

Environmental Policy

Full Support Healthcare Ltd accepts the responsibility for production and distribution of our range of products in an energy efficient way which protects the environment.

Our policies are aimed at minimising the amounts of pollutants released into air, water and land and where possible using sustainable resources.

OUR OBJECTIVES:

- Fulfil as a minimum, all obligations laid down in legislation and appropriate Codes of Practice and to attain, where feasible, standards in excess of those required by statute.
- Monitor on a regular basis all aspects of the Company's impact on the environment.
- Minimise the production of waste and maximise the recycling of waste, so limiting discharges into the environment.
- Encourage and monitor suppliers to attain and maintain standards of environmental protection in their activities.
- Ensure that our plant, processes and practices are assessed for their environmental impact & protection, incorporating positive environmental impacts where possible.
- Ensure that all employees are informed of their individual responsibilities in implementing Company Policy.
- Operate our logistics in a way that minimises the negative environmental effect.
- Encourage the use of our products to increase the positive contribution to the environment which they can provide.
- Inform and consult with local residents about any environmental issues, taking appropriate actions where identified.
- Regularly review our environmental performance.

We take our responsibilities as a manufacturer and distributor very seriously and always strive to improve our practices.
