TOUCHERP

FOR SALES BPCS / ERP-LX

HARNESS THE POWER OF A REAL-TIME SALES ORDER MOBILE APP TO CLOSE MORE DEALS

TransitionWorks Software's TouchERP for Sales is the first in a series of mobile apps built utilizing the TransitionWorks Mobile Platform for BPCS/ERP-LX system users. Developed for both iOS and Android devices, TouchERP for Sales boosts ordering speed, reduces errors and enables your sales force to provide greater customer service, directly impacting your bottom line.
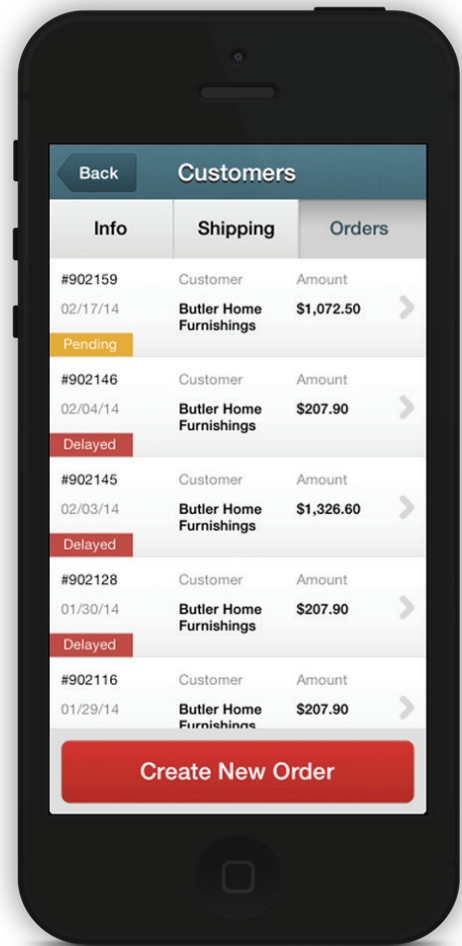

TouchERP for Sales gives your sales professionals a fast and efficient way to place customers' orders that's easy to use and available anytime, anywhere. Using a smartphone or tablet, TouchERP for Sales empowers sales professionals to securely place orders directly into BPCS/ERP-LX using each customer's specific configured pricing. They can also verify pricing, access order histories, check product availability, view order status, and review sales performance against goals.

YOU'LL GAIN:

- Use of BPCS/ERP-LX configured customer pricing

- Real-time order placement

- Significant time reduction in order creation and processing

- Accurate visibility of sales order history

- Customer assignment to specified sales professional

- Subscription to current events via Alerts

- Overall improved customer service

BPCS/ERP-LX SPECIFIC FEATURES, INCLUDING:

- Requested Delivery Date

- Special Charges

- Currency codes

- Payment Terms

- Order Notes

- Line Item Notes

- Real-time BPCS/ERP-LX generated pricing

WORKS EVEN IF YOU'RE OFFLINE

Touch ERP for Sales is always working even when your connection isn't. Online and offline mode allows sales professionals to store data and access important information from anywhere, and at anytime, on their own smartphone or tablet. Sales, order history, product and customer info are all just a touch away. Information is secure through local storage on your device and syncs with your ERP when the connection is restored.

ENTERPRISE GRADE MOBILE PLATFORM

TransitionWorks' mobile platform's robust integration capabilities and enterprise-level standards puts the power of the ERP in the palm of your hand. Leveraging the smartphone and tablet's capabilities provides ease of use and an intuitive workflow. Through an authorized secure User Log-In, TouchERP mobile apps connect directly to your ERP system. Mobile access to real-time information results in more accurate decision making, quicker response times, reduced errors, and greater customer satisfaction.

NO INFOR UPGRADE REQUIRED:

Think you have to upgrade your Infor ERP to benefit from implementing smartphone mobile apps? TouchERP for Sales is the only mobile app that allows Infor BPCS and ERP LX users to access real-time ERP data and execute orders on their smartphone without having to upgrade to Infor10 or move to another ERP system. TouchERP for Sales is compatible with BPCS versions 6.0 and later and ERP LX version 8.2 to the latest release.

Contact us now to discuss how TouchERP for Sales will create a more effective sales force, deepen customer relationships and drive sales growth for your organization.
