive infrastructure costs.

Broadband Visual Communications can offer a service that enables you to enjoy simple multi-point conferencing without the need for any additional hardware or software.

Our meeting rooms are designed with convenience and flexibility in mind and can be purchased on either an ad-hoc or subscription basis with prices tailored to suit the number of participants required. This service can also be used to bridge users of different connections and protocols such as - HD, SD, IP, ISDN and Audio Only Participants.

Access to your virtual meeting room can be provided instantly via a dedicated ISDN number / IP address, and can be password protected and encrypted to ensure maximum security for your conference.

This service is ideal for organisations that want to manage and schedule their own multi-site conferences.

Contact us today to see how the Virtual Video Meeting Room can help you connect all your video and audio users together.

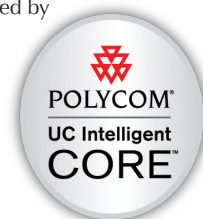

Key Benefits:

- IP, ISDN and Audio Participants
- 27 different video layouts
- High Definition (HD) & Standard Definition (SD)
- Up to 16 sites on screen at the same time
