

Service Pipe Register – Bringing Visibility to 2 million Customer Assets

November 2012

Middle East Water Leakage Summit

Joe Dalton

MWH®

BUILDING A BETTER WORLD

Why the Need: Customer Asset Register

- **Customer supply pipes**
 - constitute 30-40% of network & affect customer service DIRECTLY
 - Smaller diameters at shallower depth more susceptible to ground movement and loadings – so more risks
- **Supply Pipes**
 - Common supply pipes and service risks ?
 - Condition and leak losses – how bad, how much & when ?

Converting Corporate Data into Intelligence

Innovation is the deliverable application of information, imagination, and initiative in deriving greater or different value from resources:

Provision of improved Network Management through enhanced Inventories

ENHANCED INVENTORIES:

- Using Corporate data sets
- Site Surveys
- Engineering Logic
- Data Models with tailored rule bases
- Adaptable Model
- Short Programme delivery
- Cost effective

Creation of a Supply Pipe Inventory

- **Scope**
 - Create register of service point communication and customer supply pipe
 - Attachment of attributes to enable management of inventory
- **Objective**
 - Identify Shared Connections (serviceability risk)
 - Assess inventory condition
- **Programme**
 - 6 months

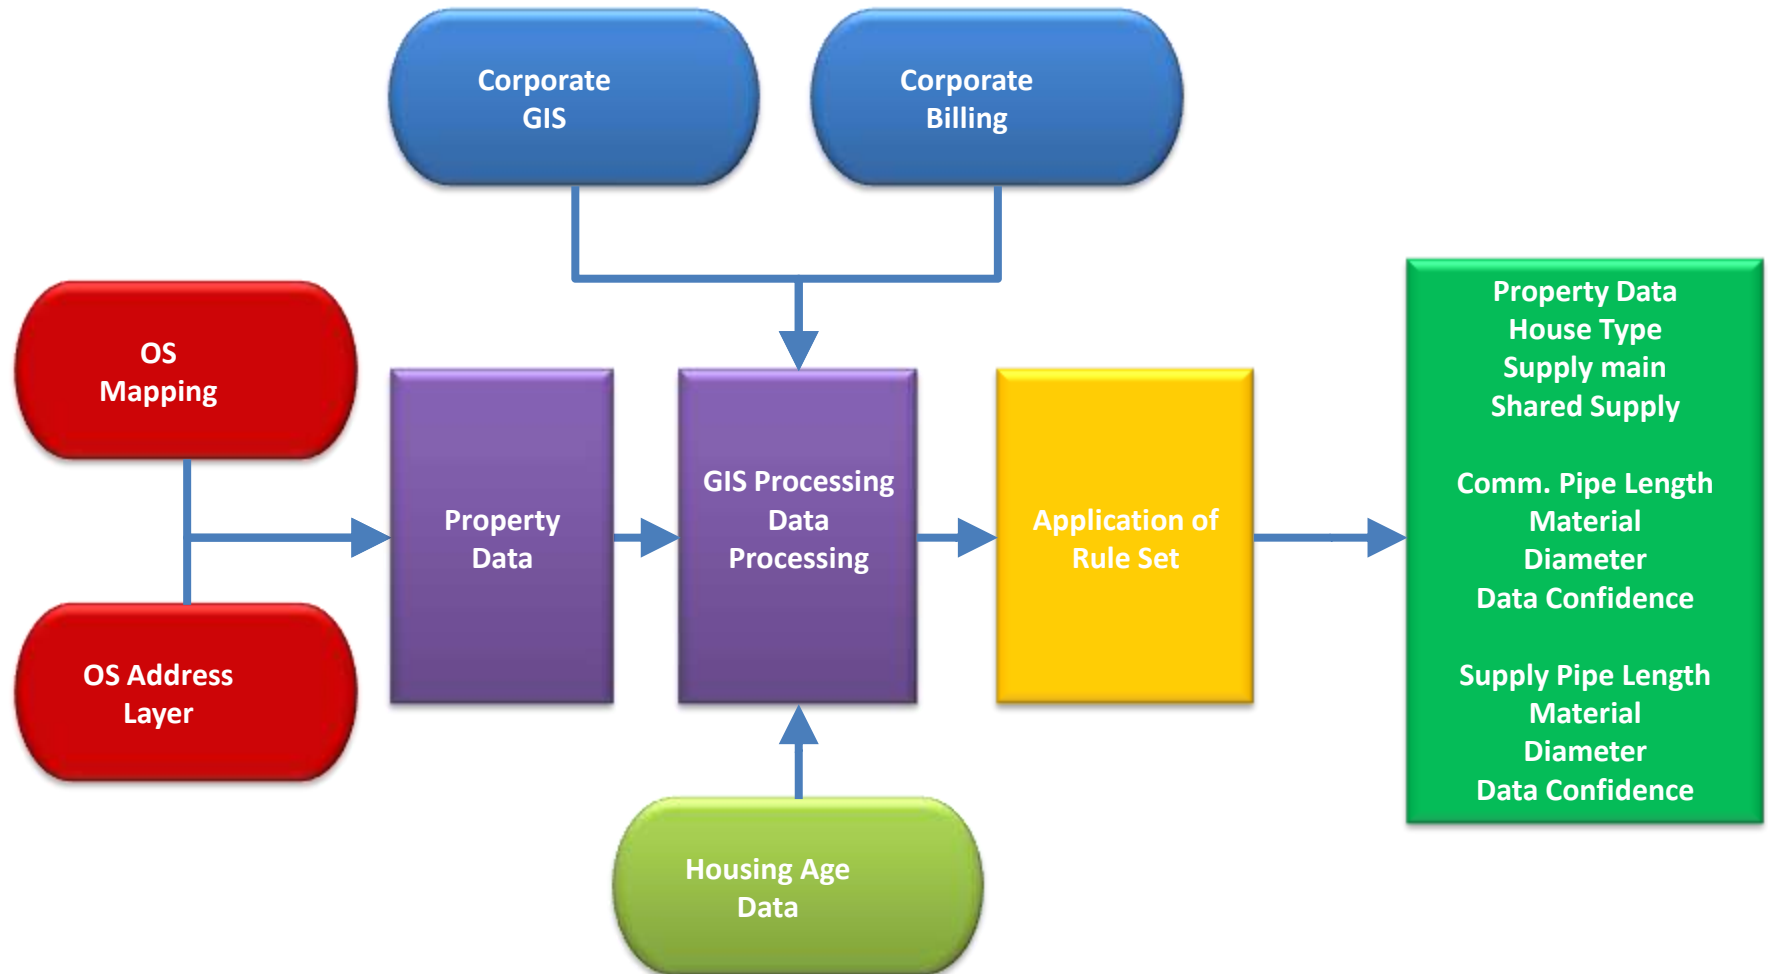

Deliverable: Service Pipe Inventory

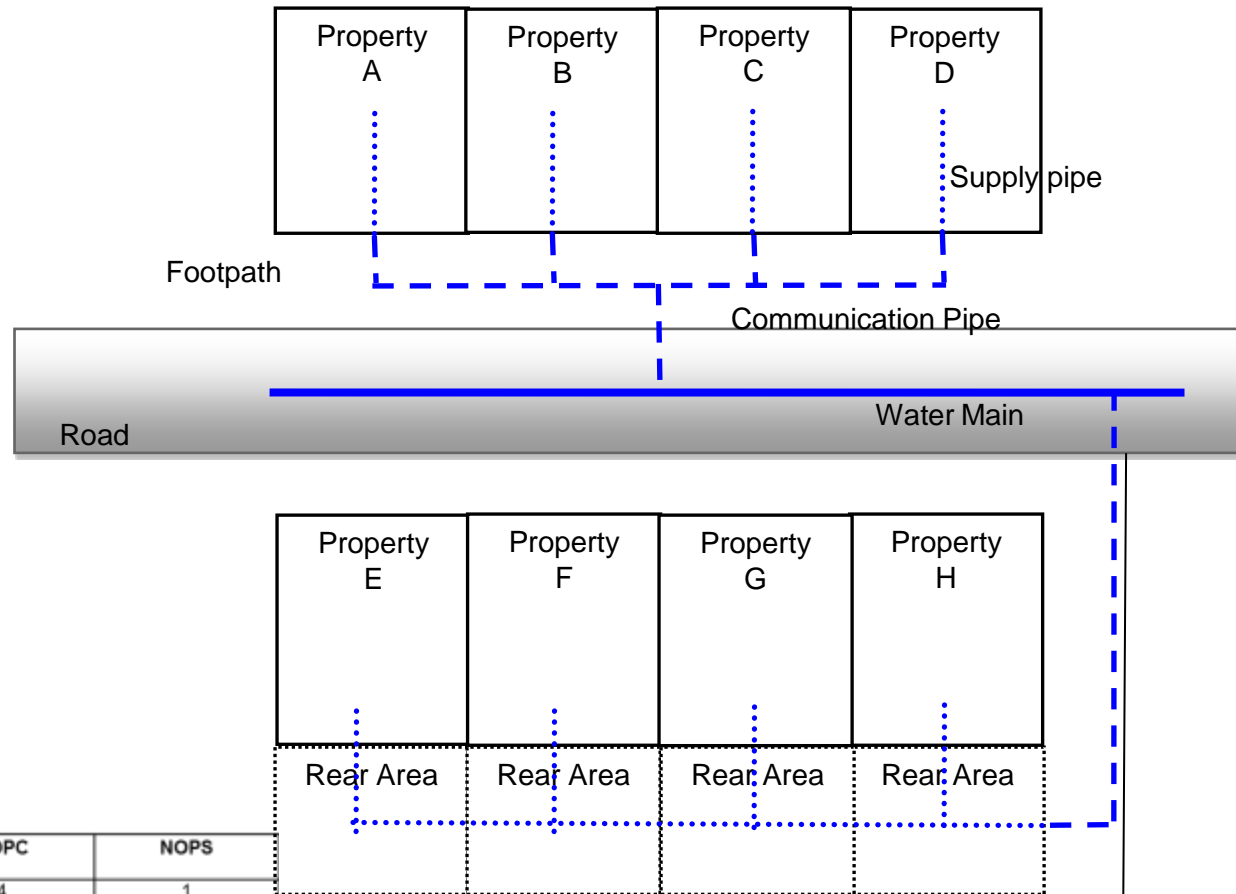

- Property Age
- Household in premises
- Premises joined together
- Pipe age
- Pipe Material
- Pipe Diameter
- Pipe length
- Number of dwellings served per connection
- Asset condition

Data Model Processing

Data Model Rule base

Property	OSNGR	NOC	NOPC	NOPS
A	Unique	0.25	4	1
B	Unique	0.25	4	1
C	Unique	0.25	4	1
D	Unique	0.25	4	1
E	Unique	0.25	4	4
F	Unique	0.25	4	4
G	Unique	0.25	4	4
H	Unique	0.25	4	4

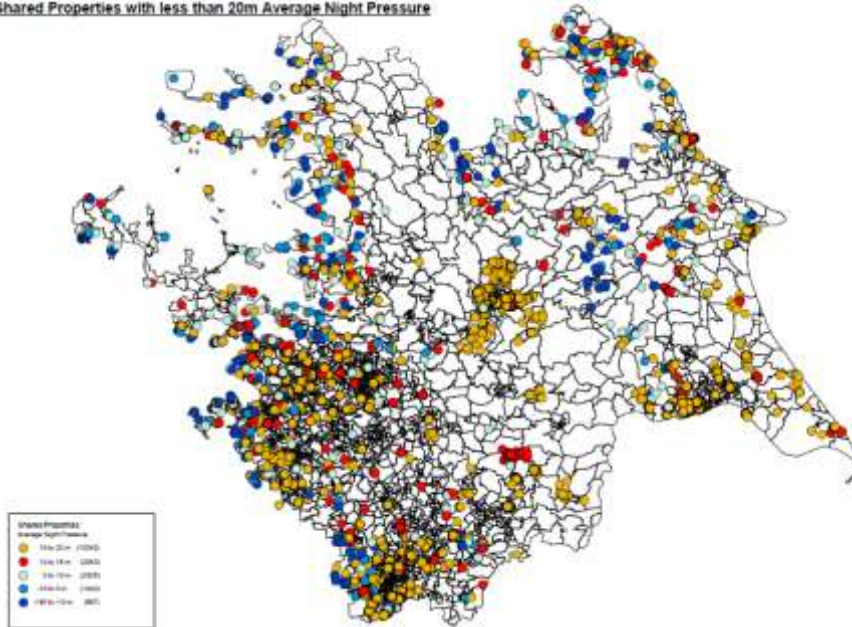

Data Model Outputs

- 7,418 Km of Communication Pipes
- 21,715 Km of Supply Pipes
- **29,133 km of Service Pipes**
- Robust platform to build upon
- Improved regulatory reporting
- Ability to maximise resilience

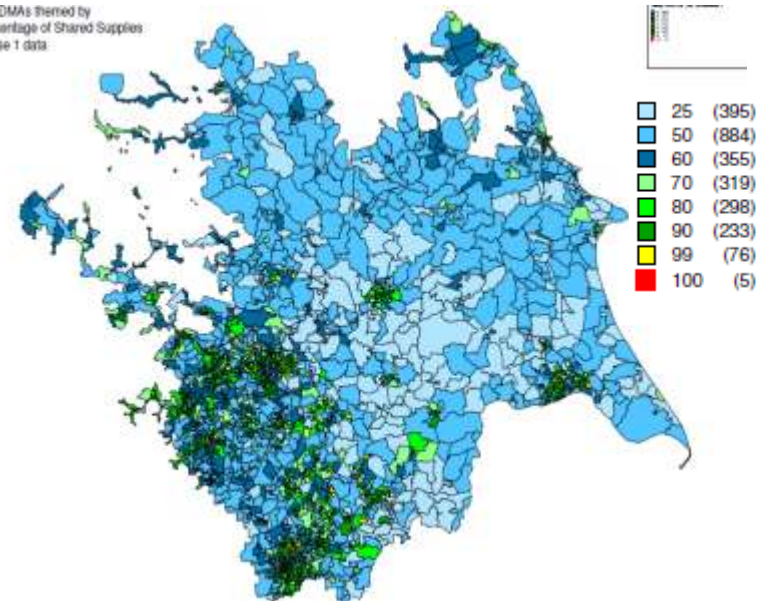

Data Model Outputs: Risks to serviceability

Shared Properties with less than 20m Average Night Pressure

YW DMAs themed by Percentage of Shared Supplies Phase 1 data

Legacy: Customer Asset Register

Creation of new Inventory Register for service pipes

Detailing **4 million assets**, with length, diameter and material

Visibility of asset condition supplying over **2 million** properties

■ Opportunities :

- Support how we respond to customers TOTAL service need
- Capture what we know and what we have done already
- Manage what we will need to do across strategic options
- Fill an asset knowledge gap of where to prioritise

Thank you for listening
