# **6MLH-NRG**

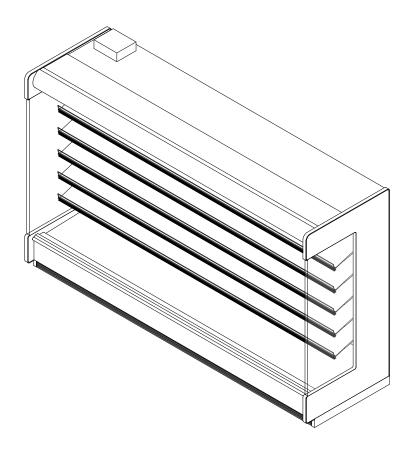

### **GENERAL NOTES:**

• "---" indicates that the feature is not an option for this case model and/or the data is not yet available.

- · LED lights only.
- · Maximum of 6 rows of standard output LED shelves.

• For optimal case performance in fresh meat (deli/meat) applications, Hillphoenix recommends that the merchandising depth in the bin area not exceed 4 inches.

• For optimal case performance, mirrors should be equally spaced between the adjacent mirrors and case ends.

#### NOTES:

- "---" indicates that the feature is not an option for this case model and/or the data is not yet available.
- Listed BTUH/ft data represents unlighted shelves. For LED lighting, add 9 BTUH/ft to determine Total Case Lighting BTUH Load.
- The published BTU Loads represent 4 rows of 22" shelves angled 17°. For other shelving configurations, add 100 BTUH/ft.
- Conventional Discharge Air Control Recommended Settings: Cut-In Temp = Discharge Air + 2°F; Cut-Out Temp = Discharge Air -2°F.

· Listed discharge air velocity represents the average velocity at the peak of defrost.

• Temperature and defrost settings listed above are recommended start-up settings. Final operational settings may need to be adjusted for the store conditions in which the case operates.

• The recommended evaporator temperatures may need to be adjusted based on system setup, store conditions, etc. The minimum recommended evaporator temperature is 4°F below the listed evaporator temperature.
