

System 2.0

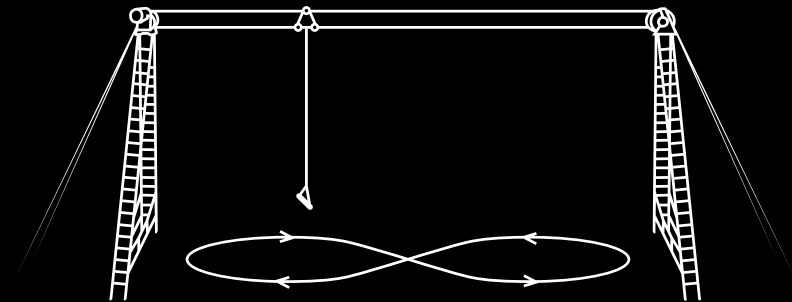

The original two tower cable system for all riding levels

OFTEN COPIED BUT STILL UNMATCHED

Little effort, maximum fun: Sesitec's original, modular straight-line cable system is the riders' favorite.

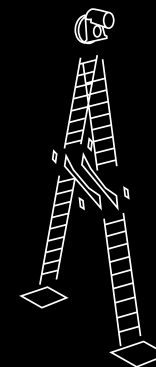

ORIGINAL.

The Sesitec System 2.0 revolutionized wakeboarding and broke down boundaries for riders. From the industry milestone in 2008 until now, the System 2.0 still is the market leader with more than 400 installed cables worldwide. You can't go wrong with the original two tower system.

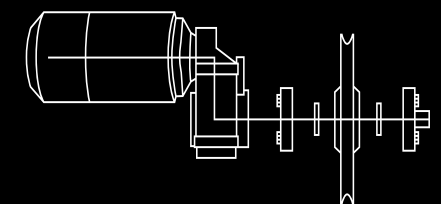

GROUNDING.

Proven technology and continuous development make the System 2.0 the most reliable and sophisticated cable system. Thanks to the fast installation and the low requirements the System 2.0 offers an uncomplicated entry into the wake park business and the fastest way to make your dreams come true.

FLEXIBLE.

Extraordinary flexibility distinguishes the System 2.0 from other solutions. It can be installed on almost any ground and adapted to various conditions. Beginners will experience a fast learning curve, while advanced riders rely upon the System 2.0 when training new tricks efficiently.

COMPLEMENTARY.

A System 2.0 will upgrade any destination and business. It's a great complement to Full Size Cable wake parks for beginners and exclusive bookings. Additionally, the System 2.0 is an exciting leisure attraction for existing businesses such as hotels, sport facilities, water sport schools and amusement parks.

PROS.

BEGINNERS.

EVERYONE.

Top Features

Direct Drive

Sesitec has a patent pending for its Full Size Cable direct drive. We used this expertise for the System 2.0 and developed a compact direct drive that contains less moving parts. Our customers benefit from the consequential reduced wear, longer lifetime and little noise emission of the motor.

Spline Shaft

The built-in spline shaft enables a direct transmission of the speed and torque. In interaction with other components, the load is evenly spread on the motor and pulley. This all effectively results in reduced wear.

Little Maintenance

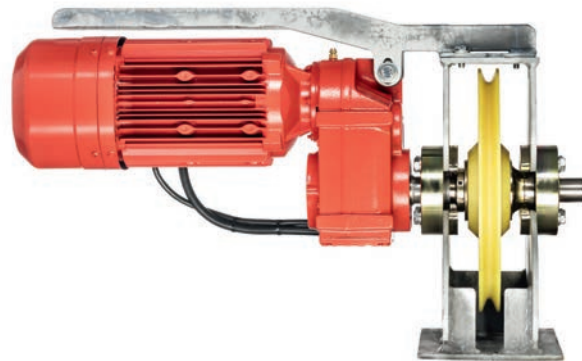

Maintenance on the System 2.0 is minimal and simple, so you can save time and money. Our training staff will teach you how to do daily maintenance effectively and efficiently so your System 2.0 will have the longest life-span.

Electric Motor

The System 2.0 electric motor is eco-friendly and quiet without sacrificing durability and strength. It is highly efficient, which results in low running costs and less maintenance. When maintenance is required the motor is easy to dismantle saving you time and work.

Individual Operating

Sesitec wants you to be the independent boss of your System 2.0. This is why we equip you with an extensive tool box and designed our System 2.0 in a way that makes maintenance super easy. You also receive an iPad with a special software for setting and changing all the operating parameters by yourself. But in case you need personal assistance, our customer service will always be there for you – on the phone or on site.

OPTIONAL FEATURES

Recon

Sesitec's wireless remote control allows the operator to stay up to 300 feet away from the control cabinet (depending on your location even more than 700 feet). This mobility enables the operator to stay close by the rider for more hands-on teaching.

Rental Equipment

Sesitec closely cooperates with leading manufacturers of rental equipment such as wakeboards, waterskis, life vests and helmets. We offer an individually compiled set of rental equipment for your wake park on request.

Park Features

Park features, such as rails and kickers, will make your wake park more attractive for advanced riders, and incentivize repeat riders with the potential to continually advance. Sesitec collaborates with UNIT Parktech, the Germany based market leader for park feature manufacturing. We will help you selecting the best features for your park and target group from their wide product range.

SERVICE

Individual Project Planning

It is our mission to build the most successful wake parks in the world. For us, every new wake park is a unique project with different goals and different challenges. We take into account the environmental conditions and our customers requirements and advise from the early planning phase onward.

Install & Training

Our installers are well-trained and have set up many System 2.0s. During and after the installation they will share their wakeboard and cable park knowledge, and train you in operating and maintaining your System 2.0. We are there for you from start to finish.

Customer Support

We see our customers as partners who share our standard of high quality excellence and our passion for wakeboarding. With our well-trained and experienced international team we provide personal and immediate service via telephone, e-mail or on-site. No matter how complex or complicated your problem may seem, we will find a solution.

Spare Part Online Shop

Sesitec operates an extensive online shop where our customers can purchase all their spare parts directly. We dispatch orders within 24 hours on working days, and offer express shipping on demand.

WE BUILD DREAMS Est. 1992

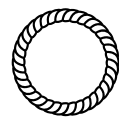

Sesitec is your wake park partner from the early planning until ... forever. We support you in developing a unique recreational facility that attracts your target groups and brings you high return on investment. Together we resolve obstacles that may arise along the way. With over 80 Full Size Cable and over 430 System 2.0 installations worldwide, we're constantly evolving – always with our mission in mind: We build the most successful wake parks in the world.

All our actions are based on our values:

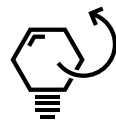

Living Water

Wakeboarding is our shared passion. Motivated by a desire to build exceptional wake parks, we come to work each day with a smile. Our company consists of keen wakeboarders, who know what wakeboarders want, and former wake park managers, who know how to successfully run a wake park. It's our calling to bring wakeboarding to the world and make it more accessible for everyone.

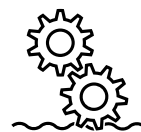

One Team

Teamwork makes the dream work. We are united by an enthusiasm to bring new and innovative projects to life, which feeds into our larger goal of expanding the sport of wakeboarding. Friendly and dependable relationships both with each other and with our customers is the essence of our company. We work together as one and can rely on each other 100 percent.

First Lap

We have never settled for the status quo and push ourselves daily to continue progressing our passions. Catering to the first time rider or pushing the limits of what's capable in our industry is what we're made for. We ride, we work, we innovate, and we evolve. This is in our blood from the first lap to the last.

Flowing Perfection

Quality is our trademark. Our parks are fun, durable and safe. Everything that we do, every part that we produce and install, is handled and tested with the utmost care. The high standard of our work, longtime experience, competence and passion are what makes ours a premium product.

A wake park is more than just a cable, and that is why we advise our customers on all aspects of running a successful business. **360°**
