### Project Description

etc Design Ltd have provided architectural design services for a new state of the art Flight Training Centre located just outside of Moscow as part of the Skolkovo Innovation Centre Development.

The facility provides for 4 Full Flight Simulators with associated training rooms, classrooms, CBT Training Rooms and FPT Rooms together with an office suite for Boeing Research & Development taking up the entire third floor.

The building has been designed to allow clear vision from outside and from the main entrance atrium into the Simulator Hall to expose the purpose of the facility.

The site allocated is extremely tight and has forced the design to follow an angled approach to facilitate Simulator delivery and maintenance whilst allowing for a possible extension to house a further 4 simulators.

### Client

Boeing Flight Services

### Floor Area

4,700sq. m approx.

### Construction Period

52 weeks

### Construction Cost

£9.7 Million

### Project Team

Architect: etc Design Ltd, Client  
Representatives, Consultant Engineer:  
Jonathan Hart Associates, Financial  
Consultant: EC Harris (UK) Ltd
