

SUMMERHOUSES AND RHS GARDEN BUILDINGS
The perfect hideaway for your garden

CREATING A MASTERPIECE

Established in 1920, Scotts of Thrapston has built an enviable reputation for high quality, specialist timber products and is one of the country's leading suppliers of gazebos and summerhouses.

Scotts is delighted to be in partnership with The Royal Horticultural Society, known the globe over for its world class work in gardening and horticulture. Sharing more than 300 years of combined experience between them it is an obvious partnership for the RHS to work with Scotts of Thrapston and produce an inspired and practical range of RHS Garden Buildings.

A familiar sight at The RHS Chelsea and Hampton Court Flower Shows, Scotts summerhouses are available in a stylish choice of colours, shapes and varying sizes. With their enduring appeal and flexibility of design, you can create a masterpiece in your garden to be envied by all around.

Scotts summerhouses have been created to suit most requirements and the different models, including the RHS Garden Buildings, are featured within this brochure. Most of the Scotts summerhouses can be designed to be under 2.5 metres high to comply with planning regulations. Alternatively, if you desire an exclusive garden building, customised to suit an unusual shape in the garden or to your personal design, then Scotts produces bespoke summerhouses to suit.

The range of sumptuous Scotts summerhouses and RHS Garden Buildings will enhance any garden setting, providing the perfect hideaway.

SIT BACK AND ENJOY

Fulfil your dream by choosing a Scotts summerhouse ~ the perfect quintessentially English hideaway for your garden. Whether you like to entertain friends, escape with a morning paper and coffee or just enjoy sitting in your garden, we have a summerhouse to suit your dreams.

Over recent years, we have learnt how to enjoy our gardens more, so naturally we want to spend extra time in them. And what better way than drinking and dining in a luxurious summerhouse, whatever the weather. Scotts has recognised the need for greater flexibility as lifestyles, tastes and garden settings vary greatly between individuals. So, you can personalise your summerhouse by choosing the building and individual features to suit you, your hobbies and your garden.

Scotts gazebos and summerhouses provide the ideal excuse to linger longer in the garden throughout the year.

STEP BY STEP

Simply follow through the step by step approach below to identify the different choices and to select your preferred features. Choose from building designs, roof options, colour finishes and fabric styles as well as a variety of optional extras. Then, by following through the brochure you can easily identify what appeals to you and what features are necessary to create your dream summerhouse.

- Choose your building design from the five options pictured here
- Choose a colour finish to complement or contrast with your garden
- Choose your preferred roof material. If choosing a cedar shingle roof, please specify if you need the modified version, to keep the building height under 2.5 metres
- Choose whether you require integral seating and upholstery
- Where seating and upholstery are chosen, select a fabric design
- Finally, choose any optional extras to personalise your building
- Alternatively, there are further building designs including the Polebrook and the RHS Garden Buildings which have their own features and finishing touches (see pages 9 and 18 -19)

"We love the gazebo. We have never enjoyed our garden so much ~ even in the late Autumn and early Spring. Thank You."

Mrs S | Twickenham

THE BALMORAL

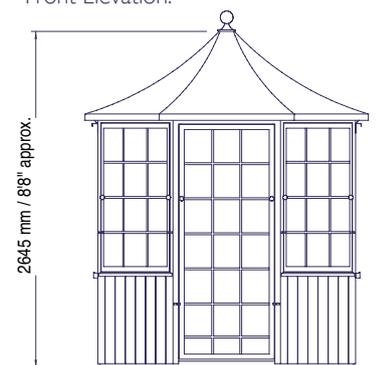

Traditional, classic styling and an exclusive shutter system, offers the perfect retreat from the pressures of modern life. The Balmoral incorporates the unique and admired Scotts door and window shutter system. In hotter weather, when the gazebo is in use, the shutters can be completely removed and stored on special brackets provided.

At the end of the day, the shutters are simply replaced to provide protection from the elements. The shatterproof acrylic glazing, within the shutters, provides a lightweight alternative to glass and can easily be removed for cleaning.

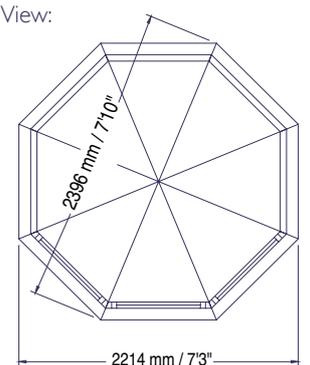

The Balmoral gazebo has a slate effect glass fibre roof as standard although a cedar shingle or copper roof option are available at an additional cost.

Freestanding seating, with storage, and upholstery can be added to the Balmoral, as with all of the other buildings, and the choice of optional extras are similarly available.

"We are absolutely delighted with our new summerhouse ~ it really is lovely and has blended into its location perfectly!"

Mrs A | Cardiff

THE BALTIMORE

Relax and enjoy your garden, all year long, in the comfort of this ultimate hideaway.

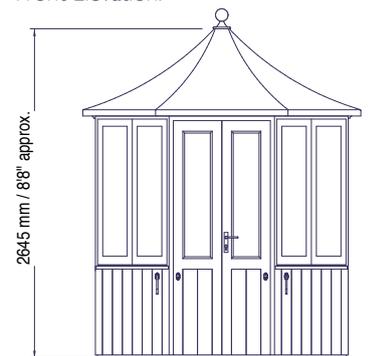

The Baltimore summerhouse is the ideal place to take a tea break from gardening, to listen to the cricket in peace or for summer get-togethers that continue late into the evening.

The Baltimore is an extremely popular octagonal summerhouse that suits most gardens and comes as standard with a glass fibre roof. The Baltimore includes a pair of lockable doors and casement style windows, supplied with laminated glass and brass ironmongery.

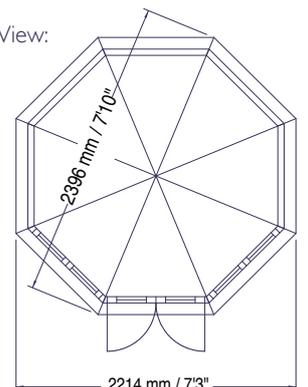

The doors and windows can be hooked open during a warm day yet can easily be closed up to provide the ideal garden hideaway when the temperature gets cooler.

In addition, the Baltimore is supplied, as standard, with three attractive diamond leaded windows on the rear panels.

"We have really customised our little room in our garden. We have added fairy lights so that it lights up at night and a heater for the cooler days. We use it all the time."

Mr C | Milton Keynes

THE BURGHELEY

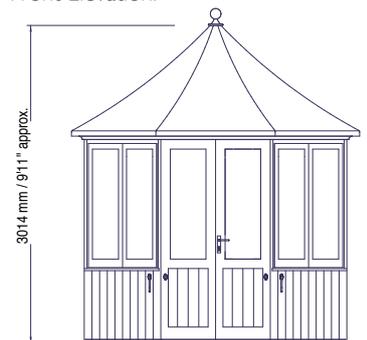

Live an outdoor lifestyle, with this attractive and spacious summerhouse, which is perfect for entertaining throughout the year.

The Burghley is a larger octagonal summerhouse perfect for alfresco dining, for use as a studio or playroom or simply as an outdoor room to entertain family and friends. The Burghley has casement windows and lockable doors that can be opened up in the warmer weather yet provide invaluable shelter when it is cooler.

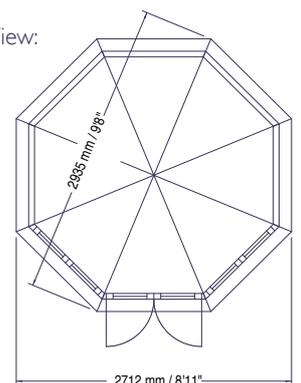

This summerhouse has a lead effect glass fibre roof, as standard, plus three attractive diamond leaded windows on the rear panels.

Freestanding seating with upholstery can be added to the Burghley, as with all of the other buildings, and the choice of optional extras are similarly available.

“Just to say a big thank you for the very efficient way you carried out your business. The Newhaven Corner summerhouse has been much admired by all.”

Mrs F | Cambridge

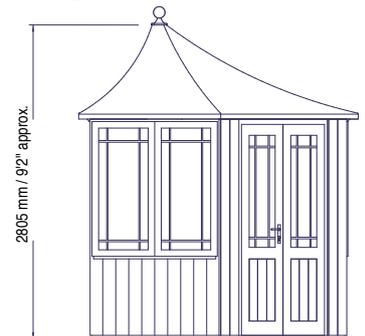

THE NEWHAVEN CORNER SUMMERHOUSE

Capture the magic of the garden with this summerhouse, designed to neatly fit into a corner site.

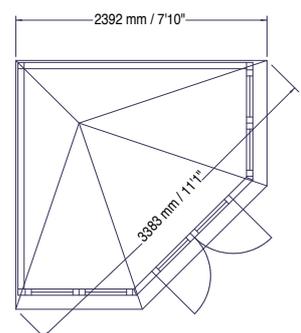

The Newhaven has been cleverly designed to make the most of a corner setting and to fit snugly into a confined location. It is supplied with lockable doors and casement windows with laminated glass and removable margin light detail. The doors and windows are all fitted with brass ironmongery, as standard. The Newhaven opens up to create a spacious and airy summerhouse offering the ideal view across the whole garden.

The Newhaven Corner Summerhouse is also offered with a cedar shingle roof option, with stunning copper finial, to naturally blend in any forgotten corner.

“Thank you for our Garden Room. After the hot summer we have had we have spent endless hours in it - after cooling off in the swimming pool. It makes a wonderful changing room.”

Mrs W | Somerset

THE SUN RAY GARDEN ROOM

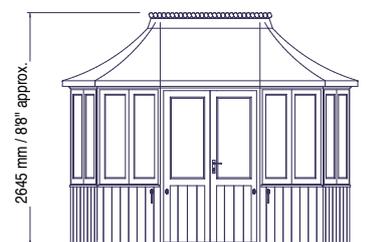

Friends and family are welcome in this larger, stylish summerhouse, making it ideal for entertaining all year round in the midst of your garden.

The Sun Ray Garden Room has casement windows and lockable doors that open up on a hot summer's day or conveniently shut up in the cooler weather. The doors and windows are fitted with brass ironmongery, contributing to the traditional look. With the integral seating option, there is space for up to eight people to enjoy this wonderful summerhouse in comfort.

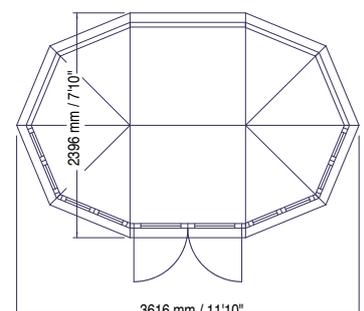

The Sun Ray has a slate effect glass fibre roof as standard with a cedar shingle roof option if preferred.

Classic in design, the Sun Ray Garden Room has proved incredibly popular as a hobby room whether for painting, yoga or as a home gym.

“What an excellent team you have. The summerhouse looks fantastic and will be a source of great pleasure.”

Mrs B | Cheltenham

THE POLEBROOK

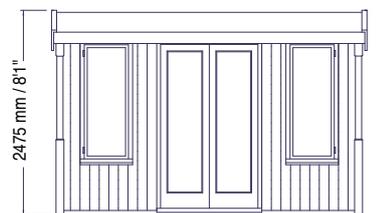

A home office, an art or music studio, a hobbies room or simply a great place for entertaining or watching the garden grow, the Polebrook provides a large, open and versatile space for a host of uses.

Designed for all seasons, the Polebrook's sturdy construction includes a felt and felt tile roof and a verandah style overhang to keep the weather at bay. Internally, double glazed windows and doors, a tongue and groove effect lining throughout and optional insulation will keep everything snug and warm in cooler conditions.

Finished in a natural cladding of pressure impregnated redwood, or to an optional stain or paint colour of your choice, the Polebrook is a truly adaptable building for all tastes and purposes. As standard, the lined interior, doors and windows are supplied in a buttermilk paint finish whilst the floor is clear varnished. With its simple lines and practical appeal, this is a cost effective alternative to an extension.

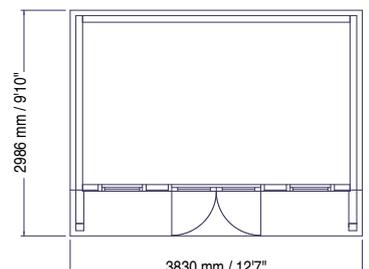

This timeless garden retreat complies with current planning regulations as it sits under 2.5 metres in height.

Front Elevation:

POLEBROOK

Plan View:

This is not a base plan

COLOUR FINISHES

Scotts summerhouses are all supplied in a natural finish of pressure impregnated European Redwood.

If you prefer a stained or painted summerhouse, Scotts offers a range of appealing colour finishes enabling you to customise your summerhouse to blend with your garden. The nine paint and two stain colour options are shown above.

If a paint finish is selected then all of the nail holes are filled before the timber is knotted and primed. The microporous top coat, in your chosen colour, is applied in a spray finish from the Teknos Industrial range offering excellent resistance to the elements. In most cases, this gives you three to five years of maintenance free life, depending on the location of your building.

If a stained finish is chosen, two coats of "Valtti Color" traditional semi-transparent matt wood finish are applied. The stain penetrates and enhances the natural beauty of the wood whilst offering a highly effective protection. Depending upon the exposure and location of the summerhouse, two coats of this stain will, generally, protect the building for three to five years before re-staining is necessary.

A tin of touch up stain or paint is supplied with all stained or painted buildings, for touching up as necessary. Paint or stain is available direct from Scotts suppliers for maintaining your building in future years.

Colours may vary due to the printing process, samples are available on request.

ROOF MATERIALS

All of the Scotts octagonal buildings, the Newhaven corner summerhouse, the Sun Ray Garden Room and the RHS Centenary Arbour are supplied as standard with a moulded, composite glass fibre roof giving a maintenance free life of twenty to thirty years. These roofs provide ultimate protection against UV rays and realistically simulate slate tiles or lead. The style of the roof varies depending on the model chosen.

The Polebrook Summerhouse is only supplied with a slate effect felt tile roof to the front elevation and a light grey felt to the rear. Due to their high strength, both the felt and felt tiles provide a long life expectancy, far in excess of standard fibre based roofing felts.

Alternatively, for a more natural effect, a treated cedar shingle roof can be selected, for most summerhouse models, to blend in with any garden. The RHS Centenary Summerhouse has a cedar shingle roof as standard. The cedar roof is supplied complete with a striking genuine copper finial for all models apart from the Sun Ray Garden Room. A timber roof structure is hand made in Thrapston, from stress graded timber, and a breathable underlay is included, to ensure a watertight finish. Scotts fits the highest quality, number 1 grade, Western Red cedar shingles, to give a twenty to thirty year life expectancy with minimal maintenance.

All of the Scotts octagonal buildings, the Newhaven corner summerhouse and the Sun Ray Garden Room can be supplied with a modified cedar shingle roof that will keep the height of the building under 2.5 metres to comply with current planning regulations. The RHS Centenary Arbour and the Polebrook are under 2.5 metres in height, as standard.

To add interest and character exclusively to the Balmoral and Baltimore summerhouses, a one-piece natural copper roof is also available. This roof will mature and achieve a warm lustre as the years pass.

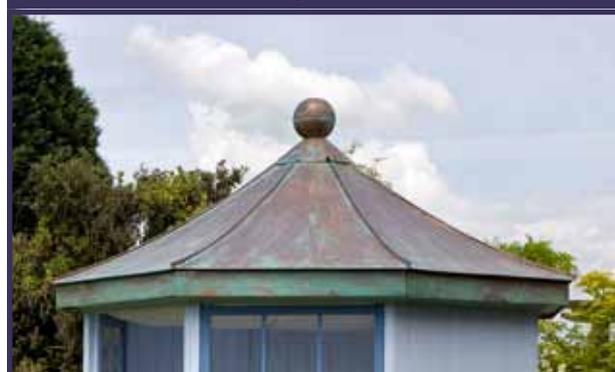

A plain cream fabric roof lining is supplied, as standard, for all roof options on the Scotts range of summerhouses (excluding the Polebrook). The RHS Centenary Summerhouse has a roof lining in a shade to complement the internal paint colour.

Modified Cedar Shingle

OPTIONAL EXTRAS

The main six Scotts buildings, as shown on pages 4 - 9, can be enhanced with a variety of optional accessories that provide a fun element as well as personalising your summerhouse to suit your needs. No other manufacturer provides such attention to detail and creativity to help you get the most from your garden building. You can choose from the following range of innovative extras, dependent on your chosen building design.

ROTATING BASE

The rotating base accessory is an ingenious mechanism popularised by the Victorians and much favoured by George Bernard Shaw. It allows you to simply turn your summerhouse to face the sun or even to change the view you have of your garden. The rotating base, as shown, is easily fitted to the Balmoral, Baltimore or Burghley octagonal buildings and, when installed, is always hidden by a timber skirting to match your chosen colour finish.

PADDED LOUNGER INSERT

For a quick and easy bed conversion within your Balmoral, Baltimore or Burghley, Scotts has the ideal solution. Where seating and upholstery are chosen, a slatted timber insert with matching fabric cushions allows for an instant bed conversion. The lounge insert can be ordered with a new building or can be purchased separately, at a later date, if required.

SHELF FEATURE

Scotts' exclusively designed storage feature, with diamond leaded window, is available as an optional extra within the back panel(s). With the ever increasing need for space, these imaginative storage features not only look attractive from the exterior of the building but internally they allow for drinks, glasses, books and even a radio to be within easy reach. They can easily be incorporated into any of the Scotts summerhouses, with the exception of the Polebrook, adding an attractive and functional finishing touch.

Rotating Base

Rotating Base Hidden by Skirting

Padded Lounge Insert in Pomegranate

Shelf Feature External

Shelf Feature Internal

OPTIONAL EXTRAS

LEADED GLASS

A Georgian effect, decorative leaded glass can be specified within a Scotts summerhouse instead of the standard plain glass. This traditional style of leaded glass can be chosen to blend in with period properties or just as a decorative finishing touch.

TONGUE AND GROOVE EFFECT LINING

All summerhouses (except the Balmoral) can be internally lined, to eaves height, with a tongue and groove effect lining, in an OffWhite paint colour only. This lining adds the perfect finishing touch to any building. If desired, insulation can be supplied and fitted at an additional cost. The Polebrook summerhouse is lined, as standard.

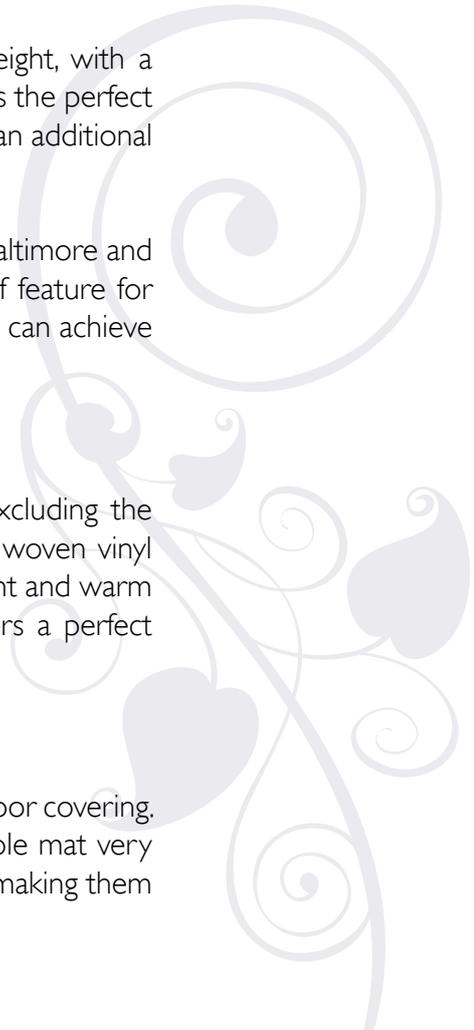

With the lining option, the diamond leaded windows in the rear panels of the Baltimore and Burghley summerhouses will not be available. Although, if you choose the shelf feature for your summerhouse this comes complete with diamond leaded windows so you can achieve a similar effect.

FLOOR COVERING

Scotts offers a durable flooring option within its range of summerhouses (excluding the Polebrook), which provides a practical and tasteful floor covering. This unique woven vinyl flooring gives you the natural feel and texture of sisal and seagrass, whilst pleasant and warm underfoot. And, as this floor covering is waterproof and easy to clean it offers a perfect solution for any summerhouse.

VINYL MAT

Scotts is now offering a versatile and practical mat to match the material of the floor covering. The binding looks like cotton but is made from polypropylene making the whole mat very practical. These mats are waterproof, slip resistant, UV stable and easy to clean, making them ideal for any summerhouse. The mat measures 110cm x 60cm.

Leaded Glass

Tongue and Groove Effect Lining

Floor Covering

FABRIC STYLES AND SEATING

INTERIOR SEATING AND UPHOLSTERY

All of the Scotts octagonal buildings, the Newhaven corner summerhouse and the Sun Ray Garden Room can be supplied with modular wooden seating, with storage, and a sumptuous upholstery set. The upholstery includes comfortable padded seating and loose backrest cushions adding a touch of luxury to your garden building. As standard, Scotts supplies the summerhouse without seating or upholstery although a plain cream fabric roof lining will always be supplied.

MODULAR SEATING

The modern, sectional style of seating is freestanding so that it can easily be moved and placed in different positions as required. This seating design offers great flexibility as well as providing a self contained storage space within each section, acting as a convenient hideaway for various garden accessories.

The seating is painted to match the chosen paint finish for your summerhouse so that it blends in perfectly. Alternatively, if you choose a pressure impregnated finish for your summerhouse, or the building is lined internally, then the seating is always supplied in an Off White paint finish.

UPHOLSTERY DESIGNS

Where seating and upholstery are chosen, each section of seating is supplied with a high quality, deep foam block seat cushion, complete with piping. Luxurious, loose backrest cushions with hollow fibre filling are supplied in two different sizes, offering a comfortable and modern finishing touch to the summerhouse. All large backrest and seat cushion covers are removable for dry cleaning. Scotts offers a wide choice of fabric styles to suit all tastes, as shown here.

Fabric colours may vary due to the printing process, samples are available on request.

BESPOKE SUMMERHOUSES

IF YOU CAN DREAM IT, SCOTTS CAN BUILD IT

The garden provides such an exceptional opportunity to express ourselves through shapes, colours and textures but should not be limited to plants alone. Why not apply this creative expression to focal point structures, such as a summerhouse?

Scotts of Thrapston is one of the few summerhouse manufacturers that can create a garden building customised to your personal design or to suit an unusual shape in your garden. If you dream of a very special garden retreat, with a completely unique colour finish, fitted with a wood burning stove, or a unique layout or style then the Scotts design team can make your building a reality. Whether a distinctive pool house, a garden pavilion, a hobby room or simply a variation on one of the standard summerhouse buildings, Scotts can help you to create your dream garden hideaway.

MORE THAN JUST A SUMMERHOUSE

For many years, Scotts has supplied one-off buildings for commercial entities including hotels, leisure clubs and restaurants where they require a distinctive timber building to meet their specific needs. Logos and corporate colours can be incorporated into the design to personalise it for your business. Scotts has supplied pavilions, ticket booths, smoking huts, golf course shelters and even themed summerhouses for taking tea in the gardens of very special restaurants and hotels.

Make sure that a summerhouse is a key feature in your garden or grounds for many years to come and speak to Scotts about the bespoke design service on offer. Scotts will create a building that suits your application and that is as unique as your imagination will allow!

SPECIFICATION

TIMBER

All of the timber is carefully selected from high quality FSC and PEFC certified European Redwood. The timber is vacuum pressure impregnated with Osmose Naturewood. This pressure treatment process effectively provides protection against rot, fungal decay and termite attack and provides a life expectancy of at least 25 years.

THE WALLS

The cladding is ex 19 x 125mm machined tongue and groove boarding. All nails are galvanised. The framing size varies to structurally suit the model chosen. On the Balmoral, Baltimore and Garden Room it is a minimum of ex 38mm x 38mm in size. On the Newhaven, Burghley and the RHS Arbour it is a minimum of ex 50mm x 38mm. The framing on The Polebrook and the RHS Centenary Summerhouse is ex 75mm x 38mm.

DOORS AND WINDOWS

All of Scotts doors and windows are handmade by craftsmen, in the joinery division, using traditional mortice and tenon joints. This type of joint provides a larger surface area for gluing to ensure that the joints are very strong as well as neat. All of the doors and windows are fitted with 6.4mm laminated glass and traditional beading with quality brass fittings. The doors have a rebated mortice lock. Satin chrome fittings can also be specified, if preferred.

Double glazing can be fitted to all models (except the Balmoral) using clear, low E energy saving glass. The Polebrook is fitted, as standard, with double glazed units. The shutters on the Balmoral are fitted with 3mm thick removable clear acrylic sheeting for ease of cleaning and painting.

THE FLOOR

All floors are manufactured using ex 19mm x 125mm pressure impregnated tongue and groove floorboards. Timber joist sizes vary depending on the model chosen. The Balmoral, Baltimore, Burghley, Newhaven and Sun Ray Garden Room have ex 38mm x 50mm joists whilst for the Polebrook and RHS Centenary Summerhouse they are ex 75 x 50mm.

ROOFS

The composite glass fibre roof is maintenance free and provides protection against UV rays.

Scotts cedar shingle roofs only use high quality, Number 1 grade blue label, Western red cedar shingles fitted with stainless steel nails. A timber frame, for the cedar shingle roof, is made from stress graded timber with a breathable underlay.

The Polebrook has a slate effect felt tile roof to the front elevation and a light grey, heavy duty 3.5Kg APP modified mineralised felt to the rear. The felt tiles are manufactured to ISO 9001 and both the felt and felt tiles are fitted to 15mm OSB boarding. Due to their high strength, thick granule protection and pre-impregnated construction, both the felt and felt tiles provide a long life expectancy.

For specific roof options and which models they apply to, please see page 11.

PAINTS AND STAINS

If a paint finish is selected, all of the nail holes are filled and then the timber on both the inside and the outside of the building is knotted and primed. The microporous paint, in your chosen colour, is applied in a spray finish from the Teknos Industrial range.

If a stained finish is chosen then two coats of "Valtti Color" traditional semi-transparent matt wood finish are applied. The stain penetrates the wood so retarding the adverse effects of moisture, UV-light and microbial growth. The stain is absorbed into the wood and does not form a solid film.

CUSTOMER SERVICE

As a family business, established in 1920, Scotts of Thrapston places great emphasis on design, quality and service. Customer satisfaction has always been a top priority for Scotts and there will invariably be a member of the sales team willing to help you with your enquiry. Advice is always free of charge and they are happy to assist with planning, design, construction and other queries, whenever possible.

The Scotts summerhouses can be seen at selected garden centres and display areas, around the UK, or at the Thrapston showsite. A full list of showsites can be found on the Scotts website.

LINING AND INSULATION

If the summerhouse is lined, a 9mm thick exterior grade, moisture resistant, MDF tongue and groove effect lining, in a painted finish, is fitted to the walls. All panels are pinned and skirting is fitted to the bottom of each panel.

Insulation is available for all of the summerhouse models (excluding the Balmoral) and further details can be obtained, on request, from the sales team.

WARRANTY

A 10 year timber guarantee is offered by Scotts against rot, fungal decay and termite attack, in addition to your statutory rights. Scotts cannot be held responsible for any maintenance needed for the external joinery elements including the timber doors and windows.

Please note that timber is a natural product and can be subject to expansion and contraction from environmental or weather related conditions. Whilst Scotts takes every care, they cannot be responsible for any seasonal changes with a natural product.

SITE PREPARATION

BASE

The building must be erected onto a pre-prepared, level and hard standing area, preferably either concrete or smooth paving slabs – see Scotts base plan for details. Ideally, this base needs to be to a minimum depth of 100mm. If the site is very exposed it needs metal straps incorporating into the base work to anchor it to the ground. The person who undertakes the base work will supply these.

PLANNING PERMISSION

Planning permission is not generally required unless you live in a Conservation Area or in a Listed Property and providing the building is sited at least 2 metres from your boundary. If the summerhouse is to be positioned closer to the boundary, Scotts can offer most buildings at a height of under 2.5 metres to comply with planning regulations. However, it is always advisable to clarify individual situations with your local planning authority. Where a planning application is required, Scotts personnel will be pleased to assist with the process by providing full scale drawings, for your chosen model, for submission with your application.

DELIVERY, ON-SITE ASSEMBLY AND ACCESS

The Scotts package (excluding the Balmoral gazebo) includes delivery and erection of their buildings onto a pre-prepared base. Scotts directly employs fully trained, experienced and professional installers who have worked with the company for many years. The whole Scotts team takes a pride in the finished buildings they create.

Working space will be required around the building for the installers to construct the building to your satisfaction, quickly and efficiently. Scotts regrets that the installation teams are unable to carry wall panels, floors or roofs over walls and fences or through houses and garages. At the time of ordering you will need to confirm that adequate access is available for the building to be delivered.

If access is not available then Scotts can usually manufacture smaller component parts to allow for the building to be carried through a house or garage, for example. Full details of access requirements can be obtained from the Scotts sales team and agents. All buildings are supplied with a comprehensive maintenance manual.

Whilst every effort has been made to ensure that the details displayed in this brochure are correct, Scotts reserves the right to change individual specifications without notice.

PLACING AN ORDER

You can order your Scotts summerhouse directly from the showsite where you saw it, by e-mail or over the telephone by calling the Customer Hotline. All orders will be confirmed in writing within 14 days and delivery is generally within 4 - 6 weeks, depending on the model. Scotts offers a delivery and installation service for all summerhouses.

E-MAIL: gazebos@scottsofthrapston.co.uk

THE ROYAL HORTICULTURAL SOCIETY

Working in close partnership with The Royal Horticultural Society, Scotts of Thrapston has designed and produced an inspired and practical range of garden buildings, each providing a peaceful retreat from the pressures of modern living.

To “transform communities through gardening” is a key focus for the RHS and these highly functional, beautifully designed buildings enhance any outside space. Seating transforms a garden: simply provide a place to socialise, relax or think and it will rapidly become the best used spot in the garden – a honey trap.

Sharing the best in Gardening

THE RHS GARDEN BUILDINGS

In honour of the centenary year of the RHS Chelsea Flower Show, Scotts has designed two buildings which draw their inspiration from the archives in the RHS Lindley Library. These buildings trace their roots back to the classic pavilions and gazebos found in many formal gardens... always providing a place to stop, and sit.

THE RHS CENTENARY ARBOUR

The RHS Centenary Summerhouse and the RHS Centenary Arbour cladding can be stained or painted to suit your requirements. The internal lining, doors and windows and bench will always be supplied in a paint finish, from your chosen colour. The RHS colour finishes are shown below.

Willow

Silver Birch

Chestnut

Copper Beech

Buttermilk

Clotted Cream

Duck Egg

THE RHS CENTENARY SUMMERHOUSE

“To sit in the shade on a fine day and observe the verdure is the most perfect refreshment.”
Jane Austen

THE RHS CENTENARY ARBOUR

Every gardener knows that *working* in your garden is just as important as *sitting* in it. This highly practical arbour answers both requirements by combining a cosy, sheltered seating area with a large, lockable tool store.

Compact enough to slot neatly into the smallest of gardens yet cleverly designed to maximise storage, the Centenary Arbour provides the perfect place to sit awhile, once the tools have been tucked away at the end of the day.

Beneath the one-piece, lead look glass fibre roof, pressure impregnated redwood can be finished in a range of contrasting heritage colours, with an optional bench in a complementary paint finish. The Arbour comes with some interesting features including diamond leaded windows and a roof top finial contributing to a strong design statement.

THE RHS CENTENARY SUMMERHOUSE

Classic proportions and elegant styling characterise the appeal of this summerhouse, designed as a “conservatory in the garden”, and with characteristic windows to every aspect this is truly a room with a view.

Whether you wish to relax in glorious isolation or entertain a group of friends, the Centenary Summerhouse means you can do it in style. The tented roof lining, gothic arched glazing bars and fully lined interior add luxury and opulence, making this suitable for various activities in all climates. You can also choose to add an optional matching dresser with occasional table for the perfect finishing touch.

The handmade, cedar shingle roof and distinctive copper finial are complemented by the contrasting paint and stain finishes, from a range of heritage colours, all of which make this a handsome and timeless addition to any garden.

For dimensional drawings of the RHS Garden Buildings, please visit the Scotts website.

PERFORMANCE DOORS

From basic primed flush doors through to the highest quality inlaid veneer or panelled doors, Scotts has the solution to meet most commercial or residential applications. The Scotts range of fire, acoustic, security and other performance doors are tailored to suit individual customer requirements, whether for refurbishment or new build projects.

PERIOD WINDOWS AND BESPOKE JOINERY

For many years, Scotts has had an enviable reputation for producing bespoke joinery, of the highest quality, for both commercial and domestic projects. In addition, Scotts manufactures and supplies bespoke timber windows, including sliding sash and casement windows and French doors, which combine the charm and character of traditional windows with modern, Part L compliant levels of insulation and security.

ROOF STRUCTURES

As a leading member of the Trussed Rafter Association, Scotts can design and supply all structural roof components from trussed rafters and room-in-the-roof trusses to roof structures for special applications. Scotts is the preferred supplier to many leading UK housebuilders and construction companies, handling a diverse range of projects.

ENGINEERED FLOORS

The easi-joist engineered floor system from Scotts provides a practical, cost effective alternative to traditional timber joists, whether for domestic or commercial applications. A precision designed and manufactured floor system, easi-joist combines stress graded timber with engineered metal webs to create a flooring solution to suit your specification.

SUMMERHOUSES AND PAVILIONS

Scotts manufactures and supplies distinguished summerhouses, including the RHS range of garden buildings. Bespoke garden and leisure buildings and pavilions can also be supplied for a variety of purposes. The range of sumptuous summerhouses will enhance any garden setting and provide the perfect hideaway whilst every pavilion is purpose designed and manufactured to suit your exact needs.

EQUESTRIAN BUILDINGS

Scotts is the country's leading supplier of bespoke timber equestrian buildings with an unrivalled reputation for design, quality and customer service. The Scotts service includes initial design through to on-site construction. Whether a complete yard complex, an American barn or a simple field shelter is required, Scotts provides the perfect solution for you and your horses.

GARAGES AND OUTBUILDINGS

Scotts garages and workshops can be created to accommodate your treasured motor vehicle, whether a cherished classic car or motorbike or a family runabout. Scotts bespoke timber garages are designed and manufactured for each specific and unique application.
