

# SAFETY DATA SHEET Tuskbond FD170 Aerosol

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Product name Tuskbond FD170 Aerosol

Container size 500ml

**REACH registration notes** All chemicals used in this product have been registered under REACH where required.

# 1.2. Relevant identified uses of the substance or mixture and uses advised against

**Identified uses** Adhesive.

**Uses advised against** Flexible PVC due to the risk of plasticiser migration.

#### 1.3. Details of the supplier of the safety data sheet

**Supplier** Sanglier Limited

Shelley Close

Lowmoor Business Park

Kirkby in Ashfield

NG17 7JZ

Tel: 01623 722661 (Mon-Fri 09:00-17:00)

Fax: 01623 885971 Technical@sanglier.org.uk

## 1.4. Emergency telephone number

**Emergency telephone** UK +44 (0) 1623 722661 (Mon-Fri; 09:00-17:00)

## SECTION 2: Hazards identification

## 2.1. Classification of the substance or mixture

#### Classification (EC 1272/2008)

Physical hazards Aerosol 1 - H222, H229

Health hazards STOT SE 3 - H336

**Environmental hazards** Aquatic Chronic 2 - H411

#### 2.2. Label elements

#### **Pictogram**

Signal word Danger

Hazard statements H222 Extremely flammable aerosol.

H229 Pressurised container: may burst if heated.

H336 May cause drowsiness or dizziness.

H411 Toxic to aquatic life with long lasting effects.

## **Tuskbond FD170 Aerosol**

Precautionary statements P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No

smoking.

P211 Do not spray on an open flame or other ignition source.

P261 Avoid breathing vapour/ spray.

P271 Use only outdoors or in a well-ventilated area.

P273 Avoid release to the environment. P251 Do not pierce or burn, even after use.

P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

P501 Dispose of contents/ container in accordance with national regulations.

Supplemental label

EUH066 Repeated exposure may cause skin dryness or cracking.

information

Please refer to Safety Data Sheet.

**Contains** PENTANE, ACETONE

Supplementary precautionary

statements

P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P312 Call a POISON CENTRE/doctor if you feel unwell.

P391 Collect spillage.

## 2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria. Containers should be thoroughly emptied before disposal because of the risk of an explosion. In use may form flammable/explosive vapour-air mixture. Vapours are heavier than air and may spread near ground and travel a considerable distance to a source of ignition and flash back.

#### SECTION 3: Composition/information on ingredients

#### 3.2. Mixtures

DIMETHYL ETHER	30-60%

CAS number: 115-10-6 EC number: 204-065-8 REACH registration number: 01-

2119472128-37-XXXX

Classification

Flam. Gas 1 - H220 Press. Gas (Liq.) - H280

PENTANE 30-60%

CAS number: 109-66-0 EC number: 203-692-4 REACH registration number: 01-

2119459286-30-0000

Classification

Flam. Liq. 1 - H224 STOT SE 3 - H336 Asp. Tox. 1 - H304 Aquatic Chronic 2 - H411

ACETONE 1-5%

CAS number: 67-64-1 EC number: 200-662-2 REACH registration number: 01-

2119471330-49-XXXX

Classification

Flam. Liq. 2 - H225 Eye Irrit. 2 - H319 STOT SE 3 - H336

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

#### SECTION 4: First aid measures

## 4.1. Description of first aid measures

**General information** Move affected person to fresh air at once. Show this Safety Data Sheet to the medical

personnel.

Inhalation Move affected person to fresh air and keep warm and at rest in a position comfortable for

breathing. Keep affected person under observation. If breathing stops, provide artificial

respiration. Get medical attention immediately.

**Ingestion** Rinse mouth thoroughly with water. Get medical attention. Do not induce vomiting.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. Get medical

attention if any discomfort continues.

**Eye contact** Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide

apart. Continue to rinse for at least 15 minutes. Get medical attention if irritation persists after

washing. If adhesive bonding occurs, do not force eyelids apart.

Protection of first aiders First aid personnel should wear appropriate protective equipment during any rescue.

#### 4.2. Most important symptoms and effects, both acute and delayed

General information The severity of the symptoms described will vary dependent on the concentration and the

length of exposure. Prolonged and repeated contact with solvents over a long period may lead

to permanent health problems.

**Inhalation** Coughing, chest tightness, feeling of chest pressure. Overexposure to organic solvents may

depress the central nervous system, causing dizziness and intoxication and, at very high

concentrations, unconsciousness and death.

**Ingestion** Ingestion may cause severe irritation of the mouth, the oesophagus and the gastrointestinal

tract.

**Skin contact** Prolonged contact may cause redness, irritation and dry skin. Product has a defatting effect

on skin.

**Eye contact** May cause eye irritation. Profuse watering of the eyes.

## 4.3. Indication of any immediate medical attention and special treatment needed

Specific treatments If adhesive bonding occurs, do not force eyelids apart.

#### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

Suitable extinguishing media Water spray, dry powder or carbon dioxide. Alcohol-resistant foam.

Unsuitable extinguishing

Do not use water jet as an extinguisher, as this will spread the fire.

media

## 5.2. Special hazards arising from the substance or mixture

**Specific hazards**Containers can burst violently or explode when heated, due to excessive pressure build-up.

Forms explosive mixtures with air. May explode when heated or when exposed to flames or sparks. Vapours are heavier than air and may spread near ground and travel a considerable distance to a source of ignition and flash back. Bursting aerosol containers may be propelled

from a fire at high speed.

Hazardous combustion

products

Oxides of carbon. Acrid smoke or fumes.

#### 5.3. Advice for firefighters

Protective actions during firefighting

Use water to keep fire exposed containers cool and disperse vapours. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control runoff water by containing and keeping it out of sewers and watercourses. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke.

Special protective equipment for firefighters

Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective

# SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Wear protective clothing as described in Section 8 of this safety data sheet. Wear suitable protective equipment, including gloves, goggles/face shield, respirator, boots, clothing or apron, as appropriate. Avoid contact with eyes and prolonged skin contact. No smoking, sparks, flames or other sources of ignition near spillage.

For non-emergency personnel For the greatest protection, clothing should include anti-static overalls, boots and gloves.

For emergency responders

Personal precautions

For the greatest protection, clothing should include anti-static overalls, boots and gloves.

#### 6.2. Environmental precautions

**Environmental precautions** 

Contain spillage with sand, earth or other suitable non-combustible material.

## 6.3. Methods and material for containment and cleaning up

Methods for cleaning up

Eliminate all sources of ignition. No smoking, sparks, flames or other sources of ignition near spillage. Absorb in vermiculite, dry sand or earth and place into containers. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect spillage for reclamation or disposal in sealed containers via a licensed waste contractor. Avoid water contacting spilled material or leaking containers. Approach the spillage from upwind. Take precautionary measures against static discharge. Use only non-sparking tools. Do not allow material to enter confined spaces, due to the risk of explosion.

### 6.4. Reference to other sections

Reference to other sections

For personal protection, see Section 8. For waste disposal, see Section 13.

# SECTION 7: Handling and storage

## 7.1. Precautions for safe handling

Usage precautions

Keep away from heat, sparks and open flame. Static electricity and formation of sparks must be prevented. Wear protective clothing as described in Section 8 of this safety data sheet. Read and follow manufacturer's recommendations. Do not use in confined spaces without adequate ventilation and/or respirator. Do not eat, drink or smoke when using this product.

Advice on general occupational hygiene Do not eat, drink or smoke when using this product. Remove contaminated clothing and protective equipment before entering eating areas. Wash after use and before eating, smoking and using the toilet. Do not smoke in work area. Clean equipment and the work area every day.

#### 7.2. Conditions for safe storage, including any incompatibilities

Storage precautions

Under normal conditions of handling and storage, spillages from aerosol containers are unlikely. Store in tightly-closed, original container in a dry, cool and well-ventilated place. Store at temperatures not exceeding 50°C.

Storage class

Extremely Flammable Aerosol

## 7.3. Specific end use(s)

#### Tuskbond FD170 Aerosol

Specific end use(s) The identified uses for this product are detailed in Section 1.2.

## SECTION 8: Exposure controls/Personal protection

#### 8.1. Control parameters

### Occupational exposure limits

#### **DIMETHYL ETHER**

Long-term exposure limit (8-hour TWA): WEL 400 ppm 766 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 500 ppm 958 mg/m<sup>3</sup>

#### PENTANE

Long-term exposure limit (8-hour TWA): WEL 600 ppm 1800 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL

#### **ACETONE**

- Soil; 29.5 mg/l

Sediment (Marinewater); 3.04 mg/kgSediment (Freshwater); 30.4 mg/kg

#### 8.2. Exposure controls

#### Protective equipment

Appropriate engineering controls

Provide adequate ventilation. Ensure that the direction of airflow is clearly away from the worker. Use approved respirator if air contamination is above an acceptable level. Observe any occupational exposure limits for the product or ingredients. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof electrical, ventilating and lighting equipment. Ensure operatives are trained to minimise exposure.

Personal protection Wear protective clothing.

Eye/face protection Wear chemical splash goggles. Personal protective equipment for eye and face protection

should comply with European Standard EN166.

Hand protection (PE/PA/PE), 2.5mil (0.06mm), >480 min. To protect hands from chemicals, gloves should

comply with European Standard EN374. Nitrile rubber. It should be noted that liquid may

penetrate the gloves. Frequent changes are recommended.

Other skin and body

protection

Provide eyewash station. Avoid contact with skin. Wear suitable coveralls to prevent exposure

to the skin.

**Hygiene measures** Promptly remove any clothing that becomes contaminated. Wash promptly if skin becomes

contaminated. When using do not eat, drink or smoke. Use appropriate hand lotion to prevent defatting and cracking of skin. Wash at the end of each work shift and before eating, smoking

and using the toilet.

ventilated spaces, a supplied-air respirator must be worn. Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Wear a respirator fitted with the following cartridge: Gas filter, type

AX.

Thermal hazards Spray will evaporate and cool rapidly and may cause frostbite or cold burns if in contact with

skin.

**Environmental exposure** 

controls

Residues and empty containers should be taken care of as hazardous waste according to

local and national provisions.

#### SECTION 9: Physical and chemical properties

## 9.1. Information on basic physical and chemical properties

Appearance Aerosol.

Colour Amber.

Odour Aromatic hydrocarbons.

Odour threshold Data lacking.

pH pH (concentrated solution): 7-8

Melting point Data lacking.

Initial boiling point and range Pentane: 35°C @ 760 mm Hg

Acetone: 56°C @ 760 mm Hg

Flash point A flash point method is not available for aerosols, but the major hazardous component, the

propellant (Dimethyl ether) has a flash point of <-41°C with flammability limits of 3.3% vol.

upper and 26.2% vol. lower.

## Tuskbond FD170 Aerosol

Evaporation rate Not available.

Evaporation factor Not available.

Flammability (solid, gas) No specific test data are available.

Upper/lower flammability or

explosive limits

Not available.

Other flammability No specific test data are available.

Vapour pressure Not available.

Vapour density Not available.

Relative density Liquid base: 0.75 @ 20°C

Bulk density Not applicable.

Solubility(ies) Insoluble in water.

Partition coefficient Not available.

**Auto-ignition temperature** No information available.

**Decomposition Temperature** Not available.

Viscosity 450-550 cP @ 20°C for liquid base.

**Explosive properties** In use may form flammable/explosive vapour-air mixture.

Explosive under the influence

of a flame

Yes

Oxidising properties Does not meet the criteria for classification as oxidising.

9.2. Other information

Other information Not available.

Volatile organic compound This product contains a maximum VOC content of 82 %.

## SECTION 10: Stability and reactivity

#### 10.1. Reactivity

reactions

**Reactivity** There are no known reactivity hazards associated with this product.

10.2. Chemical stability

Stability Stable at normal ambient temperatures and when used as recommended. Highly volatile.

# 10.3. Possibility of hazardous reactions

Possibility of hazardous

----

Will not polymerise. In use may form flammable/explosive vapour-air mixture. The following

materials may react violently with the product: Oxidising materials.

10.4. Conditions to avoid

Conditions to avoid Avoid heat, flames and other sources of ignition. Containers can burst violently or explode

when heated, due to excessive pressure build-up. Avoid the accumulation of vapours in low or

confined areas.

10.5. Incompatible materials

Materials to avoid Strong oxidising agents.

## 10.6. Hazardous decomposition products

Hazardous decomposition

products

Oxides of carbon.

## SECTION 11: Toxicological information

## 11.1. Information on toxicological effects

Skin corrosion/irritation

Skin corrosion/irritation

Based on available data the classification criteria are not met.

Serious eye damage/irritation

Serious eye damage/irritation Based on available data the classification criteria are not met.

Aspiration hazard

Aspiration hazard May be fatal if swallowed and enters airways.

General information Prolonged and repeated contact with solvents over a long period may lead to permanent

health problems.

**Inhalation** May cause drowsiness or dizziness.

**Skin contact** Irritating to skin.

**Eye contact** Vapour or spray in the eyes may cause irritation and smarting.

Route of exposure Skin and/or eye contact Ingestion Inhalation

**Target organs** No specific target organs known.

Medical symptoms Gas or vapour in high concentrations may irritate the respiratory system. Symptoms following

overexposure to vapour may include the following: Headache. Fatigue. Nausea, vomiting.

Medical considerations No information available.

## Toxicological information on ingredients.
