

Our IMPACT Toolkit™ contains World Class Methodologies recognised for their effectiveness in a very broad range of industries and essential for achieving Operational Excellence

Lean RCM™ is a bespoke, tried and tested methodology for improving process reliability. It is based on best practice within the aircraft industry blended with Lean Manufacturing, from industries such as the automotive sector, and our own, vast, proven experience within diverse industrial sectors.

This is a 1-day Workshop for Business Leaders, Maintenance, Engineering and Operations Managers to understand more about the theory of Lean RCM™, how to overcome the hurdles during implementation and how to transform an operation to a world class maintenance standard.

Lean RCM™

Who should attend

- Business Leaders
- Operations Directors
- Maintenance, Engineering and Operations Managers
- Continuous Improvement Managers
- Operational Excellence Leaders
- Anyone tasked with improving Productivity and Profitability

Why attend

- Understand more about Lean RCM™ and its benefits
- Dispel the myths about RCM
- Unscramble the puzzle of TPM, Data Analytics, Condition Monitoring, Six Sigma and many others
- Establish where Reliability fits with your business objectives
- Hear directly from an EMS customer and industry award winning Lean RCM™ expert about implementation and making reliability a Tier 1 topic in the organisation

see reverse for full agenda

To maintain the high quality of this workshop, numbers are limited to 20 people

“After 25 years in engineering and operations management, I thought I knew about preventative maintenance. How wrong I was! I now have an understanding of Lean RCM™ and its principles which will help me to run our business so much more effectively and efficiently.”
Richard Moore, General Manager, Cepac

£495 per person excl VAT.

WORKS MANAGEMENT MANUFACTURING CHAMPION 2016

Viridor Lean RCM Team

"A textbook example of what you should do if you want to improve your maintenance performance. The team involved everyone from operators up to senior managers, in setting a clear-cut strategy, a breakdown of how they would do it and identifying training support. The Lean RCM team are an absolute credit, both to themselves and Viridor – I'd have them in my plant tomorrow."

Richard Kelly, workshop presenter is a management consultant with over 30 years of industry experience and a track record of changing culture, delivering Operational Excellence, Lean and Reliability best practice and results in renowned, global organisations
