## ABOUT US

**HIRE | SALES | TRAINING**

One Stop Hire Ltd is proud & delighted to announce that it has purchased the assets of Multiserve Plant services Ltd.

Operating from 14 sites across Lancashire, Cumbria, Merseyside, Greater Manchester, West Yorkshire & Cheshire.

One Stop Hire is the largest independent Hire, Sales & Training provider of Power Tools, Access Systems, Small Plant, Lifting and Survey Equipment in the region.

Incorporating the Multiserve Non Mechanical offering into our portfolio of services will give our existing clients & the Multiserve client base an even greater range of services to draw upon.

INTRODUCTION

## ABOUT US

Our reputation is based on excellent customer service and we are committed to providing a quality range of equipment maintained to the highest possible standard.

We are your complete non-mechanical plant provider supplying

- HERAS FENCING
- BARRIERS
- TRACK MATS
- ROAD PLATES
- PROPS

for both hire and sale.

Within these pages you will find details of the services we provide and the values of our company.

Please contact our central hire desk on

**0800 178 9800** or [central@onestophire.com](mailto:central@onestophire.com)  
for more information or assistance.

## SITE SECURITY FENCE PANEL

Designed to create a secure area. These panels are simple to erect, secured by heavy duty rubber feet and clips to join the panels together.

Length

3.5m

Height

2m

## SITE SECURITY VEHICLE GATE

Designed to create a vehicle entrance for use with site security fence panels.

## SITE SECURITY PEDESTRIAN GATE

Designed to create a pedestrian entrance for use with site security fence panels.

## SITE HOARDING PANEL

The site hoarding panel provides additional security and privacy to your secure area. Assembled using the traditional rubber foot and joining clip.

## SITE HOARDING VEHICLE GATE

Designed to create a vehicle entrance for use with site hoarding panels.

## SITE HOARDING PEDESTRIAN GATE

Designed to create a pedestrian entrance for use with site hoarding panels.

## PRO BARRIER SYSTEM

The versatile barrier system is the ideal product to section off areas of work or temporary danger. Well illuminated with Hi-Vis stickers and a simple interlocking system.

Length	Height
2m	1m

## CROWD CONTROL BARRIER

Typically used for directing traffic to or from a specific area or separating pedestrians from traffic areas of possible danger.

Length	Height
2.3m	1.2m

## CROWD CONTROL WALK-THROUGH BARRIER

The crowd control walk through barrier gives an easily identifiable crossing point for pedestrians. This barrier is used in conjunction with standard crowd control barriers.

Length	Height
2.5m	2.2m

## TRAFFIC SEPARATORS

This universal road separator can be used in either temporary or permanent situations. This water fill unit is a must for all road contractors.

Length

1m

Height

.55m

## GUARDING GOAL POST SET

This easy transportable GRP pole and steel base system can be assembled to full carriageway clearance height in minutes.

BARRIERS

CALL NOW ON 0808 178 9800

07

## NON-SLIP ROAD PLATE

Typically used for bridging excavations the non-slip road plate is an essential item for a safe site.

## TRENCH COVERS

The GRP trench cover is designed primarily for use in street works. Slip resistant surface and chamfered edges to prevent tripping.

Length

1.2m

Height

1.2m

## TRACK MATS

The track mat is a lightweight but incredibly strong temporary ground protection system. This robust system can withstand tyre or rubber tracked vehicles up to 60 tonnes.

Length

2.4m

Height

1.1m

## ROAD CONES

These cones come with weighted bases for stability and reflective sleeve for maximum visibility.

## ROAD SIGNS

We offer a wide range of road signs to fulfill your chapter 8 signage requirements.

## ROAD FORMS

The rigid road form is a simple form of shuttering which is typically used for concrete slabs or floors.  
Flexible road forms are also available to create curves where required.  
Each unit is 3mtr long and available in various depths to suit thickness of slab.

## STEEL MASONRY PROP (ACROW)

Typically used for supporting load bearing structures in the building and construction industry.

### Closed Length    Open Length

0	1070mm	1820mm
1	1750mm	3120mm
2	2007mm	3350mm
3	2590mm	3950mm
4	3200mm	4870mm

## MASONRY SUPPORT STRONG BOY

Designed to work in conjunction with steel masonry props. These durable supports are used to allow material to be removed from below the support. Typically used for installation of RSJ and lintels.

## TRENCH STRUTS

Suggested working loads for all sizes of trench strut is 3 tonnes

	Closed Length	Open Length
0	300mm	450mm
1	450mm	710mm
2	680mm	1140mm
3	1040mm	1750mm

## TRENCH SHEETS

The standard lap trench sheeting is primarily used for ground support and trench work. Used by ground workers and utilities to provide a safe working environment in various excavations. Available in various sizes.

## BUILDERS TRESTLE

Available in 3 different sizes, using scaffold boards or staging boards to create a solid working platform.

## SCAFFOLD BOARD

Typically used for use with builders trestles with a length of 3900mm.

## LIGHT WEIGHT STAGING BOARD

Typically used with builders trestles for spanning between scaffold towers.

## TRESTLE HANDRAIL SYSTEM

The trestle handrail system is an ideal solution for providing a safe system of work when using traditional builders trestles.

## STAGING HANDRAIL SYSTEM

Designed to easily fit on light weight staging boards.

## FALL ARREST BAGS

The 2.5mtr long, 0.64mtr diameter bags fasten together to create a safe landing area around working platforms. For arresting falls up to 2.8mtr.

## CONCRETE COLUMN SKIP

Designed to allow concrete to be poured into columns or shuttering with narrow or difficult access and then discharged at low level, reducing the risk of aggregate separation.

Concrete is then discharged through a shutter into a fitted hopper on which the outlet terminates a 200mm diameter tube. The design allows the operator to control the flow of materials from ground level by a rope connected to the shutter handle. In order to maintain the lowest possible loading height, the skip is laid horizontal to load but automatically reverts to a vertical position when in use. Available in 1000 and 2000ltr.

## FORK LIFT TIPPING SKIP 1200 LITRES

The fork lift tipping skip is an ideal solution for removing waste from production areas by utilising fork lift trucks.

## PERSONNEL CAGE (MAN BASKET)

The personnel cage is used as a safe method of transporting personnel to and from any high or low level work situation.

## 1.5 TONNE GOODS CARRYING CAGE

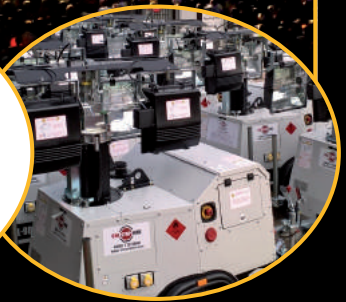

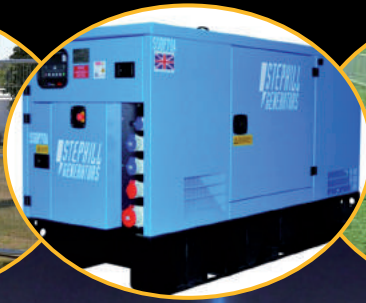

Used as a convenient method of transporting materials to and from high or low levels.

## FORK EXTENSIONS

These sturdy steel fork extensions are easily fitted to most standard fork lifts.
