plan view, side flaps up, rear table in position

PRESENTER   *chairs not included*

Software

The COMPACT Package includes all of the software tools required to create and broadcast radio programs. These include tools for: Ripping CDs, Recording and Editing, Production, Library Management, Creating and populating Program Schedules, Live Assist and Automated broadcast and Report Generation.

Further options

The So Easy Radio COMPACT Package can be enhanced with the addition of an internal digital link – sending program back to studio HQ, or a studio to transmitter link for direct connection to the transmission site, or even a complete FM transmitter. We can also supply a dipole antenna and demountable mast, allowing broadcasts from wherever there is a power source.

The basic COMPACT is supplied in a timber packing case, and there is an optional flight-case available, on castors, allowing regular transportation.

Contact our sales office for further information on these options or to discuss your specific needs.
