Technical Information

Product Code F003

FLOOR POLISH – NON SLIP METALISED DRY-BRIGHT POLISH

FLOOR POLISH – NON SLIP is a highly effective semi-buffable floor treatment intended for use on synthetic tile or continuous floors, including PVC tiles, vinyl, linoleum and rubber flooring. Also suitable for ceramic, marble and clay floor tiles, some wooden flooring, and painted concrete floors.

Warning: All flooring when wet may create a slip hazard. The application of FLOOR POLISH – NON SLIP to some non slip or slip resistant flooring may result in the floor becoming more slippery after treatment.

LONG LASTING SHINE ON FLOORING

SIMPLE TO APPLY

REDUCES FLOOR MAINTENANCE TIME

DIRECTIONS FOR USE

Clean floor thoroughly before applying FLOOR POLISH – NON SLIP.

Apply 'as supplied' product to cleaned floor, using a sponge mop. Apply one to three coats, as necessary, allowing each coat to dry thoroughly before re-coating.

Treated floors may be washed with a neutral detergent to remove surface grime, and may be gently buffed, to maintain a lasting shine.

Occasionally, or when necessary, the floor treatment may be stripped using a specially formulated floor polish stripper or hard surface cleaner, and the treatment reapplied to the clean floor.
