iAdaptAir®

*The five absolute best air purification technologies in one smart air purifier.*

How to connect the iAdaptAir® to WiFi

1) Open the WiFi settings on your smart phone and connect to your WiFi (must be 2.4GHz, as the iAdaptAir® cannot connect to 5GHz).

2) Plug in your iAdaptAir®.

3) Keep the iAdaptAir®, router and your smart phone within a five ft. circle.

4) Click +NEW PLACE if you have not previously connected the app to a WiFi network.

How to connect the iAdaptAir® to WiFi

Click ADD after all info is filled in.

Select a picture or take a photo.

Name your new place.

Enter the password for your WiFi.

Re-enter the password of the WiFi router for verification.

How to connect the iAdaptAir® to WiFi

Click ADD after completing all fields.

Personalize the name of your device.

You can use the default image or take your own photo.

If you have other places on the same WiFi network, you can select between them.

How to connect the iAdaptAir® to WiFi

6) Step 1/3: writing the router information to the device.

7) Step 2/3: connecting the device with the cloud server.

8) Step 3/3: updating the device information into the app.

How to connect the iAdaptAir® to WiFi

9) If connecting the device fails, check the following...

• Do you have a WiFi signal?

• Did you enter the correct WiFi password?

• Is the iAdaptAir® plugged in?

• Is your smart phone connected to the same WiFi network as your iAdaptAir®?

• Is the iAdaptAir® connected to another router? If it is, turn that router off and wait for 5 minutes; or reset the iAdaptAir's® WiFi settings (see next page)
How to reset the router setting on the device

Step 1) Press the smart mode button once on standby mode (power plugged in but not turned on) It will show the status of Wi-Fi connection.

Step 2) Hold the smart mode button for more than 3 seconds to reset the WiFi.

Step 3) The status will show for 1 minute and then return to normal.

IMPORTANT: Before resetting the WiFi, delete the iAdaptAir® from the phone app.
This red frowning face will flash after holding down smart mode button for more than 3 seconds. When the green happy face is illuminated or flashing, it means the WiFi has been reset.

Flashing = not connected
Illuminated = connected
