Secure end-to-end e-commerce experience enabled by smart mobility:

Pelipod is a smart device and service that enables you to receive and return parcels at home while you are out. Reduces business waste in failed deliveries.

PELIPOD empowers you to shop and receive or return purchases securely wherever you are, without having to wait around. This is a demonstration of a mobility as a state of mind, with the user experience at the forefront of the product proposition.

An electronic keypad, smart sensors, camera, and mobile application work together to ensure the shopper's experience is fulfilled, and reduces the e-tailer's business waste in failed deliveries.

PELIPOD®

Apppli implemented

- Native applications for iOS and Android
- Algorithm design
