

CENTRAL DISTRIBUTION PLATFORM

What it is

rezNG is a Central Reservation & Distribution Platform that enables hoteliers to manage availability and rates.

rezNG updates in real-time any OTA, its IBE (bookNG) and all GDS's. Incoming bookings are seamlessly forwarded from rezNG to the PMS.

What does it do and how

- Enables management of price & availability on a channel-by-channel basis
- Offers full control over inventory, availability and price point selection
- Delivers incoming bookings in real-time to the PMS
- Supports promotional offers, packaged rate plans and confidential contracted rate plans
- Management of rate & availability by special event
- Booking restrictions available for each product combination without increasing administrative overhead
- Dynamic room upselling (USP) - coming soon
- Automated import of tour operator bookings (USP) - optional (as a plug-in)
- Integrated price recommendation (USP) - optional
- 2 Way interfaces with PMS systems for real-time exchange of reservations and inventory: Fidelio Suite 8, Opera, Protel, Scigno
- No hardware and software requirements, rezNG operates in an internet-based environment and can be accessed from anywhere.

RECEIVE UPDATES FROM REZNG ON PRICE AND AVAILABILITY:

03 **bookNG** - IBE (web-mobile-facebook)
metaNG - Metasearch
phoneNG - Call Center
GDS & OTA*

DATA INPUT FROM:
