ASUS Splendid Technology

Developed by the ASUS Golden Eye team, the exclusive ASUS Splendid technology provides you accurate colours and colour temperature of all visuals viewed on the screen. It delivers brilliant, vibrant colours by fine-tuning various display settings and parameters. ASUS Splendid technology provides four different video settings to ensure the best visual possible.

Normal Mode

Configures colour gamut aspect for picture optimisation, suitable for reading documents or in daily activities.

Theatre Mode

Skin colour will look more natural when viewing movies.

Vivid Mode

Enhance the contrast level and colour saturation for lifelike pictures. Suitable for viewing color-rich photos.

Manual Mode

For professionals to manually configure the colour settings.

Input and Comfortable with ASUS IceCool Technology

ASUS X Series features an ergonomic and seamless one-piece keyboard designed to provide the most comfortable typing experience. ASUS IceCool keeps the palm rest at a temperature range between 28°C to 35°C, significantly lower than body temperature, making prolonged typing more comfortable for everyone.

Connectivity for File Transfers And More

Various tools such as Bluetooth 4.0, and HDMI, experience the ease of file transfers, connecting to a bigger screen and more.

Long Lifespan Li-Polymer Battery

ASUS X Series Notebook have a Li-Polymer battery that provides you up to 3x the lifespan of Li-ion cylinder batteries. Even after hundreds of charge cycles, it still holds up to 80% of its original charge capacity. Furthermore, the X Series features 2-second instant-on resume, allowing users to go from sleep mode to surfing the net or working on documents in a jiffy.

3x Battery Life Span with SuperBatt Technology

With SuperBatt technology, ASUS laptops come with a longer battery recharge cycle longevity of up to 3 times. Now you can be rest assured that the percentage of fully charged capacity will be kept high even after long-term usage.

Elegantly Crafted.

Dual-Core Intel® Processor for Smooth Performance

ASUS EeeBook features a dual core Intel® processor that has the power to handle all your computing needs. Ideal for multitasking, it is the perfect platform for working on Microsoft Office, watching movies, surfing the web, or playing the latest games. The fanless design of the EeeBook keeps noise levels down, ideal when you want to work silently in libraries or coffee shops.

Compact Design.

Connected Standby Technology

Connected Standby technology gives you a smartphone-like user experience on a notebook – allowing apps to refresh even when the notebook lid is closed so you don't miss app updates and messages. There is also ultra-fast resume from sleep mode too, so the EeeBook is always at the ready. ASUS EeeBook gives you up to 12 hours* of battery life so you need not worry about running out of batteries while on long flights, or when working out of libraries or coffee shops.

ASUS WebStorage

With ASUS WebStorage, your personal stuff is always with you on any internet-connected device. Your files are synchronised between all your devices, so you always have instant access to the latest versions. The ASUS WebStorage offers you easy storage, sharing, and syncing of everything from business presentations to personal photo albums and your favourite music or movie files.

Mobile Performance.

Gaming Visuals -SYNC™

is NVIDIA® G-SYNC™ display technology
the display's refresh rate with the NVIDIA®
a-smooth visuals. G-SYNC helps avoid lag,
late stutter, and eliminates visual tearing. It
the best and fastest gaming graphics — all
system performance!

Exclusive Hydro Cooling System

The Hydro Overclocking System gives ROG
overclocking performance so you can
the field. The cooling module pumps coolant
where it is circulated around heat-generating
coolant then heads back to the cooling
radiators help to dissipate heat. An ROG-
between the cooling module and GX700
coolant flows smoothly between the two

Cooling System helps GX700 cope with the
by the overclocked GeForce GTX980 GPU.
release the monstrous potential of GX700
performance and exceptional stability. On its
thermal design can still release the heat
GPU, so you still have beast-mode levels of

Specially-Formulated High Performance Coolant

The specially-formulated coolant provides corrosion protection
for all internal components and materials, including aluminum,
iron, steel, and copper alloys. The very low depletion rate of
the organic-acid inhibitor removes the need for supplementary
cavitation erosion protection additives, and reduces the
maintenance downtime normally required for regular inhibitor
tests and additive top-ups to maintain inhibitor concentration.
The Hydro Overclocking System helps decrease CPU and GPU
temperatures by 31% and 33% respectively.

Enjoy the Best of Both Worlds

ROG GX700 is the world's first gaming laptop with a
detachable liquid-cooling module for extreme overclocking.
With the liquid-cooling dock attached, you can overclock
GX700 to gaming desktop-like levels of performance. On its
own, it packs quite a punch, and easily outperforms other
gaming laptops on the market. It even fits snugly in your
backpack, so you can dominate LAN parties too.
