

• The big picture

Actress Kim Cattrall called Grosvenor's One Park West home when she performed in Liverpool. But Kate Kingston, from interiors company Kingston Shaw, says this lounge, elsewhere in the chic development was designed with men in mind

1. An urban flat needs to celebrate its surroundings and this one boasts the most impressive and unrivalled panoramic views of Liverpool's landmarks, including the Three Graces, Albert Dock and the New Museum of Liverpool.

2. Remote controlled black out blinds and double glazing provide privacy and ensure uninterrupted fun

3. The Swissvoice ePure cordless

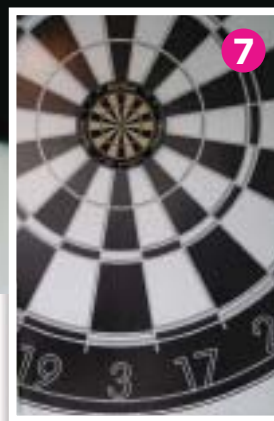

telephone combines a neo-retro design with a unique low radiation eco mode, providing maximum user comfort.

4. The extra deep white sofa with chaise was designed by Kingston Shaw. The super-lux faux leather fabric is perfect for repelling the occasional wine spillage!

5. If gadgets are your thing, this room has the country's first La Boite laptop desk. With a focus on electronic

acoustics, the lap-top loving music furniture features seven drivers, a down-firing subwoofer and a stereo pair at the rear. The latter is intended to bounce sound off the wall and neatly into your ear canal. The unit comes complete with brand new iPad 2.

6. The floor lamp is a modern take on the classic chrome Arco lamp, designed in 1965 by Achille Castiglioni. No lad's

pad would be complete without this enduring example of Italian design.

7. The dart board and surrounding wall design create a sporting atmosphere and provide a perfect setting for guest entertainment

8. Sharp and crisp white high gloss floors help keep the room light and bright as well as offer a contemporary feel. ■
