AFFINITY Leasing

Affinity Leasing software is comprehensive software primarily for the Sales, Conversion & Leasing of containers.

Configurable for any size of business, Affinity Leasing offers optional integration with Affinity Depot software.

Modules Include:

Purchase Orders
Purchase Order processing, including collect/deliver, supplier and delivery details and special delivery instructions. Caters for the purchase and system entry of a wide range of container units and also allows for the booking of haulage for purchase orders and container receipt.

Container Repairs
Caters for the processing of unit repair after purchase, using previously defined repair codes to categorise repairs.

Sales Orders
Full multi-unit Sales Order Processing including customer entry, haulage and delivery details. Features include Parameter Driven Revenue Codes and Transport Documentation. Sales Order Invoicing, including email and PDF is also available.

Lease Orders
Full multi-unit Lease Order Processing including customer entry, haulage and delivery details as well as optional order charges. The system also caters for the cross-hiring of individual units. Features include Parameter Driven Revenue Codes and Transport Documentation, whilst both periodic and ad-hoc invoicing options are provided. Collection and inspection of off-hired units and subsequent unit repair processing is also available.

Full Reporting
Comprehensive reporting of units, sales, customers and revenue.

Additional modules available for costing and quoting for container conversion and modification.
