

Mounting Towerchron QE1 / QE2

Remove the main unit from the backplate.

- 1, Follow steps 3, 4, & 5.
- 2, Mount the backplate securely to a surface using at least two of the fixing holes provided.
- 3, Ensure the power is isolated and connect wiring to the relevant terminals (See user instructions).
- 4, Locate the top mounting lugs (image 7/B) into the top mount locations on the QE1/QE2 (image 7/A).
- 5, Lower the base of the QE1/QE2 until the fixing screw is fully located in the mounting slot (image 8).
- 6, Tighten the fixing screw fully (image 9).
- 7, Turn on power and setup the QE1/QE2 according to requirement.
