

CONTINUOUS LOGISTIC INVESTMENTS TO GUARANTEE HIGH AVAILABILITY AND FAST DELIVERY TIMES >

Every year, more than 2 million NRF parts find their way to customers in more than 80 countries worldwide. This requires a large, efficient and well-structured distribution network. NRF keeps investing in logistics to guarantee the highest possible service level and delivery performance. The latest investment is the opening of a new 5.000 m2 warehouse in Spain (Valencia).

GLOBAL DISTRIBUTION >

With a total export to more than 80 countries, NRF supplies engine cooling and air conditioning parts all around the globe. This requires a well-structured distribution network.

By carefully selecting logistic partners NRF is able to offer various delivery services per region. From delivering full container loads up to next day or even same day deliveries for parcels.

EXPANDING NRF WAREHOUSES IN EUROPE >

In addition to a wide range and a good pricing strategy, customers expect high availability and fast delivery. Therefore the stock level per warehouse has to be optimal. This can only be achieved through excellent sales forecasts and large warehouse capacities.

NRF has 8 strategically positioned warehouses in Europe. The largest NRF warehouse is situated in Poland (Gdańsk) and has a size of 10.500 m2. This capacity is needed, because from here NRF supplies the total Eastern European and Russian market.

NRF is developing and growing at a rapid pace. Focusing on the future, NRF

is investing in the expansion of various warehouses. In 2019 NRF expanded their warehouses in Poland and France. The most recent investment is the opening of a new 5.000 m2 warehouse in Spain (Valencia).

LOCAL PRESENCE >

As a NRF customer, you can rely on local sales and customer service teams. This is an important advantage of doing business with NRF. These employees speak the local language and are in close contact with local customers. In this way, NRF ensures an optimum level of service per country.

A WIDE PRODUCT RANGE >

With an offer of more than 8.000

engine cooling and air conditioning parts, NRF offers a complete range for the automotive aftermarket. NRF is constantly expanding its range with new parts. To continue to meet market demand, NRF is also adding new product groups. Recently NRF introduced EGR valves, blower motor resistors, compressor clutches and expansion tanks for trucks.

THE BENEFITS OF EASY FIT >

NRF offers a range of 2.165 Easy Fit references. When a NRF part is Easy Fit, all necessary assembly parts (such as O-rings, adaptors, clamps and clips) are delivered in the product package. A big advantage for the workshop.

ENGINE COOLING

RADIATORS | INTERCOOLERS
OIL COOLERS | RADIATOR FANS
FAN CLUTCHES | EGR COOLERS
EGR VALVES | EXPANSION TANKS

AIR CONDITIONING

CONDENSERS | COMPRESSORS
EVAPORATORS | INTERIOR BLOWERS
BLOWER MOTOR RESISTORS | HEATERS
RECEIVER DRIERS | EXPANSION VALVES
PRESSURE SWITCHES | COMPRESSOR OIL
COMPRESSOR CLUTCHES
