Who are we?

Under its brand name BAM® (Belgian Access Management), Bam Bormet develops, produces, installs and commercializes standard and custom made barriers, speed gates and turnstiles (revolving gates), both for the private and public sector. The products meet the highest quality and safety standards.

As a Belgian company, our aim is to achieve 100% reliability in all our processes, deliveries and agreements. Bam Bormet is a market driven, competitive and innovative trendsetter and aims at the development of long-term relationships with its customers, nationally and internationally.

Every product is manufactured in our 5.000m² large production facility in Nieuwerkerken, a central location in Europe.

We also work together with partners who integrate our products into total access management solutions for their clients.

Core values & assets

Quality

With Bam Bormet you will find everything at one place. From R&D to production and sales. Due to the high level of standards we set for our products and an optimal quality control, we guarantee that any product that leaves our factory is of superior quality.

Innovation

Since 1974, Bam Bormet is a trendsetter in the world of access management. Our R&D team is continuously working on adjustments to existing products and inventing new products in order to optimize our range.

New headquarters

2015 was an important year for Bam Bormet. After the former CEO passed on the company to his sons, the company moved to a brand new building in Nieuwerkerken, Belgium.

The new headquarters are equipped with a state-of-the-art workshop and all the necessary equipment. This building is located in the center of Europe which makes it easy to ship to other countries.

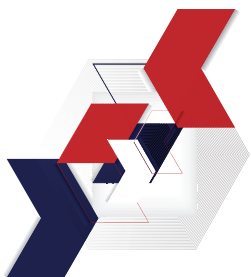

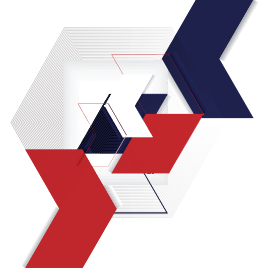

Personalization

Bam Bormet has been a trendsetter for custom products. Since we think together with our clients, we are not only a producer but also a partner in the field of R&D and marketing.

Dealer network

Through our international dealer network, Bam Bormet is able to serve the local markets. We support our dealers with communication & marketing tools, training, design support & after sales service.

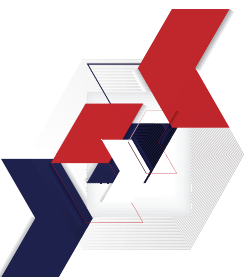

Products

Barriers

- Cabinet:
 - folded steel plate (2,5 mm to 3 mm)
 - base plate (6 mm)
 - sand blasted, metallized and epoxy powder coated (marine coating optional)
 - prevents corrosion.
- Maximum boom arm length : up to 15 m, in aluminium (light weight, durable)
- Service switch on door (increase of safety)
- Motor safety switch
- MCBF : up to 5.000.000 cycles (built-in compression spring)
- Durable electrical components : > 1.000.000 cycles
- Robust & durable products : very long lifetime
- Detailed finishing – aesthetically pleasing
- Products are pre-assembled and ready to install (installation time = shorter)
- All specs & options (reflectors, led lights, ...) are already mounted or installed in our factory
- Top quality = premium brand
- High opening speeds
- Up to date with the latest technological evolutions (example: able to program the Feig controller in less than 30 seconds without using external devices like laptop, cables)
- Warranty : up to 5 year due to the top quality of the products (maintenance agreement and service checklist is mandatory)
- Best price / quality balance
- Flexibility : tailor-made solutions with many options
- LED lights
- Private label possible
- Products meet the strictest European standards
- CE certificated (EM 13241)

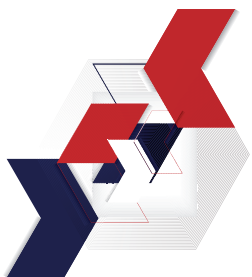

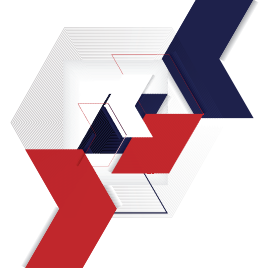

Products

Speedgates

- Trackless guiding system – high efficiency, ideal for heavy traffic
- No loss of space - gate disappears behind the columns
- High opening speed:
 - Double speedgate: 0.6m - 2m/sec
 - Single speedgate: 1.2 – 4m/sec
- Up to 8m width
- Can be combined with access control systems
- Position of wings is guarded by an encoder
- Double mechanical locking system in open and closed position
- Standard included: integrated double loop detector and control circuit for traffic lights
- Double speed gate: possibility to open 1 wing (master side) or 2 wings
- Partial opening possible (pedestrians – bikes)
- Automatic communication of wing position to the control system
- Emergency crank with replaceable euro-cylinder
- According to DIN EN 13241-1
- Photo cell curtain next to the columns (detection of trucks) and photo cell set behind the speed gates are standard included
- Active rubber contact points in order to avoid damage and inclusion
- Many options possible (LED traffic light, different constellation,...)

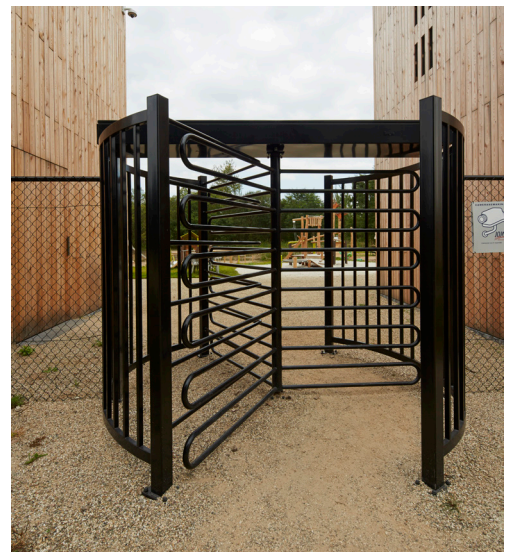

Products

Turnstiles

- Single and double turnstiles
- For pedestrians and bikes
- Blasted and metalized, finishing with a thermo-tempered polyester coating in any RAL colour
- Optional: stainless steel model
- Voltage free operating pulse (no contact required)
- Operating methods:
 - Once-only or multiple time-limited release
 - Release for a set time
 - Permanent release
- Count pulse per direction and per turn
- Voltage-free make-and-break contact
- Possibility to permanently release both turning directions simultaneously
- Emergency unlocking with mechanical lock or automatic unlocking in the event of a power interruption (optional)

Products

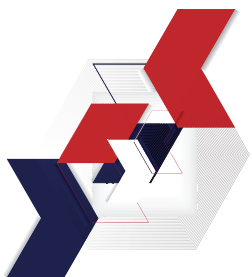

Control posts, boxes and columns

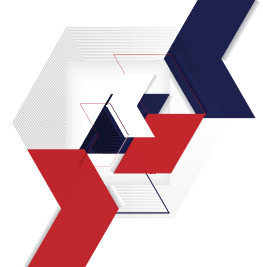

Control post/box:

- Blasted and metallized with thermo-tempered polyester coating in any RAL colour
- Box suit all kind of built-in devices
- Box with hinged front panel with cylinder lock

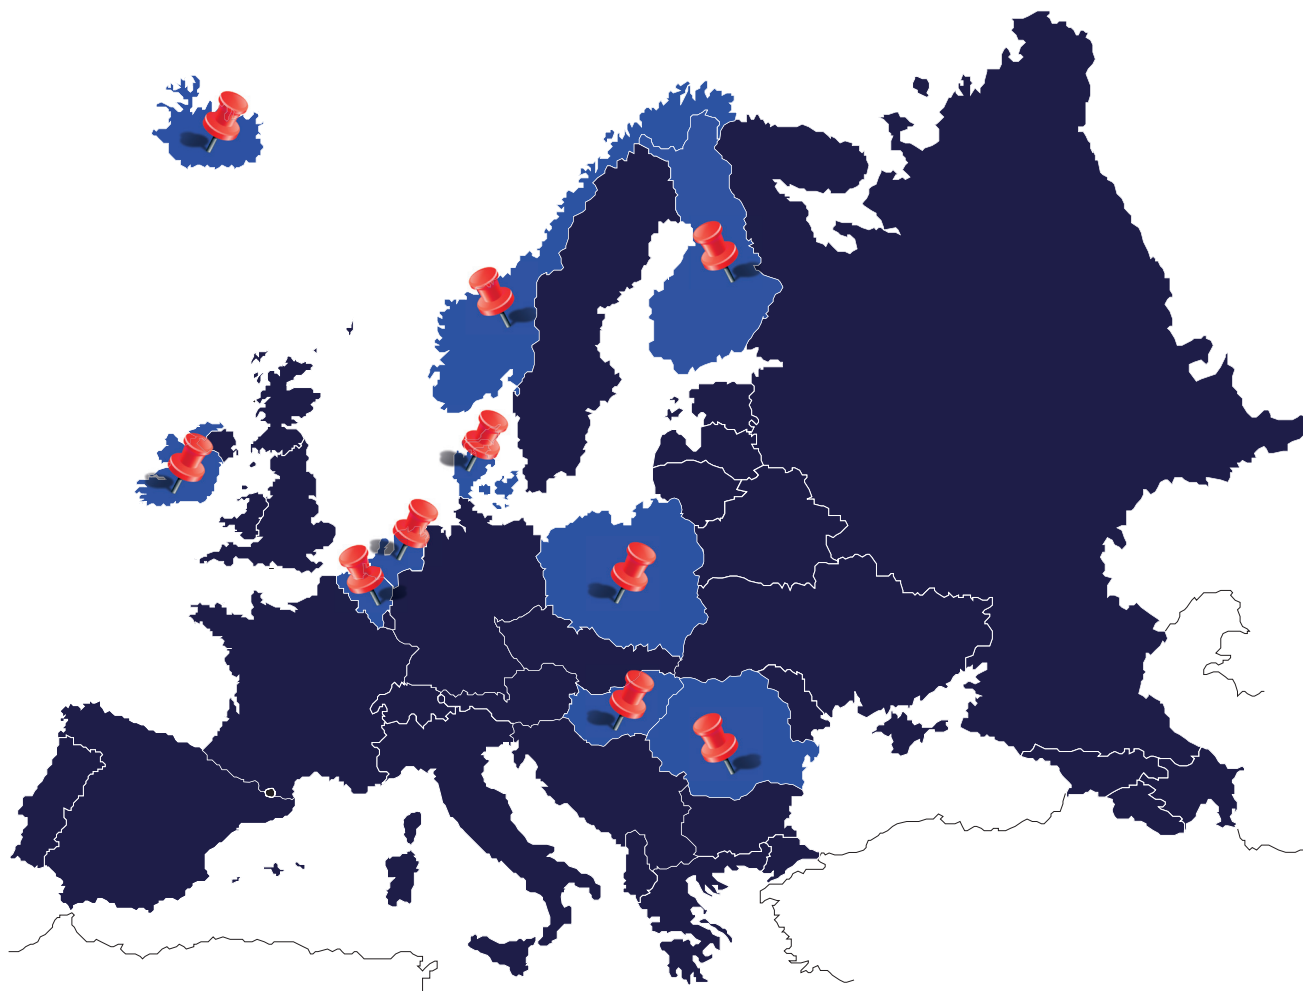

C-Columns:

- Perfect seal using high quality rubber
- Internal plate to attach all kind of built-in devices (card reader, camera, intercom, ticket dispenser, ...)
- Internal steel hinges
- 2-point latching with cylinder locks
- Blasted and metallized with thermo-tempered polyester coating in RAL colour 5010S
- Built-in front in stainless steel, with an aluminium cover
- Inclusive LED lighting
