# Thyme

## Fast track cough recovery

### Traditional Use

Thyme extract has been traditionally used in the health indication of productive cough associated with cold.

### Natural Health Benefits

The use of thyme extract provides a natural, safe and effective health solution.

The high natural essential oil content acts as a relevant quality marker ensuring fast health recovery and suppressing cough.

### Science

The efficacy and safety of thyme extract as traditional herbal preparation for use in the treatment of productive cough associated with cold is based upon long-standing use.

### Manufacturing and Properties

Superior production process technology guaranties the efficacy of Frutarom's thyme extracts.

Made in under cGMP and NSF-GMP.
