BESPOKE
GLASS
DESIGN

With over 25 years experience in glass design at Go Glass, Clive has worked for prestigious clients including The BBC, Bafta and Hampton Court Palace and his work has featured in a number of design and technical magazines.

His standard range of sandblasted patterns for glass and the definitive range of standard patterns, for frameless, hinged and sliding glass doors can all be scaled to fit any size or type of glass.

However it is the exclusive range where Clive's talent and passion for glass design is apparent. Unique design and individuality are shown through a range of products including frameless glass doors, etched glass, coloured and leaded glass panels, shower screens and doors, glass splashbacks and mirrors. Clive welcomes commissions of any size and the company now boasts an up-to-date dedicated design department with the latest in computer aided design equipment and a team of glass designers so that his work is supplied in the most cost and time efficient way.

Our charity work with CLIC Sargent

The Glass Motorbike

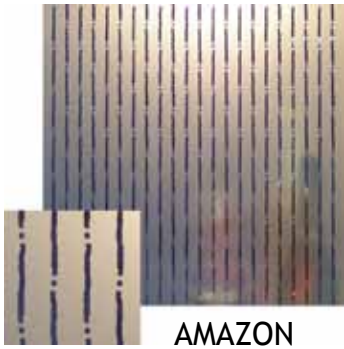

Clive's first glass sculpture for Cliv Sargent was a full size replica of the Ducati 996 motorbike ridden by Carl Fogarty in the 1999 world superbike championships. It was auctioned and raised £3,000 for the children's leukemia charity.

The Glass F1 Car

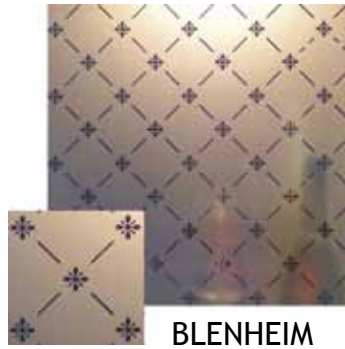

British F1 fans had the chance to own a piece of artwork when Clive painstakingly reproduced a Vodafone F1 MP4-25 racing car in a single panel of glass. Clive took more than 100 hours to create the car, the rendition weighed in at 100 kilos and measures more than 3.6metres. The car wowed audiences at the international glass exhibition in Dusseldorf, Germany and was auctioned in July at the prestigious Grand Prix Ball for Cliv Sargent.

Custom and Bespoke Sandblasted Glass

It's amazing the warmth, character and individuality that glass can add to your home and there's never been as much choice in our range as you'll find in-store at Go Glass today

Our in-house experts and designers led by Directors Clive, Tracy and Emma have put together products from the latest in doors and splashbacks through to glass balustrades and mirrors.

We've considered everything right down to the last detail and work with clients from initial design through to completion using computer aided design and traditional hand cut methods. If it's help and advice you're after don't hesitate to contact us.
