## Recycling & Climate Change

In the vast majority of cases recycling waste is more efficient than producing new products from virgin material. This results in lower emissions of those greenhouse gases that cause climate change. Through the activity undertaken by Valpak you have directly supported

the recycling of 70 tonnes of material,  
which saves approximately 77 tonnes of carbon dioxide equivalents\*

Your contribution has helped the UK to achieve the recovery of 6,971,412 tonnes of packaging during 2012.
