

WHY YOU NEED IT? LUMINICE® II

- Incoming air to an ice machine contains viruses and bacteria
- Luminice® II controls growth by adding sterilized air and cold oxygen plasma into the food zone 24/7/365
- This active air reacts with the microorganisms and inhibits growth keeping the food zone clean longer
- Make better tasting ice and improve your bottom line by cleaning less often

WHAT DO YOU ORDER?

- Two kits to choose from depending on model
- All KDT and KYT models are compatible back to 2017
- The machines are pre-drilled and pre-wired for easy installation
- Device powered by the control board-no additional power cord needed
- Tools required for installation- screw driver
