

## SL-95. 3-Anilinopiperidines

3-Anilinopiperidine - a structural isomer of 4-anilinopiperidine which in turn represent a recognizable pharmacophore among synthetic opioid analgesics [1]. Structural variations around the anilinopiperidine core greatly determine the structure–activity relationship properties [1].

Annulated bicyclic molecules, incorporating 3-anilinopiperidine fragment, can be potentially interesting for pharmaceutical research and development.

### Signature Library 95

Formats	Supplementary Information
80 compounds per plate 0.1 mg; 1 mg; 2 mg dry film/powder 0.1 μmol; 1 μmol DMSO solutions	SL#95_3-Anilinopiperidine.sdf
