

measuring pact's mission

global indicators

In 2011, Pact developed a new organizational strategy focusing our work around three key impact areas and three core approaches. The key impact areas are in health, livelihoods, and natural resource management. We achieve our lasting impact in these areas through the approaches of capacity development, governance, and business and markets. We believe that our work in these impact areas using these approaches will achieve our vision of a world where those who are poor and marginalized exercise their voices, build their own solutions, and take ownership over their futures.

To measure our progress, we defined one indicator for each impact area and each approach. These indicators were collected for the first time in fiscal year 2011, and again in fiscal year 2012. This report summarizes the outcomes for our worldwide programming in fiscal year 2012 (October 2011 - September 2012), and their relation to last year's achievements. A summary of Pact's impact areas and approaches and the indicators selected to measure them is provided in the table below. Pact is committed to continuing to measure the reach and impact of our programs, and plans to publish this global indicator report annually. Should you have any questions about this report or the methodology, please contact Kerry Bruce, Director for Results and Measurement (kbruce@pactworld.org).

3,336,520 people with improved access to health services.

333,688 people with increased income.

2,095,446 hectares of ecosystems under community management.

1,256 initiatives resulted in positive state-society engagement.

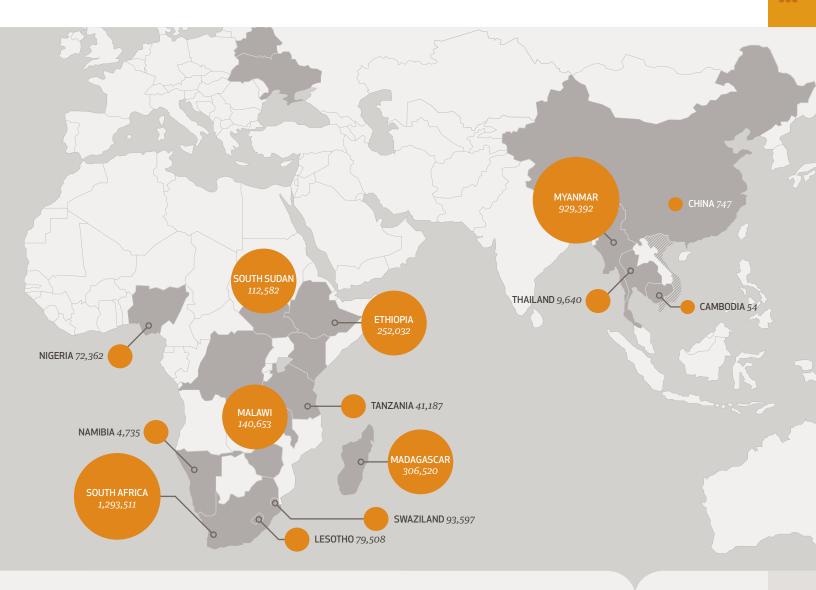

14 projects where business and markets played a positive role.

7,802 partners improved their organizational performance.

impa	ıct area	indicator		
×	HEALTH Vulnerable people access the care they need to enjoy a healthy life	Number of people with improved access to health care or preventive services		
	LIVELIHOODS People with limited livelihood choices gain the resources needed to be income secure	Number of people who have an increase in net income

3,336,520 people with improved access to health services in 2012, compared to 4,041,332 in 2011.

The decrease of Pact's health impact from 2011 to 2012 reflects the closing of several REACH projects targeting HIV in the Greater Mekong Region (China, Thailand, Myanmar, Laos), Vietnam, Malawi, and Lesotho.

333,688 people with increased income, compared to 351,999 in 2011.

meant that in aggregate, Pact's NRM impact increased between 2011 and 2012.

Both new and closing Pact projects did livelihoods work in 2012, and several were unable to record whether clients increased net income this year due to data collection difficulties at startup or closeout. In addition, several ongoing projects do not yet have the capacity to collect data on income.

2,095,446 hectares of ecosystems under community management, compared to **1,768,725** in 2011.

Despite the close of a major NRM project in the DRC, the expansion of the NRM component of a project in Kenya

7,802 partners improved their organizational performance, compared to 6,129 in 2011.

With the opening of several new projects and the expansion of others, Pact worked with more organizations in 2012 than in 2011 and saw improved performance in more partners.

1,256 initiatives that resulted in positive state-society engagement, compared to 505 in 2011.

The expansion in initiatives resulting in positive state-society engagement comes primarily from increases in Kenya and Nigeria, both of which reported much higher numbers of initiatives over last year.

14 projects where business and markets played a positive role, compared to 15 in 2011.

The fluctuation in projects where business and markets play a positive role reflects the closing of some WORTH and mining projects and the startup of additional microfinance and civil society projects.

belarus -

The Belarus Reforms And Media Assistance Program (BRAMA) is an innovative and comprehensive program aimed at stimulating civic activism in Belarus. To position a stronger Belarusian Civil Society that effectively advocates for social change, the program focuses on institutional development, small grants, media, and civic education.

The program builds the capacity of Belarusian CSOs to create room for transition and reform. It concentrates on achieving the following outcomes by the end of the program: 1) more Belarusian CSOs are capable of identifying and effectively addressing real issues pertinent to the mainstream public; 2) CSOs are viewed by more citizens as legitimate and efforts useful stakeholders in the process of determining the country's transformation; 3) Independent media organizations have increased influence on society by offering balanced, reliable and high-quality information in an attractive format; 4) Increased public understanding of and trust in civil society and, consequently, more active civic participation.

partner in Belarus improved their organizational performance through consultancy and sub-grants.

project in Belarus where business and markets played a positive role, in the **governance** sector.

cambodia

Pact has been improving lives in Cambodia for over twenty years by supporting transparent and accountable governance, empowering women to increase their incomes, helping communities conserve the environment, providing health education and strengthening Cambodian civil society organizations.

Currently, Pact is focusing efforts on programs addressing HIV/AIDS, anti-corruption, community forestry, decentralization and governance, and women's empowerment.

china -

Under the Community REACH program in the Greater Mekong Region, the China program works with PLHIV and their families to develop livelihoods initiatives that will improve quality of life by reducing economic vulnerability. The program aims to develop the human, social and financial capital of PLHIV and their families, and provide a supportive environment that encourages positive health, working in two regions in the southwest of the country with five partners.

people in China with improved access to health services.

partners in China improved their organizational performance through consultancy, training, mentoring, resource referral, peer learning and sub-grants.

project in China where business and markets played a positive role, the health, livelihoods and capacity development sectors.

In the Democratic Republic of Congo in FY2012, four projects supported 85 partners in natural resource management, capacity development, governance, and business and markets. Most of the projects supported communities to use their natural resources with equity and transparency. One of the largest projects, the ITRI Tin Supply Chain Initiative (ITSCI), responds to the needs of all the parties throughout the supply chain to certify minerals as conflict free, as well as a mechanism to strengthen and formalize trade of tin, tantalum and tungsten minerals in the Great Lakes region. The Salonga project supports the implementation of livelihood activities and land use planning in order to reduce the rate of forest degradation and the loss of biodiversity in the Salonga-Lukenie-Sankuru forest landscape.

projects in Democratic Republic of Congo where business and markets played a positive role, in the governance, livelihoods and capacity development sector.

ethiopia -

In FY2012, Pact's Ethiopia program operated 8 projects supporting 73 partners to undertake a diverse range of activities, including support for orphans and vulnerable children programs, alternative and formal education, and capacity strengthening. Alternative education work provides access to education for marginalized and pastoral populations in remote areas, and capacity development for local government. Formal education work focuses on civic education in 500 primary schools, promoting scouting as a means to activate civil responsibility in surrounding communities. Pact supports sustainable development in Gambella regional state focusing on natural resource management and capacity building with local government entities.

252,03

partners in Ethiopia improved their organizational performance through training, mentoring, resource referral, peer learning and sub-grants.

initiatives in Ethiopia resulting in positive state-society engagement through community meetings, public expenditure tracking, public forums, research, town hall meetings, trainings/workshops and watchdog monitoring.

Pact's work in Kenya includes governance, peacebuilding and conflict transformation, capacity development, and natural resource management. PEACE II is a five year, USAID and DFID-funded regional conflict transformation program that started in October 2007 and covers the border areas between Kenya and Uganda and Kenya and Somalia. The DFID-funded Borders program works on the Kenya-Somalia border with communities on both sides addressing conflict transformation and governance. The Kenya Civil Society Strengthening Program (KCSSP) provides grants focusing on capacity development in three key areas: advocacy and policy change, peacebuilding, and NRM. KCSSP strategically targets those NGOS and other civil society actors with the greatest potential to build large constituencies for critical reforms needed in the democratic governance and natural resource management sectors. In the Fanikisha Program, Pact supports capacity development and advocacy for the health sector.

project in Kenya where business and markets played a positive role, in the livelihoods and natural resource management sectors.

lesotho -

Pact's five-year Cooperative Agreement with the US Government, entitled Community Rapid and Effective Action Combating HIV/ AIDS in Lesotho, provides grants and capacity building services to Lesotho civil society organizations working in HIV/AIDS prevention, care and support for orphans and vulnerable children (OVC), and people living with HIV/AIDS (PLWHA). Pact's mandate also includes strengthening the health system and civil society networks to ensure a more coordinated response to the epidemic. The program works in nine of the country's ten regions and supports 34 partners.

people in Lesotho with improved access to health services.

people in Lesotho with an increase in

Pact in Madagascar is a Global Fund Principal recipient and is responsible for programs to reduce the rate of TB in the population and to reduce the rate of malaria. The TB program aims to reduce the rate of TB in the population by maintaining a detection rate above 70% and by increasing the rate of treatment success from 76% to 85% by 2014. The malaria program will focus on the entire population, targeting pregnant women and children under five. The main target of the program is to ensure universal access to effective malaria prevention, diagnosis and treatment in order to reduce the impact of malaria on the population in a move towards malaria elimination. The Madagascar program also supported a child protection program that aimed to remove children from the worst forms of child labor which ended in FY2012.

306,520

 $In \ Malawi, \ Pact \ partnered \ with \ JHU \ to \ support \ the \ capacity \ development \ of \ organizations \ and \ government \ institutions \ to \ strengthen$ networks and provide support for developmental activities, with a focus on leading the response to HIV/AIDS targeting and prevention. Pact also partnered with PSI on the Evidence-Based Targeted HIV Prevention Project, through which Pact continues to work with local partners from the closed Community REACH project.

people in Malawi with improved access to health services.

In FY2012, Pact's Myanmar program supported 13,331 organizations over six projects. Pact's largest project in Myanmar is a microfinance project that supports more than 9,000 women-led savings and microfinance groups. The SAHEEA project promotes sustainable access to healthcare for needy communities by improving community capacity to plan health-related activities and by enhancing income. The Shae Thot project, which started at the end of FY2011, strengthens CBO capacity and networks to improve maternal and child health, livelihoods, sanitation, and food security. Pact also partners with Chevron and Coca-Cola to provide community development support to many Burmese communities.

namibia -

Pact in Namibia supported three community based organizations in FY2012 focusing on building their capacity toward being able to accept direct funding from USAID. Pact also supported the Ministry of Gender Equality and Child Welfare to build its planning, managerial, and monitoring and evaluation capacity while assisting the MGECW to plan and implement key policies.

people in Namibia with improved access

partners in Namibia improved their organizational performance through consultancy, training, mentoring, peer learning and sub-grants.

H

Pact in Nigeria supported four projects in FY2012 with 96 local partners. The LEAD project supports 13 partners in a peace and democratic governance project that builds partnerships between state and local governments, civil society and the private sector. The ADVANCE project supports key partners to enhance civil society capacity to engage effectively and constructively with government. Pact also supports a major HIV/ AIDS and Orphans and Vulnerable Children project in Nigeria through a Community REACH award that currently partners with 55 community based organizations to provide effective service. Pact supported an additional 5 partners through a Gates Foundation capacity development award.

72,362

south africa

The South Africa program is Pact's largest project worldwide. With a presence in all nine provinces of the country, Pact has worked with over 100 partners in building organizational and technical capacity to deliver quality HIV care, treatment, and prevention services. Pact's strategy integrates grant-making and capacity development for effective and sustainable programs.

1,293,5

people in South Africa with improved access to health

partners in South Africa improved their organizational performance through consultancy, training, mentoring, peer learning and sub-grants.

The Pact South Sudan office implemented 9 projects in FY2012 that worked with 51 local partners. In South Sudan, Pact seeks to address systems of conflict through peace-orientated, community-focused development and governance interventions. Pact's programs also enable communities to be in charge of their own social and economic development.

112,582

people in South Sudan with improved access to health services.

initiative in South Sudan resulting in positive state-society engagement through community meetings, public expenditure tracking, public forums, research, town hall meetings, trainings/workshops and watchdog monitoring.

swaziland -

In Swaziland, Pact is implementing a five-year program through March 2015 that provides grants to local organizations implementing HIV/AIDS interventions related to sexual prevention, gender, care and support, counseling and testing, and OVC for PEPFAR in Swaziland. The overall goal is to "reduce the impact of HIV & AIDS and improve health care for Swazis." The program works in all four regions of the country and supports 13 implementing partners. The program is also partnering with a civil society organization to develop its capacity to become an umbrella grants manager for USAID in Swaziland.

people in Swaziland with improved access to health services.

 $partners\ in\ Swazil and\ improved\ their\ organization al$ performance through consultancy, training, mentoring, peer learning and sub-grants.

In Tanzania in FY2012, Pact did health, livelihoods, and capacity development work through two projects. The Pamoja Tuwalee project supported partners to provide quality OVC services in five regions in the country. The Child Protection project linked children in need to care, justice, and protection.

41,187

people in Tanzania with an increase in net income.

thailand _

In Thailand, through the Community REACH program, Pact supported 24 partners in Thailand, Laos, and the Greater Mekong Region to build the capacity of local partners working with key affected populations. These include people living with HIV and targeted sub-populations at risk for HIV infection. Pact pioneered livelihoods programming for people living with HIV that built confidence, increased incomes, created community, and reduced stigma. Pact also partners with PSI in the Greater Mekong to provide organizational capacity building support to 12 community-based organizations and one Government organization in four countries including Burma, China, Laos and Thailand. In addition, under the Global Fund Round 10 project (CHILDLIFE), Pact will strengthen Thailand's strategic information systems at the national, provincial, district and sub-district levels for improvement of services to children affected by HIV and AIDS (CABA) and other vulnerable children living within communities of high HIV prevalence enjoy the same standards of social acceptance, personal development and quality of life as others.

people in Thailand with improved access to health services.

partners in Thailand improved their organizational performance through training, mentoring, resource referral, peer learning and sub-grants.

Pact worked with 65 organizations in Ukraine in FY2012. Pact implemented UNITER, a civil society strengthening project, to enable NGOs to represent citizen interests and drive reform through more effective advocacy, monitoring and activism. Pact also started up a project that aims to improve the quality of HIV/AIDS services among most-at-risk populations (MARPs) in Ukraine.

partners in Ukraine improved their organizational performance through consultancy, training, mentoring, ${\bf resource\ referral},\ {\bf peer\ learning}\ and\ {\bf sub\text{-}grants}.$

project in Ukraine where business and markets played a positive role, in the governance sector.

standard indicators

Many of Pact's projects are USAID-funded, and so collect data corresponding to USAID's standard F Indicators. Below are some, but not all, of the F Indicator data Pact reported for 21 of its USAID-funded projects in FY2012. Note that indicators reflecting percentages of populations, rather than total numbers, were excluded due to the difficulty of aggregating percentages across areas of different population sizes.

f-indicators 2012	total	f-indicators 2012	total
PEACE AND SECURITY			
1.6.1-12 Number of new groups or initiatives created through USG funding, dedicated to resolving the conflict or the drivers of the conflict	8	1.6.2-13 Number of USG supported events, trainings, or activities designed to build support for peace or reconciliation among key actors to the conflict	55
GOVERNING JUSTLY
